He fed animals on food that had been carefully sterilized, and compelled them to breathe germ-less air. The experiments proved that the presence of microbes is necessary to digestion. The animals soon showed the effect of the deprivation. First, they began to droop, then lost their appetite, and finally weakened and died. It was found that the food simply would not assimilate when the simply would not assimilate when the microbes were absent. This series of experiments has been extended to the experiments has been extended to the vegetable world. It is now proved that certain plants can only assimilate the nitrogen which is necessary to their growth through the action of the microbes that live at their roots.

At half-past 1 o'clock the procession was formed in this city in the order mentioned in Wednesday's issue, Co. A of Wasco taking the lead, followed by Co. G of this city and the hospital by Co. G of this city, and the hospital corps under command of Lieut. Die trich, these forming the escort to mem Relief Corps. The military were un-der the command of Col. G. T. Thompson and staff of the Third regiment mounted, and in this order, followed by a large concourse of citizens i

carriages, they marched to the Odd Fellows' cemetery. The militia made a very imposing appearance, and worthy of especial mention was the company from Wasco, which is composed of fine appearing, soldierly men who have paid close attention to mili tary maneuvres and have won high enconiums from drill masters. The ranks of the old veterans are not as full as in ormer years, some having answered to the last muster roll, while others have become too debilitated by age to make the toilsome march through the sand to the resting place of their comrades. The column arrived at the cemetery, and with military precision marble shaft erected in memory of those who had answered to the last roll call was properly entwined with floral wreaths, and above it the old flag floated at half mast. Mr. J. M. Patterson read the proclamation of the grand commander and introduced the ritualistic exercises. After prayer and singing, each member of the G. A R. deposited a floral offering to the memory of a fallen comrade. The singing was rendered by a select choir, and the songs tended to awaken mem ories of departed heroes. After the services of the ritual were finished, Miss Russell gave a recitation, which was well executed and appropriate to the occasion. The soldiers and citi-zens then marched back to the city, and the ladies of the Relief Corps entertained the members of the Grand Army and A and G companies with a bountiful lunch in Fraternity hal!.

This was done in a very creditable manner, although the Relief Corps had attended the ceremonies at the cemetery and were undoubtedly weary After 12 o'clock the city had the aphalf-mast, and all places of business were closed. As memorial day of the dead of the armies of the union it was sacred to all patriotic citizens, and as a day set apart to the memory of loved ones it was hallowed to those who have friends and relatives sleeping in nar-row chambers of clay. The 30th of May thus becomes a day of remembrance to all, and all classes and conditions of our citizens can devote one day in the year to the loving memory of the dead.

If this last conjecture is true wheelmen must wait until 1898 before they will enjoy such a season as was experienced last year; but little credence is given this notion of salmon making periodical visits. Last year the run was not large until after the 2d of June, and fishermen of a sanguine temperament are looking forward anxiously to next month, when they live in hones that month, when they live in hopes that wheels will be crowded and the two

Too many invalids are given to gambling for the purpose of amuse-ment or pastime. Those who visit Florida, Colorado or California on account of climate, who leave home, friends and business on account of their health, who have anxious friends, or probably some relatives, who are hoping for all or some benefit from the change, cannot defeat the object of their trip in any more certain way than by a resort to gaming. No food, stimulant or rest can

replace the lost nervous energy ex-pended in this pastime. It tells on the cool and imperturbable as well as on the nervous and easily upset. We have often seen pulmonary invalids coming west for climatic benefit who slept all morning with closed windows and tightly drawn blinds that, by the exclusion of sounds and light, they might make up during the day for the rest lost during the night—a night often in a close room with burning gas lamps, and, as is generally the case, so small that what fresh air it may contain would hardly suffice for one man. The deadly effects of these conditions, added to the nervous injury incident to gambling, are sufficient to wreck a previously well and hearty constitution. An invalid may be said to

about destroy what little chance he may have by following gambling for pastime.—National Popular Review.

A well known physician recently published an account of the experi ence of a patient at a so called health resort. Here is a part of the story: "The patient in question was suffering only from overwork; his family history was clear, and there was no tuberculosis to be traced in his immediate kin or among his ancestors. He went to a health resort at a high altitude to recuperate. He boarded at a hotel in which numerous consumptives were coughing and expec-torating; four months afterward he developed tuberculosis and now has a typical case of pulmonary phthisis. The unfertunate condition of these resorts is that there is, as a

rule, no system of disinfection of the rooms, verandas, hallways, etc.
"The patients are allowed in most hotels to expectorate where they choose, without restriction. The re sult is that germs are scattered broadcast in the buildings and outside of the grounds. They become dry and are scattered in the air and inhaled by those exposed. Thus a health resort which in the beginning may have been very effective in combat

ting consumption becomes after a time a veritable center of infection." Those who mistake the flour of dirt for a natural characteristic of flour are not likely to be safe guides in anything relating to flour. Unrefined sugar is noted for its "flavor," but the flavor is merely the dirt or extraneous matter in the sugar. So it is with unrefined flour. The stalk of the wheat is quite as digestible as the bran and is quite similar in composition. The bran faddists ought to insist on smashing bran, awas and they would have a meal in which Andrew Velarde. nothing is wasted-except the consumer. The consumer should be guided by experience. If bran agrees with him, he is right in eating it. If it disagrees with him, he is right in refusing to eat it. The moralizers who are trying to make out that the millers are doing a great wrong in making pure flour have everything against them nowadays.—Milling World.

Of all the races with which the English have come in close contact. the Afghans are the most uncivilized in nature and grain. They are fierce, bloodthirsty, fanatical and treacherous; their good qualities are of the elementary, domestic kind, and their highest virtue is courage, which they possess to a conspicuous degree. They are uncivilized in the sense that they are without any national cohesion or responsibility. Each man is independent of his fel lows and rejects the authority of even tribal chiefs. No doubt there are in every clan or tribe men of prominence for their wealth or prowess or cunning, who command a car-

tain following. But their influence is personal and temporary and vanishes as quickly be allowed to develop in peace, this intense individuality might be no blood purifiers, acting directly on the mucous surfaces.
