Among the attorneys in attendance of the circuit court in this city are J. D. Slater and W. Baker of Union county, The public schools of this city will be closed on Pennoyer's and Cleveland's day. Schools will have sessions on both Fridays.

The long, wintry nights are approach ing, and our people should originate some means of enjoyment which would mure to the mental improvement of all. Mr. E. W. Helm came in town from his

farm at Nansene yesterday. He has fin ished threshing his grain and has it stored in the barn. His loss from the late rains is very light. The Monumental mill at Granite is running on full time, and the ore being

produced is very rich in silver. A lurge quantity of ore is on hand, and the mili will continue operations for an indefinite continue operations for an indefinite Harry Hansbury and Alton Hayden, who were arrested for farceny of a boat and tried before Justice Schutz to-day, have been discharged. We are informed that there are needy persons in this city who require im-mediate assistance, and there should not be allowed to suffer for want of attention. Our people are always inclined to look favorably upon needy subjects of charity, and the societies in this city which attend to such matters should not be negligent in affording relief. The citizens, if appealed to, will respond liberally, and the hungry may be fed and the naked clothed.

An exchange asks: How many miles will the jaws of a gum-chewing girl travel in the course of a year? And then says: Giving her jaw a play of half an inch or one inch of travel for each chew, thirty chews a minute, sixty minutes an hour, ten hours a day, 365 days in a year, her jaws will have traveled 6,750,000 inches, or a fraction over 103 miles. From Thursday's Daily. The Mignonette dancing slub gave a very entertaining party at the Armory hall last ovening. It was the last of the present series of dancing parties, and no pains had been spared to render it as attractive and enjoyable to their guests as possible. In response to the numerous invitations s large number of the elite of The Dalles thronged the hall, filling it to its utmost capacity. The programme of dances was excellently arranged. The music, furnished by Prof. Birgfeld's orchestra, was deserv ing of special commendation. The half was beautifully draped with flags and bunt ing, tastefully arranged with quantities of large headlights, in addition to the usual number of lights, presented a very pleasant sight. comes, no matter how dark the clouds are, when the woman who is borne down by woman's troubles turns to Dr. Pierce's Favorite Prescription. If her life is made gloomy by the chronic weaknesses, delicate derangements, and painful disorders that afflict her sex, they are completely cured. If she's overworked, nervous, or "run-down," she has new life and strength.

A DOMESTIC HERO Business Man Who Has Devoted Him

came across a hero the other day. He looked much the same as everyday mankind. He did not know he was a hero, nor did I until he had left the party in which I met him. heroism, that of the privacy of home, with no Victoria cross or congressional medal dangling before it as a possibility, is, after all, perhaps the noblest of all heroism. Here was a great, strong, healthy and wealthy man, fond of outdoor sports, of travel, of the activity of a busy commercial career—one who in his youth was a man's man rather than a woman's. Fifteen years ago he married, and in a few years there

It had been a happy family. He has been a kindly husband as husbands go, and she a pleasant and dutiful wife. Out of the night came paralysis to her-a new life to him. Since that time his career has been entirely altered. His business was quickly arranged so he could be frequently absent from his office. He was father, mother, nurse, teacher, companion and playmate compressed in one domestic providence. Never had woman more devoted attendant nor more faithful and intelligent

All the little questions of housekeeping and of the care and training of children, of their clothing, their pleasures and their pains, fell to him, and in his hands they have been managed with a wisdom and care absolutely wonderful. This has been, remember, something of 10 years' standing, and it has grown instead of lessening. Outside of his comparatively casual attention to business his horizon is confined to the walls of his home. To make the wife forget her burden of affliction and be a happy woman through it all has been his happiness, and with such a spirit he could not fail.

They travel about considerably, this family, and all the details are taken care of by him. No hired nurses or governesses are permitted to usurp any of his duties, although there is one of each there at hand as his representative in times of enforced absence. So skillfully is all this done, so modestly is it carried out, that even the chief beneficiary does not realize what is occurringand that is his reward. "They do not build Westminster abbeys nowadays," said a friend of mine once. and I thought of his remark when I heard the story of this man, for the supply of heroes at this time is far below the demand.-Pittsburg Dispatch.

Many experiments have been made in order to find out what and where the organ of taste is in the lower creations; but it is easier to say where it is not. Cravfish and worms seem to have very decided preferences in the matter of food, though no special taste organ has been found. Lobsters like decaying food; Snails and slugs show a decided

preference for certain kinds of food, peas and cabbages, dahlias and sunflowers are great favorites, but they will not touch the white mustard. Some prefer animal food, especially if rather high. Spiders have only a slight sense of taste; flies soaked in paraffin seem quite palatable to them, though one species, the diadema, is somewhat more particular and refuses to touch alcohol in any

form whatever.-Chambers' Journal. There is nothing that little folks need so much or that helps their physical development so largely as plenty of sleep. Until they are 15 month. > Who does not know that a cat, or even a half grown kitten, taken a long way from home in a bag, nearly always finds its way back? When living in northern Michigan, I had a cat we tired of. I took her in a boat directly across the lake, about two miles, and turned her loose. Although was about six miles around the end of the lake, a circuitous course and certainly unknown to her by sight, the next morning she was back at the old place. Another case is that of a cat that was taken by rail fully 20 miles in southwest Missouri, and the next day he walked in all right at his former home.-Cor. Science

When Tsching Tschu, the grand chamberlain and brother-in-law of Prince Kung of China, was buried, he was followed and preceded by a re markable procession. The bier was carried by 80 men, each pair of whom had poles of different lengths under These 80 men were preceded by 46 flag bearers, 8 camels and 2 milk white horses. Behind the pall bearers came 160 men, each bearing their portion of 16 long planks. These planks or boards were painted red, and over this in yellow letters were the names and titles of the de-

An Enormous Balsam Poplar. Near Geneva, N. Y., is a balsam poplar tree 120 feet high, diameter of the top 115 feet and with a trunk 28 feet in diameter. It is probably the finest specimen of this tree in the world. It is on the home grounds of Charles Bean, Esq. It has been taken for the common Canadian poplar, but Dr. Sweet is authority for the corrected name. It is believed to be about 100 years old and is called the century tree, but as this would

Value of the Atmosphere

Careful experiments have shown that the rate per second at which bodies acquire velocity in falling through the air is 32 feet per second at the end of the first second from starting. At the end of the next second it is going at the rate of 64 feet per second, and so on through the whole time of falling. Where the velocity is known the space through which the body has fallen may be ascertained by multiplying result by two. This rule applies, however, only to bodies falling rough a vacuum.

The resistance of our atmosphere materially retards raindrops, hailstones, aerolites and all other bodies which fall through it, and were it not for the resistance it presents every rainstorm would be disastrous to the human race, as each drop would fall with a velocity great enough to pene-trate the full length of a full grown man's body. -London Nature Shakespeare's Eyebrow. ncircle a bust of Shakespeare. At that time the Duke of Devonshire owned the Kesselstadt death mask of Shakespeare. This death mask had been discovered in a pawnbroker's shop in Kesselstadt and pronounced to be a

Shakespearean mask. Oaks was permitted to use the mask in making the laurel wreath. He says: "In my examination for the pores in the plaster, to decide whether the cast was original or not. I found two hairs of the eyebrow sticking in the cast. I extracted one entire: the other broke.
