And the stranger's a whistling "Home, Sweet Home," is has comes up from the grate. The control to the fitchem now, for I don't want to has bought the pisce? Why, can that be Thomas coming ? he usually steps why, can that be Thomas coming ? he usually steps that you will be restored soon to health." "I much doubt it," he said, shrugging his shoulders with an air of incredulity. "Nevertheless, I much wished to pay you a visit to-day, to see you and your twenty star years ago. There's something that sounds like gladness, and Before our Willie wont out from home to die on the stormy'ses. "Mad why are yon smilling, and holding my hands so tight?" And why don't you tail me cutchr-mast way of portion to the tonnage, the cost of main-tenance should also be much less."-

Science for the People.

According to Dr. W. M. Hudson, one of the fish commissioners of Connecticut.

58,000 young Penobscot salmon, hatched 58,000 young Penobscot salmon, hatched last spring at the hatching house at Po-quonnock, have been placed in the Farmington river and its tributaries. Of land-locked salmon eggs from Grand Lake stream, Eastern Maine, 91,000 were hatched and distributed. The demand for these young salmon to be used in stocking ponds and streams has been very great. From the eggs introduced A woman would sooner rule a he than fill it; not so a man. A woman listens to a play with her mind and judges it with her senses. It takes as much wit not to displease a woman as it takes little to please her. It is surprising how near age brings a woman to death and how little it pre-pares her for it.

The woman who confides to one man her partiality for another seeks advise less than an avowal. It takes one less time to get over one's

stocking ponds and streams has been very great. From the eggs introduced by the commission four years ago, sal-mon weighing from two and a half to four pounds each have been taken in Hog pond, in Lyme, in Snipsic pond, in Rockville, in Long pond, in Winchester, and in Twin lakes, in Salisbury, and in many others the young fish are said to be growing and thriving finely. The young salmon were this year sent to all parts of the State and put into such lakes, own misfortune than to be reconciled to The latest school understands liter ture as much as the English do cookery. Its ideal is raw meat and plenty of condionds and streams as seemed adapted to their wants.

Brook trout to the number of 110,000 ments.

were hatched and distributed, and even this large number was insufficient to sup-How many of our writers most in vogue should bear in mind that if talent this large number was insufficient to sup-ply the demand. Arrangements have been made to secure 400,000 young fry next spring. Regarding the experiment of hatching young shad in the waters of the Sound by artificial means, Dr. Hud-son says : With the exception of a few thousand young shad hatched at Weth-orsfield the operation was a fully a The supplements everything it can dispense with nothing. There are people with whom penitence stands for repentence—people with whom wearing mourning dispenses with feeling sorrow. son says : With the exception of a few thousand young shad hatched at Weth-ersfield the operation was a failure. The shad taken were found to be immature, shad taken were found to be immature. burn was designated as "Ar. Behm and Wagner, in their sixth is-sue of the "Population of the Earth," which has just appeared, estimate the total population at 1,455,923,450. Eu-rope is assigned 315,929,000 inhabitants; Asia 834,707,000; Africa, 205,679,000; Amatralia and Polymaria 4,093,200. the Australia and Polynesia, 4,031,300; the Pelar regions, 82,000; the United States, 48,000,000.

Bishop[Eligio, at Chong-Tong, in China, has invented an alphabet of thirty-three letters, by means of which all the sounds of the Chinese language can, it is said, be presented. The Emperor of Austria has been so well pleased with the invention that he has presented the Bishop with a complete typographical apparatus so that the new alphabet may be employed in neutring. The character is a source of the source o ployed in printing. The characters used by the Chinese number 30,000. At the last meeting of the Balloon So-ciety of Great Britain the recent balloon voyage out to sea at Cherbourg was re-ferred to. Mr. Simmons stated that

trip at Hull, he went twenty miles out to sea, and then got into an anticipated re-turn current, which he found a few feet above the ontward current, and which safely landed him at the desired spot on terra firma. The President read a letter from member of the Society who had made one of his ascents in a thundermade one of his ascents in a thunder-storm, and found the stmosphere at an altitude of about 200 feet and for a height of 100 feet to be of a dull leaden hue, but as soon as he had risen above this stratum he found the sky quite un-clouded, and witnessed perfectly clearly the storm raging below in all its rubber goods a specialty.
