Now is the time to muzzle your good dogs and kill the worthless ones. The hot weather seems to make them vicious, and may develop rabies. No chances should be taken in this matter. Cases have already occurred in this city where children have been attacked and bitten by dogs usually considered gentle, and in Portland, Thursday, a man and two children were badly bitten. Do it now.

There appears to be a general terror throughout the country this summer of vicious dogs, and while there has been no scare outside of cities, so far as known, children should be cautioned to make no friendly advances towards any canine they may meet, lest harm result. Three cases were reported in Portland last Thursday where people had been attacked and bitten severely by vicious dogs, two of the cases being children and the other an adult. In Chicago there has been a "reign of terror" from brutes with hydrophobia, as many as 52 dogs being slaughtered by the police in as many minutes.

This gentleman believes in obtaining his information first-hand, and on this trip he was equipped in logger attire and prepared to make a thorough inspection of the road. The work may save a serious mishap, as the heavy traffic has already begun and last season there was more or less trouble to trains on this line.

FOR SALE—House and two lots. 342 Tenth street, corner Adams. Address G. H. Carl, Fossil, Ore. 57tf

Say, you property owner with the dilapidated sidewalk! Why don't you get a few nails and a hammer and repair your board walk, thereby earning the gratitude of those who are compelled to pass over it. Some of the board sidewalks in this city are in a wretched, not to say dangerous, condition. Many boards are loose, some broken and liable to trip people, perhaps causing serious injury. It will require but a few minutes' time, a few nails and perhaps a new piece of board or two to remedy the trouble.

A very serious and possibly a fatal accident was narrowly averted by the presence of mind of those concerned, Saturday afternoon at the Norton Adams home in Jobs addition. Mr. Adams is building an addition to and remodeling his house, and assisting him were Jim Harlan and Bert Newton. The latter two were on a scaffolding 15 feet from the ground, when one of the timbers pulled loose. As the 2x4 swung out into space, Bert Newton held onto it and was hurled to the ground but escaped with a badly sprained wrist. Mr. Harlan, as he felt himself falling, grabbed at the unfinished window casing and received only a wound from a nail. Had either man fallen the full 15 feet, alighting on broken boards and protruding nails, very serious consequences would most certainly have followed.
