ROSEBURG REVIEW

FRIDAY, APRIL, 15, 1887.

COMMUNICATION.

WASHINGTON, March 28th, 1887.

Secretary Whitney has placed another brilliant feather in the cap of this Administration. Probably no Democrat, not even Samuel J. Tilden while living ever received such unstinted praise from the Republican press as has been showered upon him during the past week. Nothing has been done by any member of Mr. Cleveland's Cabinet since it was organized more calculated to win popularity than is the act of the Secretary of the Navy by which the work of fortifying our seaports and building ironclads is established on a solid foundation.

From every side his energy and sagacity is applauded, the work he has done to beguile bidders to accept offered terms, and the ability he exhibits in directing the general work of his Department. It really looks too as if the name of Mr. Whitney would be associated in history with the building of the American Navy. The response to him was so prompt that the work of fitting up the Washington Navy Yard as an ordinance factory for the assembling and completion of heavy guns and steel forgings, will be begun soon and rapidly carried forward. Needless delays can be avoided because it is shown that the gun forgings and armor plates can be furnished in a much shorter time than was supposed.

For more than eighteen months Secretary Whitney has been industriously devising the means that make success possible. He has been studying the conditions of the problem—determining the needs of defensive armor gauging the impact of projectiles, fixing on tests by which the Department will be governed, and making the inducements as attractive as possible.

Since all the iron foundries of the country are pressed with unfulfilled engagements for months ahead, at high prices, some surprise was expressed that there should have been a single bid for the millions of dollars worth of work that was proposed. But the proprietor of the Bethlehem company foresaw that the boom would not last, and that it would pay to work for Uncle Sam even on more reasonable terms, because his job would last for a decade or so, both summer and winter, and his pay is sure.

It is to be hoped that there will be no more lamentations for the present over the failure of the Naval bills. At least Secretary Whitney is satisfied with the outlook. He says the problem which puzzled everybody is solved and that the work of fortifying coasts and equiping ships is in just as good shape as it would have been if the Senate bills had become laws.

Since I wrote you the long discussed Inter-State Commerce Commission has been completed, announced, commented upon, approved—and now it is about to organize and go to work. The five lawers composing it, and who represent the States of Alabama, Illinois, Michigan, New York and Vermont, are practically placed in charge of private property valued at about seven thousand dollars. This tremendous responsibility is greatly increased when it is remembered that almost the entire internal commerce of the country is affected by the action of this new court.

No one doubts the honesty of the members of the Commission, and they are all conceded to be men of ability, but their labors will be complex and comprehensive, the new law is a vast problem; every feature at its operations more or less perilous, and whatever is done, the Commission will be criticised and opposed on every side. The railroad men, shippers and travelers, producers and consumers are waiting to pour complaints, queries, communications and requests by the thousand upon the Commissioners as soon as they are ready to receive them, and will make their lives burdensome, of course.

The effect of the new law upon this city will be pronounced. Practically it gives the Capitol a new Government Department. A large and important bureau will be organized at once, a large clerical and official force will be appointed by the Commission, legal and other representatives of all the railroads in the United States will be drawn here, besides thousands of people interested in questions brought before the Commission. Altogether it will add greatly to the activity of the coming summer in Washington.

A couple of visitors from a rural district in the House gallery were trying to pick out their member on the floor. "I can't distinguish him," said one, after a hopeless visual observation. "Of course not" was the honest reply "He can't even distinguish himself."

We, too, are posterity, though meb. by we don't realize it as we ort to.

When a man offers you a business worth a million a year for $100 take it. The experience will benefit you.

Ticket Agent: "You don't expect those two boys to go on one ticket?" She: "Of course I do. It's a twin.'

Pernicious egotism is another man's desire to tell you about himself when you wish the floor to tell you about yourself.

Bucklen s Arnica Salve.

THE BEST SALVE in the world for Cuts, Bruises, Sores, Ulcers, Salt Rheum, Fever Sores, Tetter, Chapped Hands, Chilblains, Corns, and all Skin Eruptions, and positively cures Piles, or no pay required. It is guaranteed to give perfect satisfaction, or money refunded. Price 25 cts per box.

DEATH IN THE WATER!

IS THE ELEMENT WE DRINK DECIMATING THE PEOPLE?

How a Universal Menace to Health May Be Disarmed.

A few years ago the people in a certain section in one of the leading cities of the State were prostrated with a malignant disease, and upon investigation it was found that only those who used water from a famous old well were the victims.

Professor S. A. Lattimore, analyst of the New York State Board of Health, upon analyzing water from this well, found it more deadly than the city sewage!

The filling up of the old well stopped the ravages of the disease.

Not long since the writer noticed while some men were making an excavation for a large building, a stratum of dark colored earth running from near the surface to hard pan. There it took another course toward a well near at hand. The water from this well had for years been tainted with the drainings from a receiving vault, the percolations of which had discolored the earth!

Terrible!

A similar condition of things exists in every village and city where well water is used, and though the filtering which the fluids receive in passing through the earth may give them a clear appearance, yet the poison and disease remains, though the water may look never so clear.

It is still worse with the farmer, for the drainage from the barn-yard and the slops from the kitchen eventually find their way into the family well!

The same condition of things exists in our large cities, whose water supplies are rivers fed by little streams that carry off the filth and drainage from houses. This "water" is eventually drunk by rich and poor alike with great evil.

Some cautious people resort to the filter for purifying this water, but even the filter does not remove this poison, for water of the most deadly character may pass through this filter and become clear, yet the poison disguised is there.

They who use filters know that they must be renewed at regular periods, for even though they do not take out all the impurity, they soon become foul.

Now in like manner the human kidneys act as a filter for the blood, and if they are filled up with impurities and become foul, like the filter, all the blood in the system coursing through them becomes bad, for it is now a conceded fact that the kidneys are the chief means whereby the blood is purified. These organs are filled with thousands of *hair-like tubes* which drain the impurities from the blood, as the sewer pipes drain impurities from our houses.

If a sewer pipe breaks under the house, the sewage escapes into the earth and fills the house with poisonous gas; so if any of the thousand and one little hair-like sewer tubes of the kidneys break down, the entire body is affected by this awful poison.

It is a scientific fact that the kidneys have few nerves of sensation; and, consequently, disease may exist in these organs for a long time and not be suspected by the individual. It is impossible to filter or take the death out of the blood when the least derangement exists in these organs, and if the blood is not filtered then the uric acid, or kidney poison, removable only by Warner's safe cure, accumulates in the system and attacks any organ, producing nine out of ten ailments, just as sewer gas and bad drainage produce so many fatal disorders.

Kidney disease may be known to exist if there is any marked departure from ordinary health without apparent known cause, and it should be understood by all that the greatest peril exists, and is intensified, if there is the least neglect to treat it promptly with that great specific, Warner's safe cure, a remedy that has received the highest recognition by scientific men who have thoroughly investigated the character of kidney derangements.

They may not tell us that the cause of so many diseases in this organ is the impure water or any other one thing, but this poisonous water with its impurities coursing constantly through these delicate organs undoubtedly does produce much of the decay and disease which eventually terminate in the fatal Bright's disease, for this disease, alike among the drinking men, prohibitionists, the tobacco slave, the laborer, the merchant and the tramp, works terrible devastation every year.

It is well known that the liver which is so easily thrown "out of gear" as they say, very readily disturbs the action of the kidneys. That organ when deranged, *immediately* announces the fact by sallow skin, constipated bowels, coated tongue, and headaches, but the kidney when diseased, struggles on for a long time, and the fact of its disease can only be discovered by the aid of the microscope or by the physican who is skillful enough to trace the most indirect effects in the system to the derangement of these organs, as the prime cause.

The public is learning much of this subject and when it comes to understand that the kidneys are the real health regulators, as they are the real blood purifiers of the system, they will escape an infinite amount of unnecessary suffering, and add length of days and happiness to their lot.
