THE HOLY WAR IN CANADA. OTTAWA, Ont., Feb. 14.-The political situation in Canada is alarming, and un-less active measures are taken immediately by the government to divert public attention from the French question the results may be disastrous. The introduc tion in the commons yesterday by Dalton McCarthy of a bill abolishing French as McCarthy of a bill abolishing French as the official language in Canada, was the signal for the fiercest opposition from the French members on both sides of the house. Sir Hector Langevin, minister of public works, made a strong speech against the bill, and characterized McCarthy as a fanatic of the worst type. He said the French in Quebec would pro tect their rights at the point of the bay-onet. Charlton, Protestant, said the minister's remarks should not be toler-

uted in a British country. Excitement luring the session ran very high. MORPHINE WAS HIS FOOD. TACOMA, Feb. 14.-E P. Griswold was ound lying in the Beehive lodging house o day, unconscious from the effects of in overdose of morphine. In the man't irms was a glass water-pitcher, empty and by his side was found an empty morphine bottle. Life had been extinct only a short time, as the body when ex amined was still warm and limp. Among the man's effects were found in his pockets five empty one-eighth ounce sulphate of morphia bottles, an empty whisky bottle, beside letters, papers, a gold watch, and about \$8 in cash. Under the bed were five boxes, each containing twelve bottles the same as those found in the man's pocket, but only six or seven were empty. The body of the dead man showed the effects of the habit he was a slave to. In his pockets were

ound papers and letters that fixed his identity beyond a doubt. GOLD BONANZA IN CHINA. CHICAGO, Feb. 14.-A conference great importance was held to-day be-tween two Chinese dignitaries and representatives of the big mining company muchinary firm of Fraser and Chalmers of this city. The result was that negotiations were formally entered into looking to the construction of a 300-stamp mill for the mountains of China. The magnitude of the deal may be understood that the mills, set up complete, will cost nearly \$400,000, this including transportation, labor, etc. The Chinese informed them that there had been discovered the richest and most extensive gold-bearing lead in the world. The Chinese for many years have known that the mountains of Tai-Shan, in the province of Shan Tau contain gold, but not until a year ago did they realize the extent of it, when some one who had worked in the mines and mills in California began prospecting and discovered a bonanza, erected a rude mill and from the outset the product of gold was enormous. The county court in session to day spent he greater portion of their time in estinating the loss to bridges, approaches and culverts in Marion county by the ecent flood. They examined severel bridges yesterday, and, excepting the big bridge across the Willamette at Salem, place the damage sustained by Marion county at \$25,000; that is, this sum will be required to place the bridges and culverts of the county in as good a condition as they were before the flood.
