Colonel Frank Parker, of the Walla Walla Statesman, began his newspaper career in the northwest as a correspondent during the Indian troubles along in the seventies. In the Nez Perce campaign he was attached to the staff of General Howard as courier and scout. One day at the end of a long ride, he was crossing the Yellowstone river near the mouth of Clarks Fork in Montana, and a rattlesnake bit him and he was soon being swept along by swift current. Fortunately he was carried near the bank where Howard's camp was pitched and he was rescued in an unconscious condition by some one.

After Col. Parker recovered he looked around for his breaker rescuer. James D. Grogan, late speaker of the house of the state, who was at that time also in Howard's command, modestly submitted to have his hand nearly wrung off and received the thanks of his grateful friend.

"Of that I am very sure," said the Colonel. "I'm not sure, but it was something to remind him in after years that I was not ungrateful."
