An insect destructive of our fruit trees is thus described in an horticulture month-ly: A brownish beetle, half an inch long coal predominates in this precinct. Coal shoth north and south of us. Mr. A. C. coal predominates in this precinct. Coal is both north and south of us. Mr. A. C. Hall brought some into town the other day which he obtained up Canyon creek. The coal is the same as that which Mr. Clark finds north of the river, and is a good quality of lignite.

Fish are said to be dying from the effects

branch is the place chosen for operations, and the beetle eats into the pith. The opening of the burrow always points upward and rainwater, lodging in the same, causes decay, or the branches break off when thus weakened. It is quite probable that the eggs of this species are laid before the mature beetle is seen at work on the twig, hence collecting and burning the infested twigs with the beetles would be like looking the door after the horse was stolen, locking the door after the horse was stolen, yet it would do no harm to take this latter precaution. As a preventitive spray the twigs, about the time the bettles appear, with paris green and water, that the insect

may be possoned when attempting to eat in-to the twig. If whale-oil soap is added to the paris green solution it would be bene-ficial in that it is obnoxious to the beetle, and would probably keep many away. The assessors of twenty-five counti es, out ment roll should show an increased number of swine. Feed them the refuse grain, and let us have home grown bacon and lard.

The assessment rolls to the secretary of the state, says the Stateman, and all show an increase over 1890, with the exception of Grant and Baker counties. The total rehead of swine. How are these to make a turns by the twenty-five assessors show a taste for over five thousand people since the day of miracles is past.

Council Proceedings.

An adjourned meeting of the council was for the thirty-one counties in 1890. From reports received, these countres will show an increase, and it is presumed the aggregate taxable property returned to the state board of equalization for adjustment and equalization at its December meeting will fall little short of \$130,000,000. After the

board have done their work, the governor secretary and treasurer will figure up the expenses, and make a levy of the Another misging man turns up in Union county, and the following particulars are learned from an exchange: A man named R. S. Whiteman has been missing from Elgin since the 14th of last month. He has a brother at Waila Walla, and all efforts to ascertain his whereabouts have proved futile. Whiteman is the man who had the contract for fencing in the railroad between La Grande and Elgin. There is no apparent reason why he should skip the country, and on the other hand he has a family living in Missouri and there is no apparent reason why he should remain. As is usual

in such cases there is a largely developed theory in some quarters that he got a big check cashed in La Grande, and was here followed up and murdered and robbed. beat' answering to the name of J. M. Hill, was arraigned in Justice O. P. Coshow's court on a charge of forgery. He waived examination and was held in \$500 bonds, in default of which he now occupies a berth in the county jail with gloomy prospects ahead. The circumstances are: Friday morning Hill presented a note for \$51 signed by Samuel Bryan, of Tangent, at the First National Bank and received \$30 thereon. It was soon discovered to be a forgery and a warrant was issued for his arrest, with the above result. He also obtained \$5 from Dr. G: W. Maston on a note for \$51 on E. L. Bryan, but the money was afterwards refunded on being confronted by the doctor and accused of his crime.

August, after considerable discussion about grading the schools of the county, a resolution was passed instructing the superintend ent to appoint two, who together with him shall constitute a committee of three to formulate a graded system for the schools Supt. Shelley and Profs. M. W. Smith and to be held sometime during the holidays.

The Democratic Caucus.

December 21st, 1891.

THE NEXT SPEAKER. Charles F. Crisp, of Georgia, is one of the most distinguished figures upon the floor of congress. He has been upon the floor of the house for eight years and has during all that time been an active participant in all its debates and actions. Last year he led the fight for the Democratic side in the contested election cases, having been formerly chairman of the committee on elections. He also, during a large part of the session, led the fight against the Reed's rulings, and made probably the best speech that was made combating them. Crisp is a strong orator, and his speeches upon the tariff question have always attracted attention. As a speaker he is sharp, snappy and aggressive, has made the rules of the house his particular study, and it

is pretty generally conceded that since the death of Mr. Randail and the elevation of Mr. Caritale into the senate, the ground a distance of nearly eight feet. and forcible an authority as he on ques-
