Allen's wound is not necessarily fatal.

VILLARD'S AGGRESSIVE POLICY. HELENA. Mont., Oct. 24 .- It is given out from official sources that as Henry Villard has once more secured control of the Northern Pscific he will adopt a much more aggressive policy toward competing lines, especially the new Man-itoba-Canadian Pacific combination. It is the intention of the Northern Pacific to watch every move of the Manitoba, and if it cuts into the Northern Pacific territory, to at once take retaliatory steps. It is said this will be done to the extent of paralleling every mile of road owned by the Manitoba. Arrangements are already made to build into the Red river country the moment the Manitoba is headed for Northern Pacific territory west of Helena across the border line. PHILADELPHIA, October. 24.—Claus Spreckles intended to begin work at his big refinery to-day, but, owing to the bad weather and other causes, he was prevented from doing so. Active ope tions will propably begin next week.

Spreckles is confident that he will win the fight against the sugar trust. "I will produce 1,000,000 pounds of sugar per day at the start," said Mr. Spreckels "By February 2,000,000 pounds a day will be turned out. I have decided to double my plant, and when the new buildings are finished, as they will be before the end of next year I will produce 4,0000,000 pounds a day. New Orleans will be the next objective point. A refinery will be built there with a capacity of 1,000,000 pounds a day, and when I have doubled my plant here, I will produce 6,000,000 pounds of sugar per day. The trust produces 8,000,000 ounds a day, so when I get fully started I shall turn out three-fourths of the entire product, and I shall sell it too."

PENNOYER'S RAILROAD. WASHINGTON, Oct. 24.-Governor Pennoyer's plan to construct a portage railroad at The Dalles, instead of a boat railway or canal and locks, has been received, and is being somewhat discussed here. Being asked his opinion of the subject, Senator Dolph said it looked as if the matter was to be made a politi cal hobby and ridden to death; that the delegation in congress were united in their efforts to secure the removal of obstructions at this paint by some speedy and proder method; tha they had succeeded in getting an appro priation for the examination of the river at this point by the board of engineers, that the board consisting of some of the most eminent engineers of the army which was appointed a year ago, exam ined the obstructions, surveyed the river and under directions of the secretary of war had since visited England and France to examine similar works; that Col. Men lel was now in San Francisco engaged an comparing the report, which he was as-sured would be ready before the meeting of congress, and that he believed it would be in favor of the boat railway that the governor had first advocated boat railway, but in a recent speech be fore the waterway convention at Port-land had advocated the canal and locks, and was now advocating the ordinary standard gauge, portage railway, which would necessitate the handling of freight twice, and would be operated when there were appropriations for that purpose, and stopped when there were none; that he (Senator Dolph) did not believe there was anything in the governor's statement that boats which could navigate the Upper Columbia could not navigate

Paper Currency in China. The first attempt at paper currency in China of which any record remains was

in A. D. 806, says the Nor.h China Daily News, when bills of exchange were called "flying money." Merchants in the capi-tal could by an ordinance then first made receive government bills in return for the laxative principle in Joy's Vegetable Sarsaparilla merchants' copper money. On arrival at any provincial capital they could receive A communication was read from Donald effect, is effective and absolutely safe to be taken stated on the bill. There was a return to facility offered to the merchants by the government, about the year A. D. 960. A bureau was instituted in Kai-feng-fu, then the capital, for the transaction of this business. In 1023 Szechnan and the same transaction of th this system, which was a sort of banking

sprang up among the rich merchants and was accepted by the government, and the merchants conducted the business. The limit of capital represented by the notes was 1,255,300 strings, a string being 1000 copper cash. In A. D. 1150 the Golden Tartars had just conquered North China, and about this time they adopted a currency in paper because they found copper scarce. Copper, silver and gold have always been chiefly found in South China. A North China kingdom finds it convenient to use paner so far as possible to preveut its being dependent on a southern neighbor. From this time forward, dur ing a century of the Golden Tartars and another century of the Mongol domina leader Matt. Harris. tion, strenuous efforts were made to maintain a paper currency.
