England Explains LONDON, Dec. 1-The following semiofficial statement was issued this evening regarding the trouble between Great Britain and Nicaragua:

It is learned that no difference of opin ion exists between the governments of Great Britain and the United States with reference to the Mosquito territory. Ow ing to the influence of cotton traders and others in these regions, it became necessary, recently, for Great Britain to draw the attention of the Nicaraguan govern ment to the provisious of the treaty between Great Britain and Nicaragua, which was contrary to certain decrees recently issued by the commissioner at Binefields. It is understood the matter tormed the subject of inquiry on the parof the United States, and a satisfactory explanation of the matter was given by the British government. The question did not affect the relations between Nicaragua and the Mosquito territory, but merely the rights and customs of the Indians, reserved under the treaty in question. There was no question of the United States dispatching war yessels to the spot in this connection.
