The past two days have been uncomfortably warm, the thermometer ranging in the neighborhood of 90 degrees. No serious results have happened so far, but a change is desired very much. At the stockyards of R. E. Salt-marshe & Co. there are several hogs awaiting shipment, and several fine thoroughred bucks have been received during the past few days for sheepmen in the interior.

The man who tied the coal oil can to be steer, which frightened the team of horses Mr. Snodgrass was driving, and resulting in severe injuries to him, is known to his neighbors in the vicin-ity of Dufur. This is cruel mischief, and there is some talk of making an example of the man.

A beautiful sight, witnessed by many last night, was caused by a brilliant star maintaining its position for a long while just on the edge of the disk of the moon, which is in its first quarter. Placer mines are being worked principally by Chinamen; but worked principally by Chinamen. But there have been some rich discoveries made in quartz during the past year. Mr. Cozart speaks of a ledge that has been bonded for \$80,000 that is 350 yards wide, and extends a distance of about twenty miles. Assays have been made of the rock, and it yielded from \$3 to \$12 a ton. He believes when this ledge is developed it will be the great-est help that Eastern Oregon has re-ceived for a long time. The prospects of Grant county this year are very en-couraging in regard to mines; but Judge Bellinger the jury returned a verdict of not guilty without leaving their seats. This verdict gives general satisfaction, and was applauded by those in the court room.

Ever since Prof. Koch startled the world by promising to cure consumption with the Koch lymph and his complete failure to do so, the people have been looking for some discovery which would prove an absolute, certain cure for that dread disease. Over a quarter of a century ago Dr. R. V. Pierce, chief consulting physician to the Invalids' Hotel and Surgical Institute in a claim for a medicine, which he is scovered and used, in his extensive practice, that would cureninety-eight per cent. of all cases of consumption when taken in all its early stages. Time has proved that his assertion was based on facts gained from experience. His "Golden Medical Discovery" has cured many thousand people in all parts of the world, and Dr. Pierce invites all interested to send to him for a free book which gives the names, addresses and photographs of many prominent people who have willingly testified to the marvelous curative properties of his "Golden Medical Discovery." He has also written a Book of 160 pages on "Diseasea of the Respiratory Organs," which treats of all Throat, Bron-chial and Lung diseases, also Asthma and Catarrh, that will be mailed by the World's Dispensary Medical Association of Buffalo, N. Y., on receipt of six cents in stamps, to pay postage. Ever since Prof. Koch startled the world ical Association of Buffalo, N.Y., on receipt of six ceuts in stamps, to pay postage.

Consumption, as most everybody knows, is first manifested by feeble vitality, loss of strength, emaciation; then local symptoms soon develop, as congh, difficult breathing, or bleeding from lungs, when investigation proves that tubercular deposits have formed in the lungs. It is earnestly advised that the "Discovery" be taken early and the latter stages of the disease can thereby be easily avoided.

Notice to Water Consumer The Water Commissioners have ordered that the rules concerning the use of water for irrigation be printep and posted upon the gates of corsum-ers so that all may understand what the rules are. This has been done as ordered. The great waste of water heretofore and the limited supply, make the enforcement of these rule absolutely necessary. All consumers will please take notice of these regulations and in case of a violation of the rules the water will be at once shut off and a charge of \$1.00 will be made before again making the con-nection. I. J. NORMAN,
