**Educating the Coach Horse**

Now that home breeding has once more become both wise and practical, the opportunity for some engineering of the coach horse was never better.

There are several methods of taking a stallion, whether in country or city stables. Your own horse should be a good, strong one. He should be well fed, with plenty of good water, and have all the necessary care and attention. He should be well shod and have a good collar and other necessary equipment.
