House Drainage. [Hall's Journal of Health.] There is a common mistake regarding house drains-that they are made too large. It is incorrect to suppose that a very large drain is safer than one of moderate size, because the smaller the drain the more concentrated the flow, and the more thorough the flushing when larger amounts of water than usual are passed through it; as on washing days It may be taken as a rule that no private house, no matter how large, can need for its drainage, a pipe larger than four

WITHOUT RIVERS OR ROADS

Mexico During the Rainy Season ... The Fantastic Burre. [Letter in New York World.]

Not only is Mexico without rivers but it is without roads. Cortez made a good artificial road from Vera Cruz up to Mexico 350 years ago, and this is still in use for the occasional wagon. But the employment of wagons for transporting either freight or passengers is scarcely known in Mexico. The reason for this doubtless is that in the rainy season-June to September, inclusive-the roads are well nigh im-

passable. Mules have been known to be drowned in the very streets of this city burg, Austria. -stuck in the mud at first, and as they struggled to get free at last swallowed up out of sight. "You see that place in the street yonder, where it is improved?" asked an acquaintance f me the other day, indicating a spot on the clasping her in his arms and stroking next block.

I said yes. "That's a bad place in the rainy season," he continued. "I once saw a team of forty mules stalled there while

As a result of this tenacious quality of the soil in heavy rains, in a country where it rains every day for four months, the most of the transportation in Mexico has always been done by huacaleros and donkeys. The huacaleros still do the most of it. These are porters, native Mexicans, with a hundred to a hundred and fifty pounds of some staple or merchandise strapped upon each of their backs. These make very long journeys, sometimes alone and sometimes in large parties, and they carry every imaginable thing that is grown or used in the country. Some of these are women and some children. Whoever rides out of this city early any morning on the road peons with strings of live chickens, army.

Some of these porters are laden with power that will sift and sort out refuse this young husband—a tall, strong. At the peace it was purchased from charcoal, the only fuel of the country; of all kinds to the extent of 150 tons a limbed, manly fellow, by the way—pat Breguet and presented by Sir E. Paget some with wheat or bags of corn, some with cocoanuts. American bankers and tourists agencies are unanimous in expression of the opinion that confidence is returning, and that there will be a marked increase of tourists.

Says a Paris dispatch: Gerville Reache, amid violent interruptions from the extreme left, read the committee's report on the bill for the revision of the constitution. During the sitting Clemenceau and Lagurre asked whether gendarmes would be employed to tear them from the tribune.

The depression in the iron business at Pittsburg, Pa., is said to be greater at present than for a number of years. Many mills that continued in operation during the panic of 1873 are now closed, while others that had plenty of orders then are now running slack. Fully 7,000 men less are required to perform the same amount of work than a year ago.

In order to avert as much as possible the
