THE GRAPE CURE. SAL-MUSCATELLE

In America WITHOUT THE EXPENS OF AN EUROPAN JOURNEY! The crystalized salts, as obtained in a pure state from grapes and choice fruit, in a portable, palat-

able, simple form, are now presented to the public of America as the grandest resolvent of impure blood, corrector of the liver and regulator of the bowelsthe natural promoter of HEALTH AND LONGEVITY.,

Eminent physicians claim this achievement a new

A POSITIVE, NATURAL

SICK HEADACHE AND DYSPEPSIA CURE.

Sal-Muscatelle is Nature's own product. It supplies to the system the want of sound, ripe grapes and fruit; it is the simplest and best preventive and cure for all functional derangements of the liver and kindred aliments; prevents the absorption of mal arial diseases—fevers of all kinds; counteracts the effects of bad air, poor drainage and impure water, a powerful oxydizer of the bio od; a natural specific for all skin cruptions, sick headaches, biliousnes, nervousness, mental depression, and will remove the effects of nacidental indigestion from excessive eating and drinking. Have it in your homes and on your travels. It is a specific for the fagged, weary and worn-out. Prepaired by the

This paper to kept on file at the office of

on the umbrella, which read:

THE "STAR OF OREGON." Herbert Houre Bancroft's History of Oregon, 1734-1848.

When, Oregon was held by the United States and England according to a treaty of joint occupancy, much Party While Exploring a Cave in the rivalry and hard feeling existed between the American settlers and the Hudson Bay company people. Consequently, when in 1840 a party of ery of the water was made by a party sequently, when in 1840 a party of which explored the large cave, which is eight young Americans concluded to entered near the water's edge near the Nashville & Chattanooga bridge. This party, by dint of crawling and creeping on all fours through ditches, gulleys, and over streams, along fathomless abysses to leave a country where there were and near yawning chasms, entered a gigan-tic dome-shaped chamber, from the roof did not acquaint the company with der, a mountain stream, ice cold and clear their plan, fearing that the English as crystal. By original experiments with lighted balloons, the altitude of the chamber ascertained and the stream was lotheir schooner enterprise. But the cated. The surface of the mountain was then cross-sectioned, levels run, and finally a spot was located under which the Vancouver was the only place where. certain necessary material could be had The surface of the mountain at that and therefore the ship builders in proand perfectly compact. Undeterred by such obstacles, the work was begun, and that these articles were wanted for a had been sunk about forty feet, it was ferry boat to be used on the Willamthen the patient toil was rewarded and the ette. To obtain cordage they induced gushing fountain in the bowels of the mountain was reached. The water was found to be in even larger quantity than was anticipated, and the work of utilizing rude farm harnesses. Governor from the bottom of the shaft in a notheast- McLaughlin became aware of the underhanded proceedings and refused fur-200 feet. It is about six feet high and five ther supplies, one of the young Americans, Henry Wood, remonstrated with The shaft leads forty feet in a direct the old gentleman, who told him, that vertical line from above to a double drift without papers be was hable to be ber into which the stream pours and con- captured as a pirate, adding "and how nects, in a direct line with the flow of the stream, with the tunnel of stone, which opens on the face of the mountain about become one? "Well, Governor" refifty feet below the top of the shaft. Imagine a mighty inverted "L" and you have a general aspect of the work. The leg is may keep your petty rigging. But the shaft; at the point where the leg inter-sects the arm is the roof of the chamber, into which the stream pours; the left arm represents the natural flow of the stream from the bowels of the mountain, and the right arm represents the tunnel into you all packing." It was now which the water will be conducted. The water is as clear as any mountain spring, absolutely transparent, and key cold. It in which condition he always stam-

which the water will be conducted. The flows quite rapidly, the dimensions being about four inches in depth and two and mered or repeated rapidly the same one-half to four feet in width. It describes a semi-circle at the foot of the shaft and then pours into the mighty man as your uncle is coming to this country. Who is it, Mr. Wood? What's his name, Mr. Wood? The scene is one of surpassing grandeur and was beautifully illuminated by Mr. should like to know him, Mr. Wood." Anderson with saturated cotton balls and colored lights. The chamber is domeshaped, fully 230 feet in depth. A huge bowlder was pitched into the inky blackness into which the stream poured and as he withdrew. Fortunately there seven seconds elapsed before it struck was present at that time in Oregon a bottom. It fell with a thud that was dis-tinctly audible above. Mr. Anderson suspended burning cotton balls in this cham- tenant Wilkes. The latter investiber, and it was lighted up brilliantly near the top, but all was inky black in the gated the matter and satisfied the top, but all was inky black in the fathomless depths below. The stream seems to flow tardily before it reaches this mighty subterranean precipice as if in horror and then dashes over the well-worn the young men received the requisite rocks, gurgling, hissing, and seething, and is lost in darkness. Explorers who have visited the cave and observed all this state complete their vessel to which they that the water is partially dissipated into mist before it reaches the bottom. One of gave the name of "Star of Oregon." the flaming balls was dropped into the chamber. It flared up the ceilings bespangled with diamonds, the walls which supported the mighty pillars and gigantic timber made a successful voyage to the columns were visible for a half second, and down, down went the flaming torch, hissing in the mist of the waterfall, turning sold and the proceeds invested in cattle and twisting in its terrible descent, until it which were driven to Oregon the next An expert in water-works, who there year by those of the navigators, who oughly understands its volume and velocoughly understands its volume and velocity, states that the flow of water from that had decided to return to the Willam-

stream alone will exceed 1,500,000 gallons ette valley for permanent settlement, stream has been discovered. It is the in-

tention of Mr. Anderson to tunnel to the SATURDAY NIGHT. cording to the estimate of the expert, that "Now fades the glimmering landscape on the sighs" would increase the total flow to 2,000,000 And all the air a solemn stillness holds

gallons daily. Steps will be at once taken to unite the streams. The tunnel will be And drowsy tinking fulls the distant fold" enlarged and cemented, and the flow of When Thomas Gray wrote those water diverted from its old channel into the mouth of the tunnel, and a reservoir lines he was thinking of rest, but he with 5,000,000 or 6,000,000 capacity will be was by no means resting, what would from the cave through twenty-inch mains have been rest to him at that time, would not be rest to many of us who toil in forest and field; outdoor exercise The best evening's exercise I know of for a man who likes to walk is a stroll is rest to the pale student, to sink into across the Brooklyn bridge and back. There is ozone enough in the trip to insure anyone a healthy sleep and an appetite for breakfast. It is about two miles over and miner; rest to a great extent depends back, with a superb track to walk on, and half the distance is a magnificent panorama. The river above the bridge, with its on excursions to the sea, and find it a wharf and ferry lights in all colors, clustering as close as fireflies, is like Venice at carnival time. The black harbor below others find a sweeter repose at home the bridge, with its glimmering ship's light here and there, is a mine of romantic mystery. New York itself, with the respite to many who dwell on shore, ghostly flimmer of the electric lights light-ing the sky over it, is another picture to while the very repose, that circumremain long in the memory. Still another scribes their vine-clad homes in an ismemorable one is the perspective of the land vale, is the sailors fondest dream. the huge cables and the interlacing sup- Do you know that rest often emanates ports and guy wires, all sharply outlined from the same source as toill do you in white against the black sky, converg-ing to the point of sight like an immense know that some branches of study are spider's web.—New York News "Babble." burdensome for some students, while the same studies are but recreation for One day recently a gentleman stepped into a Cincinnati hotel to make a call. He others? it is a fact. A providence of placed his umbrella in the rack before he an infinite nature that all should drink went up to the hotel parlor, but being of a facetlous turn of mind he pinned a card from the fountain of repose, no not ail, for there are a few who know not rest. "This umbrella belongs to a man who Byron says: "there are wanderers o'er Eternity, whose bark drives on and on He made his call, and when he returned and anchored ne'er shall be." Rest his umbrella, lo, it was gone. But in its place found a neat card, upon which was was the text from which the Rev. Mr. "This card was left by a man who walks twenty miles an hour. Will not return."— Cincinnati Times-Star.

Campbell preached in July, I thought then as I think now, 'tis a pleasant there's the card was left by a man who walks twenty miles an hour. theme for a short essay for Saturday Over 22,000,000 lobsters were captured Night.
