# COMPARATIVE WORTH OF BAKING POWDERS.

BUNFORD'S, when not fresh ....

### **REPORTS OF GOVERNMENT CHEMISTS**

As to Purity and Wholesomeness of the Royal Baking Powder.

"I have tested a package of Royal Baking Powder, which I purchased in the open market, and find it composed of pure and wholesome ingredients. It is a crean of tartar powder of a high degree of merit, and does not contain either alum o phosphates, or other injurious substances. E. G. Lovz, Ph.D."

"It it a scientific fact that the Royal Baking Powder is absolutely pure." "H. A. MOTT, Ph.D."

"I have examined a package of Royal Baking Powder, purchased by myself in the market. I find it entirely free from alum, terra alba, or any other injurious sub-stance. HENRY MORTON, Ph.D., President of Stevens Institute of Technology."

"I have analyzed a package of Royal Baking Powder. The materials of which it is composed are pure and wholesome. S. DANA HAYES, State Assayer, Mass."

The Royal Baking Powder received the highest award over all competitors at the Vienna World's Exposition, 1873; at the Centennial, Philadelphia, 1876; at the American Institute, and at State Fairs throughout the country. No other article of human food has ever received such high, emphatic, and uni-versal endorsement from eminent chemists, physicians, scientists, and Boards of Health all over the world.

NOTE .- The above DIAGRAM illustrates the comparative worth of various Baking Powders, as shown by Chemical Analysis and experiments made by Prof. Schedier. A one pound can of each powder was taken, the total leavening power or volume in each can calculated, the result being as indicated. This practical test for worth by Prof. Schedier only proves what every observant consumer of the Royal Baking Powder knows by practical experience, that, while it costs a few cents per pound more than ordinary kinds, it is far more economical, and, besides, affords the advantage of better work. A single trial of the Royal Baking Powder will convince any fair minded person of these facts.

While the diagram shows some of the alum powders to be of a higher degree of strength than other powders ranked below them, it is not to be taken as indica-ting that they have any value. All alum powders, no matter how high their strength, are to be avoided as dangerous.

More than 7,000 horses are used by the street-car lines in Boston.

TUTT'S "THE OLD RELIABLE." 25 YEARS IN USE. The Greatest Medical Triumph of the Age1 Indorsed all over the World. PROF. J. Q. ADAMS, South Syracuse, N. Y.. recommends Warner's TIPPECANOE. The Best, in the strongest terms for dyspepsia and stom-ach disorder. TORPID LIVER. Loss of appetite. Nausea, bowels cos-tive. Pain in the Heed, with a dull sen-sation in the back part. Pain under the shoulder blade, fullness after eat-ing, with a disinclination to exertion J. H. DENIO, Esq., of Albion, N. Y., years ago was taken with stomach disorder, aleep-lessness, melancholy, headaches, etc. He gave up his business and resorted to farming in the hope that out-of-door exercise would restore him. He exhausted all the known means of the best paysicians in vain. In 1884 began taking Warner's TIPFECANOE, The Best, and in March, 1885, he stated that his health was better than it had been for years, and that no medicine he knew of or had ever heard of equaled Warner's TIPPECANOE, The Best, for stomach disorders, ing, with a disinclination to exertion of body or mind, Irritability of temp-er, Low spirits, Loss of memory, with a feeling of having neglected some duty, weariness. Dizziness, Flutter-ing of the Heart, Dots before the eyes, Yellow Skin Headache, Restlessness

at night, highly colored Urine.

IF THESE WARNINGS ARE UNHEEDED, SILING DISLAMES WILL SOUT BE DEVELOTED. TUTT'S FILLS are especially adapted to such cases, one dose effects such a change of feeling as to astonish the sufferer. They Increase the Appetite, and cause the body to Take on Flesh, thus the sys-tem is nourished, and by their Tomio Action on the Digestive Organs, Regu-lar Stoels are produced. Frice 25 cents.

TUTT'S HAIP I am an old man. For 28 years I suffered with alcers on my right leg as the result of typhoid fever. Amputation was suggested as the only means of preserving life. The doctors could do nothing for me, and thought I must die. For three years I never had a shoe on. Swift's Specific has made a permanent cure and added ten years to my life. WM. R. REED, Hall Co., Ga.

ome of Their Habits and the Influences STEINWAY, Gabler, Boenish Pianos; Buriet Organs, hand instruments. Largest stock of Shee Which Determine Their Habitation. Music and Books. Bands supplied at Eas M. GRAV. 206 Post Street, San F "In the spring." said Fish Commissioner Blackford, of New York, recent-

ly, "the young man's fancy lightly turns to thoughts of broiled shad. It's generally around St. Patrick's Day t at shad make their first appearance in the North River, and there is a tradition among Weehawken fishermen that the saivt was himself a mythical shadow," and even as the Commissioner spoke he inadvertently stuck the lighted end of his cigar in his mouth. Recovering quickly from the surpr se which this act occasioned, he resumed: The experts tell us that the tempera ture of the water governs the appear-ance of shad in the rivers and harbors along the Atlantic Coast. so that there is really no accurate method of determing when they will appear. Ob-servations taken in 1881, 1882 and 1883 showed that on an imaginary plateau out in the deep sea, extending from the capes of the Chesapeake to the Delaware Breakwater, the temper-

ature of the water was much higher than in the rivers and bays along the shore. The presumption, therefore, is that schools of shad belonging to the Chesapeake, the Delaware and the North rivers have their common winter quarters on this plateau. When the shore water, as the season' advances, becomes warmer than the ocean water. the shad migrat on into continental waters begins. If the northern era should be warmer than the southern, then an unusual propor-tion of shad will be thrown into our waters. If, on the other hand, cold waters should sweep down from the northern rivers, then the shad will make a dead set for the Chesapeake, and our fisheries will prove a failure.

Warm rains and the absence of snow in the mountains at the beginning of the fishing season will also determine the movements of these fish. If, in the early spring, they get up to the mouth of a river and find the water warm, then a tumultuous rush of shad and herring takes place up the river, and the markets will be glutted. 1 trust

this will prove the case this season." - Shop signs in London were former-ly not affixed to houses. but were placed
