

A Morgan of Perfect Type.

The Morgan type of horse originated in Vermont, and many descendants of the original Morgan stock are still in existence. They have changed somewhat in appearance from the early specimens, but include in general their beauty, intelligence, good temper and endurance which have made them favorites as a general purpose horse.

Blue Mountain Prince was bred and raised by the late Austin Corbin of New York city at Newport, N. H. This horse has been awarded many prizes at horse shows and exhibitions as a perfect example of the old original Morgan. He is of a rich dark chestnut color, with a white strip in face and diamond on nose. Of perfect Morgan conformation throughout, he has served as a model for sculptors in search of a perfect Morgan type. He is richly

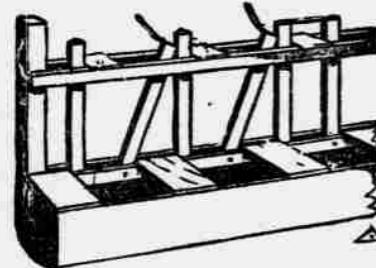

BLUE MOUNTAIN PRINCE.

[Asserted to be the purest blooded Morgan now living. Awarded numerous prizes at horse shows and exhibitions as the perfect type of the old original Morgan family.]

endowed with a perfect disposition, style, finish, beauty and speed, says American Cultivator in giving an illustration of this fine animal.

Blue Mountain Prince partakes of three strains of Morgan blood—viz, Woodbury, Sherman and Bullrush—and has a pedigree as follows: Sired by Ethan Allen 2d, son of Peter's Morgan, by Peter's Vermont, he by Gifford Morgan, son of Woodbury Morgan, he by Justin Morgan. The dam of Ethan Allen 2d was raised by Stephen Dow of Woburn, Mass., and sired by old Ethan Allen, out of the famous Morgan mare Jennie. She was by Hale's Green Mountain Morgan, and her dam was owned by Dr. J. L. Woods of Boston and was called Phebe. She was by Tom Morgan, he by True Briton, making him a half brother to Old Justin Morgan. Phebe's dam was sired by a horse called Nondescript.

Calves in Stanchions.
The accompanying cut shows the best and cheapest method of keeping and feeding calves, according to the Southern Cultivator, which says: Any farmer who is handy with tools can make the trough and construct the stanchions. By adopting this method you save room and each calf gets the food allotted to it. The calves cannot be fighting one another off, and you can save the manure better, also keep them cleaner. Every farmer who has

CALF STANCHIONS.

a good cattle barn and raises any number of calves should have stanchions arranged as shown here. We want our farmers to grow more food for cattle, then raise more cattle and finally fix up to feed and care for them better. When we begin to take the same pride in raising a fine cow that we now take in growing a bale of cotton per acre then we will be on the right road to true, successful farming.

Care of the Boar.

Many excellent boars are put in a dirty pen and confined the year round without any pasture or yard for them to exercise in, and by the time they are old enough to be in their prime they are ruined by excessive service and lack of exercise, proper nourishment, etc. Give him a yard, an acre in extent if possible, with a good strong fence around it and away from the rest of the herd, provide him a warm sleeping place during the cold and damp weather and treat him in a manner that will make him think he is of some importance and not salute him with a kick or a club every time you go around him. His disposition toward you will be to a great extent what you make it, and you can rest assured that he will appreciate and enjoy any kindness and rubbing that you do for him and will not forget all of the injuries and await his chance to get even with you.

Beef Cattle Breeding.

A fair amount of flesh adds to a beef cow's appearance and has a commercial importance when her calves are offered for sale, but the best breeders endeavor to avoid excessive fat, especially after a cow has had several calves, when she may become a "shy" breeder if allowed to become fat.

The International.

The International Live Stock exposition of 1907 is to be held at Chicago Nov. 29 to Dec. 7, and it is announced that the preliminary classification for the show will soon be distributed.

HORSE BREEDING.

Districts Should Specialize in the Production of Horses.

In one district of Richland county we have counted as many as forty-one pure bred Percheron mares owned by members of a breeding association, while the same district owns many high class grade mares of the same blood. Soon such a district will become famous for its draft horse stock of this particular breed, and that is the sort of reputation needed by each breeding district in the state. So long as each district produces a heterogeneous collection of horses of all manner of blood combination no success will be attained in attracting buyers ready to pay good prices for the class of horses they wish to find in sufficient numbers. There is no outside demand for the mongrels and misfits.

Centers For Buyers.

Jefferson county has become famous for her dairy cows. Around Lake Mills one may find finely bred Holsteins in considerable numbers, and in the Athens district of Marathon county the late lamented Hon. Fred Rietbrock made Guernsey cattle numerous and profitable among the settlers. To such centers go the buyers ready and willing to purchase at remunerative prices even more animals than are ready for their needs. We should have hundreds of such centers celebrated for their horses of some distinct and valuable type. We want centers of this sort in which the buyer can find numbers of a given kind of horse, centers where heavy draft horses of one or other of the well known breeds may be found uniform in type and excellence of development, and other centers where the buyer may find ready to his hand hundreds of high class carriage horses.

Shortsighted Policy.

But not every breed should be found striving one against the other in each district in the state. Such is too commonly the objectionable condition existing at the present time. There is nothing to be gained by such short sighted policy. "In unity there is strength." By uniting for the production of one standard, necessary profitable product in a given district, the breeders may confidently count upon success, and we sincerely trust that such a policy may soon direct the breeding operations of every horse producing district in Wisconsin.—Bulletin, Department of Agriculture, Wisconsin.

THE VETERINARY.

The occurrence in Virginia of sore mouth of cattle, an inflammation of the mucous membranes, has led Veterinarian Spencer of the state experiment station to outline in Southern Planter a course of treatment, as follows: Remove afflicted animals from such pastures as have produced it. Provide nutritive food, which must be sloppy or soft boiled roots, bran and ground oats and corn made into mash. Pure water in abundance is very important. Among medicinal agents there is a large group which give favorable results. Probably none can be selected which can modify the condition more than freely washing out the mouth two or three times daily with a warm 1 per cent solution of creoline, to be followed after each washing by the following mixture applied to the denuded surfaces with a swab of cotton tied on a small stick: Chlorate of potash, four ounces; tincture of iron, four ounces; glycerin, six ounces; water, one gallon. Fodder containing fungus is thought to be a fruitful cause of the disease.

Poor Digestion in the Horse.

A mare constantly loses flesh, is hungry all the time, teeth appear all right and no signs of worms are noticed. A veterinary surgeon who has seen many such cases, generally with either bad teeth or worms, advises as follows in Rural New Yorker:

First have mouth examined by a competent veterinarian. Employ a man whom you know is up to date to fix her mouth and then have a drugist put up the following: Iron sulphate, four ounces; powdered gentian, six ounces; nux vomica, two ounces; powdered wormseed, four ounces; powdered ginger, two ounces; blood-root, four ounces. Have this all thoroughly mixed together and give the animal a heaping teaspoonful morning and night with her oats and bran, and at the end of two weeks give her one-half pint of raw linseed oil with one-half ounce of turpentine mixed in thoroughly with the oil.

Worms in Sheep.

The Louisiana experiment station has been treating stomach and tape worms in sheep and lambs with the following vermifuge: "Pulverized rosin, one part; sublimed sulphur, two parts; air slaked lime, four parts; common salt, sixteen parts. These materials were thoroughly mixed and placed in a small wooden box protected from the weather, and to which both ewes and lambs could have access at all times." As the sheep did not eat it well salt put in the feed was substituted. The salt did not prevent the worms from gathering in the stomach, but it seemed to promote a better gain.

Warts on Cows' Teats.

Remedies for warts on a cow's teats are various. Professor Donald McIntosh's idea, as given in American Agriculturist, is: Tie a strong thread tightly around the base of each wart and when it sloughs off apply a little terebinthine of antimony to the parts once to destroy the roots of the wart. Then mix twenty grains tannic acid with one ounce each of glycerin and water; apply a little after each milking until the parts are healed. Use a milk tube to draw off the milk unharmed.

BONAPARTE AT JAFFA.

His Orders Regarding the Poisoning of Stricken Soldiers.

Professor Forgue of Montpellier in a lecture on the respect that practitioners should have for human life told the story of Desgenettes, which, though well known, is worth telling again, as it is told by Desgenettes himself.

When the French were about to evacuate Jaffa the question arose what was to be done with the plague stricken soldiers in the hospital. Desgenettes says: "Shortly before the raising of the siege—that is to say, on the 27th—General Bonaparte sent for me very early in the morning to come to his tent, where he was alone with his chief of the staff. After a short preamble as to our sanitary condition he said to me, 'If I were you I should end at once the sufferings of those stricken with plague and should end the dangers which they threaten us by giving them opium.'"

"I answered simply, 'My duty is to preserve life.' Then the general developed his idea with the greatest coolness, saying that he was advising for others what in like circumstances he would ask for himself.

"He pointed out to me that he was, before any one else, charged with the conservation of the army, and consequently it was his duty to prevent our abandoned sick from falling alive under the scimiters of the Turks. 'I do not seek,' he went on, 'to overcome your repugnance, but I believe I shall find some who will better appreciate my intentions.'" Desgenettes goes on to say that opium was, as a matter of fact, given to some thirty patients.

It happened, however, that a certain number rejected it by vomiting, were relieved, got well and told what had happened. The story has been told in various ways, and the fact of the poisoning of the sick soldiers has been accepted by the enemies of Napoleon and denied by the defenders of his memory. Desgenettes' narrative bears the stamp of truth.—British Medical Journal.

The Story of a Caxton.

In the Wesleyan Church Record is a paper by Mr. William Andrews of the Hull Royal institution, on "Curiosities of Book Collecting," in which he tells the story of the unearthing of a Caxton at Thorneck hall, Lincolnshire. The butler was entrusted with the work of weeding out the superfluous books. A perfect copy of Dame Juliana Berner's "Boke of St. Albans" (1486) was thrown carelessly aside and a little later sold to a peddler for ninepence. He thought he was a lucky man when he disposed of it to a chemist in Gainsborough for 3 shillings. It was soon sold to a bookseller for £2, who transferred it to another in the same trade for £7. It was subsequently sold to Sir Thomas Grenville for £80. At the time of this transaction Dibdin valued this book at £420, and in 1882 a perfect copy changed hands for £630.

An Elephant's Teeth.

Whoever has looked inside an elephant's mouth has seen a strange sight. Elephants have no front teeth, and they never eat flesh or any food that requires tearing apart. Eight teeth are all they have, two above and below on each side, huge yellow molars as wide as a man's hand and about two inches thick. Over these hay or fodder is shifted by the queerest, ugliest tongue in the whole animal kingdom, a tongue that is literally hung at both ends, having no power or movement except in the middle, where it shifts back and forth from side to side, arching up against the roof of the big mouth like an immense wrinkled pink serpent.

Proof Positive.

Mrs. Perry thoughtfully regarded the package the maid had just brought in and then remarked to her husband that she had meant to buy a mauve broche. "What did you get?" he asked. "Pink louisiane." Her husband could not quite conceal a significant smile, and Mrs. Perry went on hurriedly: "I know what you are thinking, Joe—that I don't know my own mind. But I can prove that I do.

"Did you ever know me to go to a grocery and bring away a can of peaches instead of a bar of soap? Certainly not!" she concluded triumphantly.—Youth's Companion.

Figures Won't Lie.

Benjy came home from school one day with "1776" pinned across his shirt front. "What does that mean, Benjy?" his mother asked. "You don't know no more 'n teacher," he grumbled. "That's just what she wanted to know." "But what does it mean, son?" repeated his mother. "Those figures," answered the little man proudly, "stand for the 'Declaration of Appendicitis!'"—Lippincott's.

CONDENSED STORIES.

Story of the New York Lobby and an Honest Legislator.

Gene Wood, chief of the Albany Lobbyists, told the other day what he regarded as a good joke on "Honest Dan" Bradley, a former Brooklyn senator. Senator Bradley abhorred lobbyists and side stepped every bill that had any semblance of graft connected with it; hence his sobriquet. A corporation measure was up for vote in the senate, and rumor had it that \$5,000 per vote was being paid to place it on the statute books. Bradley heard

"YOU CANNOT GET MY VOTE!"

of the bribery and, meeting some of the corporation lobbyists in the corridor, shook his fist in their faces and shouted:

"I might have supported this bill, but you cannot get my vote now!" "But the corporations opposing the bill are paying \$5,000 to those who vote against it," said the lobbyists. "You'll get \$5,000 either way."

"Then I'll stay out of the senate chamber when the bill comes up for action," snapped the senator as he strode away.

True to his word, Senator Bradley left the senate chamber, and during his absence the bill was beaten. Bradley congratulated himself on his escape from suspicion of having accepted a bribe. He went back to his desk and there found an envelope. It contained \$500.

"What's this for?" he asked of his neighboring senators.

"That's what the corporations paid for those who stayed out while the vote was being taken on that bill."—New York American.

Fred Moulin of the University of Oregon football team passed through Albany this morning for Corvallis, where he went to gather information as to the strength of the OAC football team which plays the Astoria eleven this afternoon. The University of Oregon and OAC will play in a few weeks.—Albany Herald.

PHILOMATH SNAPSHOTS.

Items of Interest From College Town—Things Lively.

(Some of the Philomath items were crowded out of Friday's issue for lack of space and are given below.)

The county schools in the vicinity are opening for the winter ones by one. In the Oak Ridge neighborhood, Miss Madeline Nichols is at the helm and school opened about two weeks ago. In the Evergreen neighborhood Miss Evadna Springer opened school last Monday, with almost forty pupils enrolled. In the Independent neighborhood, Miss Rosa Nichols will begin teaching next Monday. A few other schools have not been reported.

A basket school was conducted at the Evergreen schoolhouse last Friday evening by the C. E. society for purpose of purchasing a new organ. A good program and a good attendance is reported. The receipts amounted to almost thirty dollars.

John Bennett and family accompanied by Miss Myrtle Alford drove to Corvallis Tuesday. Mr. Bennett and family are moving into his mother's property lying east of the hotel.

The Women of Woodcraft are planning a box and witch shadow social and intertainment on All-Halloween October 31 at 8 o'clock. They are planning this to be the whitest, witchcrafty, bewitching entertainment that the burg will have had in some time. All young or old ladies bringing lunch for two, in plain or decorated boxes as they choose, will be admitted free. These ladies' shadows will be sold in the guise of a witch, or decorated baskets will be sold for some if so desired. The boxes from girls will be sold to young boys only. A complete program will be furnished later. The W. O. W.'s wish to announce that all

the witches from Witchville will be present.

Mrs. C. H. Newth and little son Carol visited with her sister at Junction City last week, returning home Monday.

The pupils of the higher grades in Prof. O. V. White's room organized a literary society last Friday night. The officers elected are: Pres., Bessie Pugaley; vice pres., Hazel Caldwell; sec., Nellie Moore; censor, Prof. O. V. White; critic, Ruth Pimm; chaplain, Florence Bogie; and sergeant-at-arms, Roy Scott. This is a commendable work for the school and should have the endorsement of all the patrons.

APPORTIONMENT MADE.

Of Benton County School Funds—Thirteen Thousand Disbursed.

The apportionment of Benton county school funds has been made by Superintendent Denman. The total amount disbursed was \$13,000, of which \$457,825 was state funds and the balance county funds. Each district received \$50 and so much per capita. The amount received by each district was as follows:

NO. DISTRICT	AMOUNT
1	178 52
2	233 50
3	162 61
4	154 29

W. H. SAVAGE, Corvallis, Or.

Verdict for Dr. Pierce

AGAINST THE Ladies' Home Journal.

Sending truth after a lie. It is an old maxim that "a lie will travel seven leagues while truth is getting its boots on," and no doubt hundreds of thousands of good people read the unwarranted and malicious attack upon Dr. R. V. Pierce and his "Favorite Prescription" published in the May (1904) number of the Ladies' Home Journal, with its great black display headings, who never saw the humble, groveling retraction, with its inconspicuous heading, published two months later. It was boldly charged in the slanderous and libelous article that Dr. Pierce's "Favorite Prescription," for the cure of woman's weaknesses and ailments, contained alcohol and other harmful ingredients. Dr. Pierce promptly brought suit against the publishers of the Ladies' Home Journal, for \$300,000.00 damages.

Dr. Pierce alleged that Mr. Bok, the editor, maliciously published the article containing such false and defamatory matter with the intent of injuring his business; furthermore, that no alcohol, or other injurious, or habit-forming, drugs are, or ever were, contained in his "Favorite Prescription"; that said medicine is made from native medicinal roots and contains no harmful ingredients whatever; and that Mr. Bok's malicious statements were wholly and absolutely false.

In the retraction printed by said Journal they were forced to acknowledge that they had obtained analyses of "Favorite Prescription" from eminent chemists, all of whom certified that it did not contain alcohol or any of the alleged harmful drugs. These facts were also proven in the trial of the action in the Supreme Court. But the business of Dr. Pierce was greatly injured by the publication of the libelous article with its great display headings, while hundreds of thousands who read the wickedly defamatory article never saw the humble groveling retraction, set in small type and made as inconspicuous as possible. The matter was, however brought before a jury in the Supreme Court of New York State which promptly rendered a verdict in the Doctor's favor. Thus his traducers came to grief and their base slanders were refuted.

Julius Caesar

Was a man of nerve, but sickness left its mark and he became aged before his time. Sickness is often caused by a torpid liver. Herbine will regulate your liver and give you health. Mrs. Carrie Austin, Hollon, Kansas writes: "I consider Herbine the best medicine I ever heard of. I am never without it." Sold by Graham & Wortham.

Notice to Creditors.

In the County Court of the State of Oregon for Benton County: In the matter of the estate of Jesse M. Gilstrap, deceased. Notice is hereby given that J. P. Hummer has been appointed Administrator of the estate of Jesse M. Gilstrap, deceased. All persons having claims against said estate are hereby required to present the same duly verified as by law required to the undersigned at Philomath, Benton County, Oregon, or at the office of J. F. Yates at Corvallis, Benton County, Oregon, within six months from this date.

Dated September 30, 1907. J. P. HUMMER, 78-88

A Most Worthy Article.

When an article has been on the market for years and gains friends every year, it is safe to call this medicine a worthy one. Such is Ballard's Horehound Syrup. It positively cures coughs and all Pulmonary diseases. One of the known merchants in Mobile, Ala., says: "For five years my family has not been troubled with the winter coughs. We owe this to Ballard's Horehound Syrup. I know it has saved my children from many sick spells." Sold by Graham & Wortham.

Notice for Publication.

United States Land Office, Roseburg, Oregon, July 30, 1907.

Notice is hereby given that in compliance with the provisions of the Act of Congress of June 4, 1892, entitled "An Act for the sale of timber lands in the States of California, Oregon, Nevada, and Washington Territory," as extended to all Public Land States by act of August 4, 1892, Lydia J. Hawley of Benton County, Oregon, State of Oregon, filed in this office on April 4, 1907, her sworn statement No. 8455 for the purchase of the Southwest quarter of Section No. 2 in Township No. 15, South of Range No. 8 West W. M. Co. and will offer proof to show that the land sought is more valuable for its timber than for agricultural purposes, and to establish her claim to said land before W. W. Aldrich, U. S. Commissioner, at his office in Eugene, Oregon, on Monday, the 4th day of November, 1907.

The names as witnesses: Leonard H. Hawley at Monroe, Oregon, and Sam Bowen, Alfred Bycraft and M. P. Bycraft, all of Alsea, Oregon. Any and all persons claiming adversely the above described lands are requested to file their claims in this office on or before said 4th day of November, 1907.

BENJAMIN L. EDDY, Register.

Let Us

Forget—Baby is restless, can't sleep at night, won't eat, cries spasmodically. A bottle of White's Cream Vermifuge never fails to cure. Every mother should give her baby White's Cream Vermifuge. So many times when the baby is pale and fretful, the mother does not know what to do. A bottle of this medicine would bring color to his cheeks and laughter to his eyes. Give it a trial. Sold by Graham & Wertham.

Notice to Creditors.

Notice is hereby given that the undersigned has been duly confirmed and appointed executor of the Last Will and Testament and estate of Mary A. Moore, deceased, by the County Court of the State of Oregon for Benton County, sitting in probate. All persons having claims against said estate are required to present the same, duly verified, to me at my residence in Corvallis, Oregon, or at the law office of E. H. Holgate in Corvallis, Oregon, within six months from the date of the first publication of this notice.

Dated at Corvallis, Oregon, this 24th day of September, 1907. MINOR SWICK, Executor.

Farmers.

Read the "Weekly Oregonian" of Portland and the "Corvallis Gazette" for the general news of the world, also for information about how to obtain the best results in cultivating the soil, stock raising, fruit raising, etc.

You can secure both of these excellent papers for one year by paying to the "Corvallis Gazette" the sum of two dollars and fifty cents, in advance. Remit the money by postoffice order or bank draft and these most valuable papers will be promptly mailed to you. 891f
