The McMinnville Telephone-Register says: On Friday last, Mr. Ed. Tyler, of this city, concluded to try an experiment with the air well on his property near the railroad track. He fixed up a dynamite cartridge, and with 20 feet of fuse attempted to "shoot" the well. The cartridge failed to go off and he tried another, this time with 5 feet of use. He lowered the cartridge with a fuse. He lowered the cartridge with a string until it reached 73 feet below the surface and then waited. This cartridge went off immediately fol-lowed by a deluge of water and mud. The explosion shattered the casing to the well and tapped the old air vein and during the night the well gushed forth water and air. The sair presure was estimated at about 50 pounds to the square inch. During the night the rush of air died out and the well is once more reposing. This well is worth looking into as the phenomenon of an air well is uncommon.

Work at the Locks.

Mr. J. G. Day, contractor for the completion of the canal and locks at the Cascades, was in the city yesterday, says the *Oregonian* of Wednesday. He says the lower pair of gates is completed and shut. The water is not within several feet of the top of the bulkhead which here shut it is not in the bulkhead which here shut it is not in the says that it is not in the bulkhead which here shut it is not in the says that it is not in the says the says that it is not in the says th of age and as the papers give her age, when murdered as 22, is is very likely to be the same young lady. One of the gentlemen said that the picture in the Chronicle was a perfect likeness of the part of the bulkhead, and let the water in against the gates in a day or two in against the gates in a day or two. The river will have to rise a good many gates and stop work in the canal, and it is possible that it may not rise high enough this spring. However, the probability is that the gates will be covered and work interrupted for a time, but, after the experience of last season, this will not amount to much.

During the month of March the arrivals of wheat in Great Britain from Pacific coasts points were unusually tals, as against 651,198 centals for Feb ruary, and 731,411 for January, a total for the first three months of the calen-dar year of 4, 800,466 centals, against 5,190,772 for the corresponding three months of last year. On April 1st, 138 cargoes were en route from the Pacific cargoes were en route from the Pacific coast for Great Britain as follows: Puget sound, 18; Columbia river, 61; San Francisco, 59. The total number of cargoes en route April 1, 1894, was 128, and same date in 1893, 159. It is estimated that shipments of 40 additional cargoes will complete the season's grain shipments from this coast.

Bpidemics of Cholera, Yellow Fever and other diseases of similar character, so terrible in their results, occasion wide spread alarm and receive the most careful consideration for their prevention and cure, while consumption receives scarcely a thought, yet the number of their victims sinks into insignificance when compared with those of consumption. Comparatively few people know what to do for their loved ones when they see them gradually lose strength, lose color, manifest feeble vitality and emacistion, or develop a cough, with difficult breathing, or hemorrhage. Cod liver oil was for a long time given in all such cases, but the poor success attending its use coupled with its nauseating taste has led many practitioners, as well as the public at large, to place their main reliance in Dr. Pierce's Golden Medical Discovery. It deserves early attention and will prove effectual not in every case but in a large percentage of cases, and we believe that fully of per cent, of all cases of consumption can, if taken in the early stages of the disease, be cured with the "Discovery." Dr. Pierce does not ask people to believe until they have investigated for themselves. A pamphlet has been published having the names, addresses and photographs of a large number of those eured of consumption, bronchitis, lingering coughs, asthma, chronic nasal catarrh and kindred maladies which will be mailed free to those sending for it with their name and address upon a postal card, or you can have a medical treatise, in book form of 160 pages, mailed to you, on receipt of address and six cents in stamps. You can then write those cured and learn their experiences.

Address for Book, World's Dispensary George Hyde, of Kellogg, Douglas county, had quite an exciting fight with a panther a few days ago. His dog came upon an old one with three young, and a lively fight ensued in which the dog was driven to close quarters, and was being worsted. Hyde went to the rescue of his dog, and the old panther turned upon him. He succeeded in keeping her off until the opportunity came for him to fire without endangering the life of his dog, and a lucky shot in the back of the neck stretched the panther dead. Mr. Hyde captured two of the young ones and still has them as trophies of his victory. The dog was quite badly victory. The dog was quite badly used up,

Dear Sirs—I have been a tobacco fished for many years, and during the past two years have smoked fifteen to twenty cigars regularly every day. My whole nervous system became affected, shall my physiciatold me I must give up the use of tobacco, for the time being, at least. I tried the so-called "Keeleture," "No-To-Hac," and various other reme les, but without success, until I acci estably learned of you
"Baco-Cure." Three weeks ago today I commenced using your pagaration, and today I consider myselcompletely curred; I am in perfect health, and the horrible craving for tobacco, which every investrats
smoker fully appreciates, has completely left me. I consider your "Baco-Curo" simply wonderful, and
can fully recommend it.

Yours very truly,

C. W. Hoanicz.
