At the next session of the legislature provision ought to be made for this work and the railroad should be built next year. But this will not be the final solution. Escaped From Jail. SANTA ROSA, May 2-Excitement was caused here by the discovery this morning that George W. Bruggy, a condemned murderer, who was to have been sentenced to-day for the third time, had broken jail. His escape is pronounced one of the cleverest on record. The bars in one of the round windows on the west side of the round windows on the west side of the outer wall were cut, leaving an open space large enough for the passage of a man's body. After passing through this opening a person would still be on the inside of the jail, but outside the main cage enclasing the cells. closing the cells. An entrance was made here by cutting off two flat bars forming a lattice and then the field would be clear for a person to go to Bruggy's cell and cut the screws to admit the sliding of the bolts. Whether the entrance was made from the outside in the manner described or from the inside, remains a mystery, The latter theory, however, is given color known as "Frenchy."
