FREEDOM'S DAY.

The Celebration of the Glorious Fourth. A GRAND SUCCESS. BIG PROFESSION—ELOQUENT ORATION—BEAUTIFUL SINGING, ETC.

Roseburg celebrated the Fourth of July this year in an appropriate manner. The weather was all that could have been desired and could not have been improved...

The celebration commenced with the grand street parade under the management of the marshal at the Day, C. L. Hadley, ably assisted by lieutenants. The procession was formed at the Court house square and was led by the Junior band, all dressed in their fine new uniforms...

Following the Liberty car, with Miss Julia Hamilton as fair Liberty's Goddess, and Miss Grace Howard as the Angel of Peace, surrounded by thirty-eight little girls representing the different states of the Union, after which came the gaily decorated hook and ladder truck and hose cart. Then the carriages, citizens on horseback, and those who made up a load and went about, brought up the rear...

The beautiful group had been arranged for the Liberty exercises and with the hook and ladder truck, lemonade stand, and the traditional forefinger, sandwiches, etc., were dispensed, presented a gay appearance. Promptly at 10 o'clock, Hon. E. G. Harsh, presiding the exercises of the day commenced, the band playing an appropriate selection and the choir singing "America" after which Rev. J. W. Miller delivered a prayer full of earnest sentiment...

The Declaration of Independence was then read by S. F. Floss, the choir singing "The Star Spangled Banner," and then Hon. La Fayette Lane was introduced as the Orator of the Day. Mr. Lane is too well known as an orator of distinguished ability to need any eulogium at our hands, and we are only sorry to say that as he delivered his speech from notes only THE REVIEW cannot publish it in full as was requested by many. Suffice it to say that the oration was one of the most stirring and eloquent ever heard in our city...

At the close of the oration, the band played "The Star Spangled Banner," and then Hon. La Fayette Lane was introduced as the Orator of the Day. Mr. Lane is too well known as an orator of distinguished ability to need any eulogium at our hands, and we are only sorry to say that as he delivered his speech from notes only THE REVIEW cannot publish it in full as was requested by many. Suffice it to say that the oration was one of the most stirring and eloquent ever heard in our city...

GENERAL TELEGRAPH NEWS.

POORER PROSPECTS. The Chicago Daily-Tribune... CHICAGO, July 3.—The following crop summary will appear in this week's issue of the Farmer's Review...

CHICAGO, July 3.—The following crop summary will appear in this week's issue of the Farmer's Review. Reports on the yield of the winter wheat crop are now coming in and thus far corroborate our previous statements as to a shortage that might be expected...

MISSOURI leads in her average, and is followed by Illinois, while other states have the following relative position: Kentucky, Michigan, Indiana, Ohio and last Kansas, where such reports on the average yield of the winter wheat crop are just beginning to come in, but the following from different states probably furnishes a correct indication of final results of the harvest...

Twelve counties in Illinois report the average seventeen bushels and four counties place the average condition 78 per cent; nine counties in Indiana place the average at fourteen bushels, and three counties an average of 70 per cent; seven counties in Michigan report an average yield of fifteen bushels; eleven counties in Ohio report a yield of thirteen bushels, while five counties report a condition of 85 per cent; the yield in twelve Missouri counties is eighteen bushels, and the condition in three is 105 per cent...

As was expected, the hay crop turned out light, and pastures were nearly everywhere dry. Prospects for the crop of apples in the West are fair to middling. In many places fruit is dropping from the trees.

A MAN DROPS HIMSELF OUT OF A BALLOON AND COMES DOWN AT RIGHT. QUINCY, Ill., July 5.—At the much talked of leap from the balloon made by Prof. Thomas P. Baldwin at the fair grounds near this city to-day, over 20,000 people witnessed the performance, which was very daring. Baldwin ascended to a height of one mile, and then, holding his parachute, launched himself into space. The parachute was eighteen feet in diameter, and made of cord and strong silk. When the jump was made it was closed, and the first two hundred feet the aeronaut dropped like a rocket. Then the parachute expanded, the descent became less rapid, and the aeronaut and the strange apparatus floated steadily down like a bird. It was a grand sight. The descent was accomplished in three minutes and twenty seconds. Baldwin struck the ground with some force, but not enough to injure him. The descent varied about a quarter of a mile from vertical, and the professor struck the ground about a mile and a half from where the ascent was made. His attempt to collapse the balloon when jumping failed, and it soared away skyward when released of his weight. He made a similar leap in California last winter, the distance being 1,000 feet.

NEW YORK, June 30.—Hamilton Fish died to-day after a long illness. (Hamilton Fish was a native of New York, born in August 1808, and had therefore nearly attained his 79th year. He was a graduate of Columbia college, represented New York in congress from 1843 to '45, Lieutenant-governor of that state from '45 to '49 and governor from '49 to '51. Was in the United States senate from '51 to '57. Was a member of the commission sent to visit soldiers in Confederate prisons in 1862 and performed valuable services in negotiating for an exchange of prisoners. Was secretary of state under President Grant and rendered efficient service in settling the Alabama claims. He was a man of much culture, and his integrity as a statesman is unimpeachable.)

AN ENTHUSIAST'S SHIP. WASHINGTON, June 30.—A circular has received at the navy department from a Chicago man announcing that he had solved the problem of aerial navigation, and is about to build a great air ship, which will start on January 1st of the new year, on a voyage to the north pole. He estimates that a month's time will suffice for the voyage, allowing ten days or two weeks for scientific observations of phenomena. The ship will carry 200 persons, and travel at a speed of seventy miles an hour. The inventor undertakes to carry with him representatives of the press and scientists. The essential feature of the discovery consists of a great cylinder built of thin plates of steel, to which a passenger car is attached. For ascensional force, instead of a partial vacuum is used, and eight exhausting gear propellers, driven by electric secondary batteries, propel the craft.

Dying Like Flies. NEW YORK, July 3.—Diphtheria was never so prevalent here in June as in last month. There were 521 cases and 216 deaths, principally among the tenement children. Impure fact ventilation and defective plumbing are held responsible. There have been 16,312 deaths in this city this year so far, against 17,581 the first half of 1886. Measles is chiefly responsible for the increase.

256 DEATHS YESTERDAY. NEW YORK, July 3.—Deaths reported to the health board to-day number 256. This is the largest figure for one day since 1876.
