No town can derive benefit from misrepresentation or untruthful booms of worthless real estate. This has been demonstrated to be a fact in several instances, and the TIMES-MOUN-TAINEER has, on different occasions, painted such frauds in their true light. In this connection, we are glad to see the Hood River Glacier stamping out such a scheme in that neighborhood. From the following we should judge Hood River park to be another Rock land, alias North Dalles, alias Grand Dalles, on a small scale; "Maria Par ker is the latest victim on record of | carried out to perfection, and there was not the Hood River Park scheme, having the least unpleasant jar in the proceedings. purchased a lot from Bruce L. Carr. Hood River Park is situated about eight miles south of here on a dry ridge, and is worth the government price of land, if a fellow wanted it right bad. The price paid for recording the deed is at least ten times the value of the lot. That Hood River Park scheme was and is a detriment to this section, and the rascally fellows who engineered it should be prose-

The necessity of a well-disciplined present labor strikes. In Tennessee the band of desperate miners could have been easily routed if the state have been called into action at a moment's notice, and the reign of terror would long ago have ceased. A standing army, under control of a strong liberty in any country; but citizen factories. soldiers, who have an interest in the permanency of free institutions and artisans and merchants, who shoulder their muskets when the emergency arises to insure peace and maintain the supremacy of law.

the tariff measure. If this campaign Democratic demagogues would at-1861 to the McKinley tariff bill which passed congress in 1890. There is nothing too absurd for Democratic prints to claim, if by so doing they can make votes for Cleveland.

will have accomplished something beneficial to the world. Our grandfathers rode in stage-coaches and ing vessels. Our grand-children may travel over land and ocean in airships. Progress cannot be limited.

OROOK COUNTY.

well known breeders have already driven Cold Spring, will drive to California, whither he will be accompanied by Charley Jones. Sam Hodges and Pleas Cheney they hope to dispose of 100 head. Billy Doring goes with them. Besides the above M. Sichel & Co. will start 65 head to California in charge of Charley Helm.

Last Friday while Joe Ramus was grind struck him near the eye. Joe made the natural movement of raising his hand to the stinging spot, and in so doing turned or foreign market.

Thomas S. Lang, a noted western propartly away from the wheel without raising the other hand which yet held the tooth in place. This hand slipped and came in con-tact with the turning stone, which ground Good Hope or other foreign countries, but finger. The wounded members were dressed in oil and were doing nicety at last

"It never rains but it pours" was verified in portions of Crook county last week, when Gray Butte and followed along Pine ridge | want them to stand by you in the day of and the northern slopes of Grizzley. In the need." vicinity of the butte its waters covered formerly dry ground for a period of several hours, subsiding during the night. Fortunately there where no accidents to either man or beast, and the loss of property. while amounting to considerable in the aggreate, did not fall with great force upon any individual. Besides the damage re ported by our Haystack correspondent, we have learned of the loss of the county bridge at the Willow creek crossing where H. Cleek lost a part of his hay crop. Others on Willow creek also sustained some loss by the destruction of strips of their growing grain and by the damage done to fields and fences. From beyond Willow creek we have had no report, but presume that if any damage was done it will not likely exceed

AN OLD AND WELL-TRIED REMEDY—
Mrs. Winslow's Soothing Syrup has been used for over fifty years by millions of mothers for their children while teching the death warrant was expeditious and as painless as possible. In his description of the scene he said he never saw a man meet death so coolly and, apparently, with so little concern. During conversation he was pleasant and agreeable, and presented a fine believed in the concern. During conversation he was pleasant and agreeable, and presented a fine believed in the concern. During conversation he was pleasant and agreeable, and presented a fine believed in the concern. During conversation he was pleasant and agreeable, and presented a fine believed in the concern. During conversation he was pleasant and agreeable, and presented a fine believed in the control of the concern. During conversation he was pleasant and agreeable, and presented a fine believed in the control of th

appearance, being clean shaved except his ustache and dressed in a new suit of equainted with him, he would not be taken or the man who was soon to pay the severest penalty known to law. On the scaffold, Zorn maintained the same unconcerned attitude, and smilingly bid the sheriff and guards good-by. When he was mounting the scaffold, he recognized the undertaker from Walla Walla, who had come to take charge of the remains. In a full voice, with a smile on his face, he called out, "Hallo, Pickett, How are you." After the usual preliminaries and prayer by the attending minister the trap was sprung, and m a few minutes the soul of Frederick Zorn left its earthly tenement, Dr. Rinehart telt the pulse of the man, until they ceased to beat, and he positively asserts that there was not the least tremor in the body at any time. The execution of the warrant was

In the New York Commercial Advertiser, of Saturday, August 13th, is published an article descriptive of the wool industry in the United States, and the cuts illustrating it are from the photographs taken by Miss Lang of the process of baling wool at Moody's warehouse in this city. The following is the article:

To show that it is to the interest of the voters to cast their ballots in favor of the Republican candidates for national office, and thereby for protection for their homes. their happiness and every industry they are by any means instrumental in developing, militia in every state of the union was is the object of the American Protective never more apparent than during the Tariff League, whose orators have already taken the political stump and can boast of the fact that they are the first in the field. There are so many industries that should receive protection in the United States, and had well-drilled soldiers who could that emphatic protection, because protection means higher wages, better living, shorter hours and more freedom for the workingman, that it seems absurd to take up one phase of the mass of things that are prominently brought to the mind as the result of centralized government, is a menace to hard toil in the fields or in the busy manu-

There is one industry, however, that has been rapidly developing under the flag of protection, and hence is giving employment are versed in the manual of arms are to thousands, whereas under a free-trade great safeguards to the protection of government it would decrease, and thereby life and property. These are not fed knock out of work and place upon pauper's and clothed at the expense of the public; but are composed of mechanics, artisans and merchants, who shoulder of the masses who compose the immens

population of this country.

People who live west where the sheep are raised in herds, and people east who enjoy wearing the clothes their wool makes, after The McKinley bill has heavy burdens to bear if Democratic literature can be believed. Not only the strike at Homestead, the trouble in the Cœur d'Alene mines, the demonstrations of the approaches in San Francisco and the suprementation of the market from \$75 000,000 to \$90,000. ths newsboys in San Francisco and Portland are directly traceable to its provisians, but even the leasing of the convict labor by the Democratic legislature of Tennessee-which caused the trifle over \$2 each, to put a mild estimate miners to tear down the stockades and upon their value, or not less than \$100,000,f

annual product of mutton for food and the increase of the flocks in prosperous times were added to the value of the wool the total amount would exceed \$125,000,000. But the annual value of the American wool industry is not limited to the clip of wool or the increase of the flock or its contribution to the supply of animal food. Its value as a means of enriching the soil is recognized by intelligent farmers. The United States has been the second wool producing country in the world. Australia, with its vast area of unoccupied land, boasts of first place in this industry. The Argentine Republic ranks third, and there, it may be remarked, land is very cheap and so is labor. Russia comes in fourth with its boundless waste and semi-slave population. It is a fact which at once must arrest at-

A California balloonist has demonstrated the fact that he can control the action of his balloon by means of wings. If he can utilize his invention so that balloons, or something similar, can be used as a means of transit, he will have accomplished something pounds and imports more than 300,000,000 pounds. England uses less than 100,000,000 of her own and imports more than 200,000, 000 pounds. The United States, on the

The magnitude of the wool growing in-terest in one little section of the United states is given by the illustrations which States is given by the illustrations which accompany this story. They represent the interest in the valleys and upon the rolling plains and high mountain plateaus of Oregon east of the Cascade range of mountains. The pictures represent the largest of the wool shipping plants of The Dailes, Or gon, which have baled for forwarding this season more than five million pounds. The entire amount to go forward from this point will reach near six million pounds, which, added the country. It was cheaply built, but it cost nearly \$10,000, and accommo dated 80 guests. It was a landmark which could be seen clear across the gulf of Georgia. There was no insurance, and the building and furniture are a total loss.

Caught at Port Townsed. reach near six million pounds, which, added to the amount shipped at other outlets of the basin above the establishment of this product, the amount to go to the eastern markets grown in this great highland basin will reach more than sixteen million pounds. The pictures display the process through which the wool industry goes until it is put upon steamboat or railroad car for the home

tectionist, says on the wool matter:
"We do not wish to harm the wool growbelieve it is best for us to boil our own pot instead of that of foreign wool growers, especially when the woolen manufacturers of America feel that it is safest to defend away half the nail of the index he wounded members were oil and were doing nicefy at last although they were quite sore.

The growing of 16,000,000 pounds of wool in a year distributes food, light and comfort to an army of stout pioneers. Stand by them as disciples of Oregon industry and other states' industry and labor, as you want them to stand by you in the day of

Local Industry Called For.

THE DALLES, Aug. 20, 1892 Leading grocery reports in Boston, New erable call for concentrated fruit for home use and for shipment to foreign ports in pound packages. The American jams and marmalades are proving to yield the most exquisite flavor of our sun grown and ripened fruits of all kinds, plums, peaches, pears, apples, etc., and to be preferable to the same kinds manufactured from foreign fruits, and the extedsive factories just set at work in New Jersey are provided. work in New Jersey are proving a signal success. This is the line for our surplus fruit. With our facilities to produce fruit,

Water Measure.

COLFAX, Wash , Aug. 22, 1892. Editor TIMES-MOUNTAINEER: In the issue of the TIMES MOUNTAINEER

or August 20th I noticed with interest the claim of G. W. McCoy to 120 000 inches of water from the west fork of Hood river Not many days ago some one filed a claim for 200,000 "miners' inches" of the waters of Crooked river near Prineville. In yiew of the growing interest in irrigation for this semi-arid region I venture to give the equivalent of the miner's inch in other units Unless the size and shape of the orifice through which the water is to be measured, as well as the pressure or head, is specified, the miner's inch is as indefinite a unit as a jump would be for linear measure. "Even if the shead above the top of the orifice be fixed, and a flow of 144 miner's inch s be required, the volume obtained would be 3.3, 4.2, or 4.7 cubic feet per second, according as there were 144 holes each one inch square, Unless the size and shape of the orifice s there were 144 holes each one inch square, one openi g one meh deep and 144 inches ong, or one opening 12 inches square, the tops of all the openings being 5 inches be-low the surface of the water. This simply

By this standard the miner's inch is 1.5 foot." Let a miner's inch, thus defined, flow during the four irrigating months and the amount of land it will cover to the depth of 12 inches, or its "duty" is about six acres. The "acre-foot", or as the word indicates the amount of water required to cover an acre to the depth of one foot, is becoming a pop lar unit with ir igationists. The "second-foot", or one cubic foot per second, will remain, however, the absolute unit for gaugin: the flow of water.

CERTIFIED CHECKS.

Each bid must be accompanied by a certified check or draft upon some United States - coositor or solvent actional bank in the vicinity of the residence of the bidder, made payable to the order-of the Commissioner of Indian Affairs for at least five per cent of the amount of the proposal which check or draft will be forfeited to the United States in case any bidder or bidders receiving an award shall fail to promptly execute a contract, with good and sufficient strettles, otherwise to be returned to the bidder. Bids accompanied by a certified check or draft upon some United States - coositor or solvent stream of the bidder, made payable to the order-of the Commissioner of Indian Affairs for at least five per cent of the amount of the proposal which check or draft upon some United States - coositor or solvent stream of the bidder, made payable to the order-of the Commissioner of Indian Affairs for at least five per cent of the amount of the proposal which check or draft upon some United States - coositor or solvent stream of the bidder, made payable to the order-of the Commissioner of Indian Affairs for at least five per cent of the amount of the proposal which check or draft upon some United States - coositor or draft upon some United Stat Let a miner's inch, thus defined, One cubic foot per second equals: 2 acre other particulars, apply to et in 24 curs; 238 acre feet in 120 days; 7.5 gallons per second; 50 California inches; 38 4 Colorado inches. One miner's inch, as defined above, equals: 0 025 cubic feet per second; 16,000 gallons in 24 hours; 6 acre

Until the west fork of H od river has been carefully gauged I think it is doubtful whether its mean low water flow is 3000 second-feet or 120,000 inches. Should Mr McCoy and his associates succeed in diverting that amount of water from the natural channel of Hood river they will have an irrigating Sanal in size second to none in the United States, and water enough to cover every one of the 20,000 acres of arable land in Hood River valley to the depth of 36 feet in the four irrigating months. WILLIAM J. ROBERTS

feet in 4 months

TELEGRAPHIC NEWS.

Bullets are Fiving.

CHICAGO, Aug. 23 .- A special from Buffalo, timed 3:50 A. M., says since 2 1 M o'clock this morning bullets have been flying all over the freight yards and rumors of killing are prevalent all along the line and at every post. It is reported that a regular engagement took place in G w that a regular engagement took place in the Erie yards one mile from town, and | E P that four men were killed and two AF wounded. It is also said that one of the verify the rumor. Inquiry at the brigade headquarters brought the information that the news of the shooting had been received, but no details were obtainable At the police station nothing was known

THE TWELFTH REGIMENT ATTACKED. BUFFALO, Aug. 23 .- 4 A. M .- Au at tack was made on the Twelfth regiment soon ofter 2 o'clock by gangs of strikers within a stone's throw of the camp, biding under the cars and behind trucks, Most of the shots are coming from the direction of the Clinton-street crossing of the Nickel Plate. Captain Boylan is there in charge of Company K, of the Twelfth. There are tenements near the railroad and the people are all out in the streets. There is great excitement.

BUFFALO, Aug. 23, 5 A. M .- The latest report from the scene of the shooting is that four men have been killed and two wounded in one place in the Eric yard, a ber of other men have been wounded by the soldiers' bullets in other yards. The soldiers at Seneca street say that the men had been killed by the Seventy-first regiment. It is impossible to get by the guards within a mile of the Seventy first.

Big Fire at Blaine.

contrary, has increased its wool product from 60.000.000 pounds in 1860 to more than 300.000,000 in 1884, and supplies 30 national hotel was burned this afternoon. Ed. Jacobson, head sawyer in Caine No more complete demonstration of the necessity of protection to maintain and advance the American wool industry can be offered than the contract between the development of the industry in this country and its decline under the same exterior influence in Europe. A comparison of the average price of wool here and in Europe will confirm the statement. Excluding temporary and local effects the prices of United States wool as compared with prices of corresponding qualities in Europe bave uniformly been determined on the average by the rates of duty.

brothers' m ill, lost his life in the fire He went to a room in the third story to secure a trunk, which had already been taken out by a friend, and was overcome. A fellow workman went up with him, and into a room across the hall. He found it too hot and retired, calling to Jacobson to do the same, which he must have done soon after, but he lost his way in the hall, and his remains were found in the opposite end of the long building, burned to a cinder. The International hotel was the first large hotel built in notel was the first large botel built in Blaine. It was erected early in 1889, in the country. It was cheaply built, but it cost nearly \$10,000, and accommo

PORT TOWNSEND, Aug. 23 .- Scott Alpertson, the owner of a grist mill at Fossil, Gilliam county, Or., eloped from daughter of Edward Newman, a pros perous sheep rancher. The couple came here on the Wilmington from Portland Victoria, and were arrested by the chief of police and locked up in the city jail. To day the girl's father arrived He left for Oregon to night in charge of
