SHIP-BUILDING YARDS.
NEW YORK, June 27.—A company of
British capitalists has been formed to con-
struct a great ship-building yard and
engineering company (limited). The
preliminary prospectus sets forth that
the shares of the capital will be £200.
In addition to the shares of capital debenture,
a capital of £200,000 is provided for
the amount of several thousand dollars
will be advanced to the British govern-
ment by the name of John B. Roach,
president of the Chester Works; George
E. Wood, president of the Morgan Iron
works; Henry Stens, president of the
Eleventh Ward bank, and William Row-
land, of the New York City National
Bank of Commerce, are named as the bank-
ers of the new corporation.

CAMPBELL DOYLE CAPTURED.
NEWBURGH, N. Y., June 29.—Rounds-
man Hanson, of the Newburgh police,
and Detective Day, of Portland, Or., to-
night arrested at his home in this city,
Edward M. Doyle, who is wanted in
Oregon for grand larceny. Doyle is a
carpenter and had contracted to construct
the building for the St. Mary's church con-
gregation at Beaverport. He secured the
payment on the bishop for an advance
order, and after defrauding others to the
amount of several thousand dollars, he
came to his home in this city, where he
has a wife and two children. It is said he
recently married another woman in
Oregon. Doyle has been here for several
weeks. His mail was addressed to
Edward L. Monroe. To-night Doyle says
the only thing on which he can be held is
the fact that he did not use all the money
received on the house for which it was
drawn.

A MYSTERIOUS HOMICIDE.
SPOKANE FALLS, June 29.—A very
mysterious homicide occurred in the
outskirts of this city on 10'clock to-night.
At that hour Peter M. Johnson, a Dane,
25 years of age, accompanied by John
Robinson and George Peterson, fellow
countrymen, were wandering their way to
their cabin on the outskirts of the city.
Johnson's companions, who were walking
one on each side of him were suddenly
startled by hearing a shot fired. At the
same instant Johnson fell to the ground
in the forehead. Death was instan-
taneous. Two men were seen to run off in
the darkness at the fall of the shot, and
one under the influence of liquor, and
that it hit Johnson by accident. At mid-
night the police had made no arrests.

BRUTAL TREATMENT OF COLORED PEOPLE.
NEW YORK, June 29.—A negro from
Batavia, N. C., to the Herald says:
William Hill and a party of negro "con-
tractors" who left New Haven county
for Arkansas, have just returned. They
make affidavit as to their treatment there,
and their story is a horrible one. There
were 600 in their party, and all had been
promised good wages. They were virtu-
ally sold to a labor contractor, who, when
he was notified by negroes that they
would not work for 50 cents a day, said
that was all he would give. He seized
their personal effects. Some families
were put in horse stalls and others in
old outbuildings, while some had to re-
main on the banks of the river. All were

TELEGRAPHIC

A THIRN RUNAWAY.
LA GRANGE, June 27.—A BRAWF escape
from what might have been a serious
accident occurred on the Union Pacific
on the Union hill this afternoon. The
west bound fast mail being a little behind
time was trying to make it up, and the
air brakes failing to work properly the
train got under the control of the
engine, and the speed was soon increased
to about sixty miles an hour. When go-
ing at the highest speed the cars were
swaying and it was expected at every
moment all would go into the ditch. On
going into a snowed the corner of the
Colombia's chair car struck the shed, and
it is believed that alone prevented the
ditching of the whole train. During the
few miles of the runaway the scene in the
car was quite similar to that on board a
ship during a storm. Fortunately the train
was hurt, but all most terribly fright-
ened.

PROBABLY DROWNED.
ALBANY, Or., June 27.—Roscoe Gos-
tending the electric light station in this
city, and two small boys went out boat-
riding this afternoon, intending to stay
but a little while. Not returning in time
to supper, the boat became unmanageable,
and a searching party started out on the
river, where it was supposed they were
lost in the woods gathering blackberries.
The river was in flood, and it was ex-
pected they had gone. About 10:30 one
of the searching parties found pieces of the
boat below the dam, and shortly after
went to the dam for as far safety would
permit, but could not discover anything
but the remaining portion of the boat
floating up the river. The bodies of the
two boys were found on the dam, and
also a dog not far from the dam. A visit-
ing him, Charles T. McFarland and
Young Mathews were about 9 years old
each.

DEMOCRATIC PROTEST.
WASHINGTON, June 27.—The Northern
Democratic members of the house have
prepared a formal protest against the
national election bill, which is termed "an
extraordinary, dangerous and revolution-
ary measure now proposed by the leaders
of the party in power." The protest
says:
If the power claimed by the majority
resides in the constitution, which we deny,
the republic has gone through difficulties
of the formative period and made a heroic
struggle against dissolution, and triumphed
and succeeded in reorganizing itself about
itself to the changed conditions about
the exercise of such a power by the
federal government for one hundred years
and over. The bill is purely a partisan
measure, intended primarily to control
the election of congress and the presiden-
tial election in all the states and to in-
timidate, bound and obstruct and harass
by political prosecutions in unfriendly
hands, the adverse party in the cities
of the North. To carry on this scheme of
imperial government millions of dollars
will be taxed from our people and the
judicial power of the United States will
be used to the basest partisanship in the
management of elections, and these in-
vasions of the liberties of our people will be left
safe to partisan federal courts, com-
posed entirely of men of the party in
power.

The protest appeals to American free-
doms of men, and to the voters, to visit
timely protest by the way of public meet-
ings or otherwise, against this consoli-
dation of government and destruction of
popular rights. It says: "The bill is a
measure to take away from the people the
American liberty, as this vicious and un-
parliamentary measure is a most serious menace
to the very life of the republic. The
issue is: Shall a political party, who
issue and keep in power by paid agents
who are to control political elections in
all the states?"

Nothing indicates more clearly the
modern progress of medicine than the
disappearance of the bulky and disagree-
able boluses, powders, draughts and
mixtures which the physicians of former
times administered to their patients, in
many cases with little effect except to
put an additional burden upon an
already wearied and overloaded stomach.
The modern physician, therefore, who
wishes to do good, will not attempt to
administer such a course of medicine as
that which is now in vogue. It is a well-
known fact that certain substances, when
taken in large quantities, produce certain
physiological effects. Thus, the use of
alkaloids produce sleep, ipecac causes
vomiting, opium is found to have a
great effect upon the brain, and so on.
There is really no difference between a
medicine and a poison, except in the
quantity and the time it is taken. The
physician, therefore, who wishes to do
good, will not attempt to administer
such a course of medicine as that which
is now in vogue. It is a well-known
fact that certain substances, when taken
in large quantities, produce certain
physiological effects. Thus, the use of

physician, therefore, who wishes to do
good, will not attempt to administer
such a course of medicine as that which
is now in vogue. It is a well-known
fact that certain substances, when taken
in large quantities, produce certain
physiological effects. Thus, the use of
alkaloids produce sleep, ipecac causes
vomiting, opium is found to have a
great effect upon the brain, and so on.
There is really no difference between a
medicine and a poison, except in the
quantity and the time it is taken. The
physician, therefore, who wishes to do
good, will not attempt to administer
such a course of medicine as that which
is now in vogue. It is a well-known
