WORK OF THE TORNADO. AKBON, O., May 11 .- Darkness set so soon after the tornado tore through the southern part of the city on Saturday evening that not half an idea could be gotten of the fierceness or extent of the terrible storm. It moved in an almost straight line throught the well-settled part of the city, and there is scarcely a foot of the mile and a half but is strewn to-day with splintered house timbers, broken furniture, uprooted trees and leveled barns and outhouses.

In a trip over the storm's path to day nineteen dwellings were counted, ripped into kindling wood or so badly wrecked that they cannot be occupied. Twenty families, numbering about seventyfive persons, are out of house and home and are sheltered by friends. Of eighteen persons injured, all will probably recover. Seventy-five buildings, including residences and barns, were iamaged by the wind, and not one escaped that was in the direct line of the torando. Uprooted trees were counted by scores. Outhouses, in some cases, were transplanted from fifty to 100 feet

and set down in neighboring yards. Thousands of people visited the scene of destruction to day. In several church es relief papers were started and several thousand dollars will be raised for the mmediate wants of homeless people. William Poole and daughter, who had just driven into their barn, were caught o the bottom of the hill on which it stood. That no lives were lost is most wonderful. In many instances families escaped by taking refuge in cellars.
