

From Wednesday's Daily. Mr. Davis, of Wapinitia, is in town today. A light foot covered the ground this morning. There is some excitement discernible in political circles. Mr. A. E. Lake, of Warrenton, came in town yesterday. Mr. James Sigman, a prominent citizen of Dufer, is in the city. Mr. A. Blumenthal, a merchant of Cascade Locks, is in town. Mr. Henry Hudson, one of the solid farmers of Dufer, is in the city. Hon. W. McF. Lewis, of Wapinitia, gave up a visit yesterday. Mr. Merrill Park, an attaché of the Oregonian, is visiting friends in the city. Mr. C. J. Bright, of Wasco, has been in the Dalles for the past two days. Mr. A. W. Branner, proprietor of the Frontview stage line, is in the city today. Mr. Kenneth McKenzie, of Cascade Locks, came up on the noon train today. Mr. Chas. Dehm, engineer on the Bonita, is in the city attending the sick bedside of his father. Mr. Paulson, a native of Denmark, was made a full citizen of the United States today by the county clerk. We are informed that Mr. W. B. McIntosh, a former citizen of The Dalles, is in the city, minister of New Wash. The eastbound passenger train due here at 12 midnight, did not arrive today this morning. The delay was caused by a burned bridge near Hood River. Blasting is heard in the direction of Rockland. It appears to be an attempt to blast a new road through the rocks, which, we hope, will be successful. A Republican club has been formed at Cascade Locks of over fifty members. Dr. Leavens is preparing a bill for the prospects for a good vote in June never better. Mr. Walter Mitchell declared his intention today of becoming an American citizen by renouncing his allegiance to the queen of Great Britain and Ireland before the county clerk. Mr. H. S. Sloughton, of Dufer, gave up a mission call today. He says the ground is in better condition than it has been for a number of years past, and a large acreage will be planted in grain than ever before. The air is balmy and spring-like, flower buds are in the sunshine on the hillsides, and all nature appears to be in harmony; but, nevertheless, the police court did this morning, and here are some of the cases. Yesterday afternoon, at Hood River, Alec Shutt, a bridge carpenter for the U. S. Railway, had the misfortune to break the right thumb midway while handling bridge timbers. He came to this city last evening and was attended to by Dr. Hugh Logan. The new system of waterworks, adopted by the water commission since the first of last September, displays considerable force, and with the aid of the water of the season begins, or the old wooden flume which conducts the water into the reservoir breaks down by accident or by neglect. At the Odell school house, near Hood River, Rev. Troy Shelley, after giving a mission service Sunday evening, performed the marriage of Miss Leila Kemp and Mr. C. O. Odell. The bride and groom are well known in Hood River, and have the best wishes of the community in their new relation in life. The delegation from the interior precincts, who have been in town for the last two days, circulated their petitions among the business men today, and received very liberal contributions. They appeared before the county clerk, and \$500 was granted for the purpose of constructing a grade up Tygh hill. In all the amount will reach \$5000 and, it is expected, this will be sufficient to build a good road over this place. Arlington Record: The city council have contracted with parties to lay out a large tract of land in the city, and to rip up the sand banks west of the city, as a means of stopping the drifting sand. The railroad company will be paid for the work, and the material will be hauled at the Willows. It is thought this arrangement, together with planting the sand in the middle of the road, will solve the problem of our sand troubles. Albany Herald: The crop outlook in this county and the Willamette valley is excellent for a bumper yield. The acreage of fall grain is nearly equal to that of 1921, while a phenomenal crop was produced. A mild winter, the almost total absence of freezing, and the recent fine weather, have all combined to outlook most favorable, and will result in a large acreage of spring grain. More wheat and less oats are being sown this year than formerly. The following is contained in the Washington dispatches to-day: Senator Delp's bill passed the senate for the relief of John W. Lewis, of Oregon. This bill compensates Mr. Lewis for his services for the period from April 7 to July 1, 1920, as registrar of the land office at The Dalles, during which period there was a vacancy in the office of registrar and no fees could be legally received, and therefore none were allowed to Mr. Lewis as compensation, although he was diligently occupied by the duties of his office. Some time ago school district No. 8 in Astoria was divided by School Superintendent Shelly, on the basis of the number of taxpayers. His decision was appealed to the state superintendent, and his action sustained by that official. The matter is now brought into the circuit court by allegation of parties that the petitioners were not taxpayers and praying that the action of the superintendent be set aside. Mr. Shelly and the petitioners are made defendants in the case. Albany Herald: Mr. O. A. Archibald, cashier of the Lion County National Bank, had the misfortune Sunday, while returning from Corvallis in a buggy to meet with a serious accident. The vehicle was overturned on high grade and rolled down an embankment of about 20 feet. The horse sprang upon Mr. Archibald's head, making a deep laceration. He succeeded in extricating himself and horse and drove to this city, when physicians treated the wound, but he was confined to his room for some time. John Day Sentinel: Water in the Frazer river above Yale Canyon is lower at present than in the memory of the oldest Indian. The receding water left the sandbar exposed last week, which is about two acres in size. The bar had no sooner appeared than a number of Swishes went over and prospected it, with the result that good pay was found. This created some excitement among the Indians, and some fifty swishes are now hard at work on the bar, expecting big wages. As high as \$100 a day has been washed by some of them, and the gravel it is said would yield rich returns means were at hand to work it scientifically. Salem Statesman: A meeting of the asylum board was held yesterday afternoon at the state house. Superintendent Rowland, of the insane asylum, made his monthly report, of which the following is a resume: Number of inmates Jan. 31, 1922—males, 513; females, 230; total, 743. Number received during February, 1922—males, 14; females, 8; total, 22. Number under care and treatment—males, 527; females, 238; total, 765. Number discharged, 12; total, 12. Number patients receiving medical treatment—males, 519; females, 234; total, 753. Average number daily, 747. There were no escapes. The doctor is making preparations for an immense harvest on the asylum farms the coming season. Baker City Revue: Two men John Scott and Henry Wilson were arrested at Huntington on Saturday, having been engaged there in disposing of jewelry which was correctly supposed had been taken from the Athena drug store. Wilson was

Unitarian and confined alone in the jail at Huntington. Sunday last he made his escape. Some time ago on the outside of Liberty, but at deputy sheriff charged that way just as the prisoner was making tracks for freedom and collared him. The officer remarked: "Let go, or I'll wig you." He had the drop, and the officer released him, but he was soon after followed and recaptured at the point of a Winchester. Baker Democrat: Monday night a messenger from Auburn arrived in the city about 11 o'clock bringing the intelligence that Mr. F. S. Harrison, husband of Mrs. S. Harrison, minister of this city had been found dead in his cabin and all evidences of a struggle had been committed by shooting himself. The victim of his own self-destruction is about 60 years of age, and for the past year has been developing a quartic claim on Willow creek, head of Rich Flat, three miles from Auburn, one mile from where the Cascade Falls murder occurred about the year ago. The unfortunate man has long been a sufferer with rheumatism and with declining years, with loneliness surrounding him and other reminiscences bringing a vivid mirror to his gaze, he evidently made his final decision. His life was hardly worth living for and the best way out of it was to take his chances with the many who have left this world. Statesman: The price of mutton now in San Francisco is from two to five cents a pound higher than elsewhere. The price of beef in Chicago, and in Portland, in Salem it is the same price as beef, but the butchers are said to make as much profit on it here as beef. This is caused by two things. First, by the scarcity of mutton, due to the relatively small number of sheep, occasioned by hard winters, the sheep tinker, and for other reasons, among them the cutting out of the rangers. The other reason for the high price of mutton is the fact that the people here more generally learned to like and eat it, and no doubt this appetite will grow with the improvement of the breeds and methods of caring for the sheep. The people of this section, however, are said to be more particular than ever before, and better ones, should be encouraged by these facts. The number of sheep in Fresno county, California, in 1880 was 750,000 head. It is now less than 500,000. In Douglas county, in this state, the number has decreased in the same time. From Thursday's Daily. Next Thursday is St. Patrick's day. Mr. Frank Kincaid, one of the county commissioners, is in the city. Mr. Leslie Kuaga, of Riparia, Wash., is visiting friends and relatives in this city. Dr. H. S. Sloughton, of Dufer, is in the city, in attendance on the county clerk. Henry McNulty was in the city during the week from Mosier to celebrate his birthday. In every portion of the county farmers are busy plowing, and large areas of ground are being prepared for grain. The Registrar arrived at her what last evening contrary to expectations. It is now stated that the boat will make daily trips hereafter. Hon. E. L. Smith, of Hood River, is in the city today. He is very much improved in health, and is said to be better than he has been for several years past. The Democratic club at Hood River held a public meeting last evening, and considerable interest was manifested in the proceedings. Address were delivered by Mr. C. G. Roberts of Hood River, S. B. Adams of The Dalles and others. Mr. Geo. McNulty went to Fern Leaf farm on last Saturday to try a change for the benefit of his health. George has been sick since last August and came to The Dalles for medical advice, and thought a change would do him good. Mr. McNulty is in the city. He is en route to Salem to procure a requisition for a man named Smith, who is wanted for the crime of larceny from a warehouse. Mr. John Fahey, an old employee of the Union Pacific, who has been working for the railroad company for the past thirty years, is in the city. He has been in Portland for the past few days, and on his first visit he paid the Dalles for that length of time. Mr. Cyrus Walker passed through the city Monday morning on the Warm Springs steamer en route to Albany, where he is visiting his mother, who is very sick. Mr. Walker is a well known teacher at the academy, and receipt of the telegram came to the Dalles, and was just in time to jump on board the west-bound train. We were sorry to learn from Mr. C. W. Rice who returned from Wapinitia Tuesday that the railroad company will not carry and transportation free, and the material will be hauled at the Willows. It is thought this arrangement, together with planting the sand in the middle of the road, will solve the problem of our sand troubles. Albany Herald: The crop outlook in this county and the Willamette valley is excellent for a bumper yield. The acreage of fall grain is nearly equal to that of 1921, while a phenomenal crop was produced. A mild winter, the almost total absence of freezing, and the recent fine weather, have all combined to outlook most favorable, and will result in a large acreage of spring grain. Baker City Revue: Two men John Scott and Henry Wilson were arrested at Huntington on Saturday, having been engaged there in disposing of jewelry which was correctly supposed had been taken from the Athena drug store. Wilson was

County Court Proceedings. E. F. Sharp appointed surveyor and Thos J. Driver, Frank Gable and J. N. Moad, viewers of the new road, to meet at noon of Wednesday, March 15th. In the course of an examination of some of the differences of opinion, which are urged in different portions of the United States, why there should be no duty against the introduction into the country of foreign countries and why our ports and markets should not be free to all nations, the advocates of free trade have not hesitated to present assertions without proof, or facts, to verify their arguments against the protection or advancing American industries by reciprocity, or other judicial means advisable in some cases. One of the most untruthful and unscrupulous efforts now being urged by Democratic free traders in congress is the demand of the Democratic chairman of the ways and means committee by his bill, introduced a few days since, that all duty shall be removed from foreign wool and fibrous constituents of woolen goods. This practically brings the United States wool grower on a level with the wool grower of Australia, New Zealand, Cape Colony, New South Wales, and Buenos Aires, and make a good profit for less than such wool will cost here, making the wool grower a loser. The tariff which has been kept upon these foreign wools has allowed the American wool grower to sell his wool at a higher price, and to transport a handsome return for money and labor invested in the raising of his wool. The wool grower of the United States, who now produce the same class of wool can only lay it down from Australia, New Zealand, Cape Colony, New South Wales, and Buenos Aires, and make a good profit for less than such wool will cost here, making the wool grower a loser. The tariff which has been kept upon these foreign wools has allowed the American wool grower to sell his wool at a higher price, and to transport a handsome return for money and labor invested in the raising of his wool.
