One closed the door, and the other, with a revolver, kept in their places Mr. Johnson, the proprietor, his clerk, a customer and two others, and then smashed the large plate windows and packed in two bags the stock exposed. While they were thus occupied two others, armed with pistols, ordered passers by to move on. The property having been sacked, the thieves, still protected by their companions, moved quickly to a butcher's cart in waiting at the corner and drove rapidly away. The two who had kept possession of the store, receiving a preconcerted signal, turned on the throng and fired pistols in the air. A stampede of the people followed and the thieves escaped.

NEW YOBE, NOV. 11.—The Tribune prints an abstract of the report of the auditor on railroad accounts. The Central Pacific has not complied with the law, and certificates as to its neglect so to do have been submitted, and will be hereafter submitted from time to the Secretary for proceedings to be instituted for such neglect,. There are no reports furnished to the auditor's office under the law. The question arises in regard to the company as to the right they may or not have to lease hundreds of miles of another road in which their own stockholders are the principal owners, and pay millions of dollars for the privilege of operating the same. Washington, Nov. 9.—The Cabinet held a meeting to discuss the manner of resumption.

The Cabinet is a unit upon the question of resuming specie payment next January, and are equally a unit in being undecided as to the means for setting about this important step. Point most raised and least settled in discussion was the use which should be made of silver coin in the treasury. If it was paid out last it was feared there would be a run

at the treasury to-morrow morning, at which time a special appointment has been fixed. The party here include George S. Coe, and manager of the New York clearing house, Mr. Camp. The discussion will be a mutual advantage to all parties. It is believed that the Secretary is desirous of getting the views of such leading financiers as are included in the delegation in order to assist him in the preparation of his annual report to Congress; and the bankers are desirous, on the other hand, of having him recommends number of measures to Congress for the amelioration of business, chief among them being the reduc-

Cox followed in a half hours' speech, during which he labored hard to prove that if Tammany was a corpse it was, after all, a very lively kind of a corpse, and would make a lively wake for the undertakers who came to bury it. He said that both houses would be Democratic and predicted the immediate downfall of the Republican party.

The total loss is estimated at about \$400,000, of which more than one half is covered by insurance. The fire burned stubbornly from 7 in the morning until between 5 and 6 P.M. The water supply was good and furnished by artesian wells. No lives lost and no one seriously injured. To-night steam engines played on the ruins. In 1869 almost the same section was swept by a fire scarcely test destructive than that of to-day.

Younger's ranch, about a mile north of this city, between two boys, each about 15 years of age—Elton Moody and Harry Younger. The first named is a son of Charles Moody of Moody's flour mills in this city; the latter the youngest son of Col. Younger. The Moody boy had gone to the ranch to shoot ducks by moonlight, and there met Harry Younger hunting. Younger ordered Moody off the premises and hot words ensued. The affair has thrown a gloom over the entire community in which the lads are known. The wounded boy died this evening at 6 o'clock.
