It is said that the "Klamath Sombrero" is the most comfortable article of headgear to wear during the heated season. A great crowd gathered on Main street Saturday night, and while the band played, anvils and fire crackers were fired and there were other demonstrations of delight over the victory, in London, of Forrest Smithson, the old OAC athlete. Quite a number of Corvallis people are sleeping in tents this summer, being no doubt under the impression that they thereby have the benefit of an unlimited amount of fresh air. If the mental science theory is sound, it is possible they may derive the desired amount of benefit from the practice. But as a matter of fact a well ventilated bedroom will afford much more fresh air than a closed tent will. Sleeping in a tent with the flaps closed and the sides close to the ground is not like being in the open air, by a long shot. We all know that in cool weather a tent can be made fairly comfortable with a small fire, which is evidence that the outside air does not have full access to the interior.

Ten thousand dollars is to be given away in premiums on live stock, agricultural and manufactured products. Four special prizes of beautiful cups are to be given for the best groups of four each of horses, as follows: Best four animals, either sex, any age, bred by exhibitor; best group of four stallions, two years old or over, owned by one exhibitor; best group of four mares, two years old or over, owned by one exhibitor, and best group of one stallion and three mares, two years old or over, owned by one exhibitor. All are cordially invited to camp on the fair grounds where shade, water and other accommodations are afforded. W. H. Savage is superintendent of the pavilion and is always ready to show any favors possible to Corvallis visitors to the fair.

"When the warm weather heats your blood and you long to hie to the cooling seaside and plunge bodily into the briny, pause, hesitate, consider," says an eminent nose and ear specialist. "Observe the numbers of bathers who, during the season, evince a sudden deafness, which often lingers for weeks at a time and sometimes becomes a permanent trouble. To avoid this do two things. Remember the ancient instruction to wet the top of the head first, and never allow any cold water to percolate to the drum of the ear. Many people do not know that the sudden application of cold to the back of the ear will cause the delicate mechanism to expand sharply under the rush of blood to escape. This is always followed by partial deafness, which sometimes becomes a serious matter. Another thing to watch is the shampoo. The same danger lies here if the hair dresser is either unskillful or careless. In rinsing the hair the spray should first be applied to the top of the head and gradually brought down to the nape of the neck, thus obviating the trouble."
