# Baking Powder envied by all competitors.

The envy shown by other baking powder manufacturers of the great prestige of the Royal Baking Powder is not at all surprising.

For thirty years the Royal has been the standard for purity and strength in baking powders, and has been placed at the head by every board of official examiners-whether State or National. The Royal Baking Powder Company controls its own cream of tartar factory and the processes for making the only absolutely pure cream of tartar; it sends its product to millions of homes all over the world, supplies the Army and Navy, the great transatlantic steamers, the finest hotels and restaurants, and is recommended by the best chefs and authorities on cuisine in every land. Its sale is larger than that of all other cream of tartar baking powders combined; it has more friends among housekeepers than any other similar article.

These facts are bitterness to the makers of the inferior baking powders; hence their advertisements, filled with malice, envy and -falsehood, against the Royal.
