SAN FRANCISCO, Sept. 13.—Dr. Ru-pert Blue, of the United States marine service here, received two letters this morning from his brother, Victor Blue, who is an ensign on the United States steamship Bennington, now stationed at Honolulu. In one letter, bearing date of August 23, Ensign Blue states that cholera broke out in the islands two weeks previously, and that it was constantly on the increase The death rate daily was six, and of all who contracted the dread disease, only one escaped with his life.

September 3, two days before the sailing of the Mariposa, Ensign Blue wrote again. He stated that six more were down with the disease on th Bennington, and that one sailor had died. The other men were doing well, but the ship's surgeon feared the epidemic had scarcely begun. He made

"We all felt very blue at the pros pect. The excitement is intense, and it is not to be wondered at, for the disease is spreading with alarming rapidity. The Bennington has left her anchorage off Honolulu, and gone southward 100 miles. We will return once a week after mail and orders. In one day 35 cases were reported at Hono lulu, and nearly every one resulted fatally. I hope to be able to give you better news when I next write, but I fear I will not be so fortunate.' Dr. Blue states that the United States authorities will assist the state states authorities will assist the state and local officers in preventing the en-trance of the disease into this country. He thought this could be accomplished by exercising diligence.

SURPRISE IN WASHINGTON

WASHINGTON, Sept. 13.—The news that \$4,500,000 had been withdrawn today from the subtreasury at New York for export, was received here with surprise, and the announcement created for a moment something like a constitution in the treasurery depart. sensation in the treasurery depart-ment. This feeling, however, was not ment. This feeling, however, was not shared by the high officials, who apparently regard the withdrawl as incident to the speculative spirit that seems to prevail. By the same officials it is thought the withdrawls are made with the sole purpose of forcing another bond issue. It can be stated, however, on excellent authority, that there will not be another issue of there will not be another issue of bonds and none will be needed. Those cognizant of the facts state that the Morgan-Belmont syndicate under the terms of the contract undoubtedly will terms of the contract undoubtedly will protect the gold reserve against the inroads of speculators, and will see to it that a reasonable balance is maintained. No doubt is expressed that as soon as grain shipments from the Northwest come in there will be an abundant supply of foreign bills on the market to meet every demand and the withdrawls, it is thought, must necessarily cease.

the affairs of Cuba.

"Exhaustive reports have been prepared for Secretary Herbert and the president on the condition of the navy for a descent on Cuba. The question of transports and the facilities for landing troops on the island has been looked into thoroughly, and the results filed with the secretary of the navy."

A Washington special to the Tribune says in reference to Cuban matters:

"Confidential information received by the Tribune shows that the president's plans are more far-reaching than was generally anticipated. In the first place it was learned that Spain had at last been frightened into action and the Mora claim will be paid by exchange on London within a day or two all the arrangements to that effect having been at last completed by the Spanish ministers.

"This information comes from a source beyond question, and from the same was obtained the prediction that within a month President Cleveland would take an active hand in the Cuban question. It is said that a powerful middent has head formed in his

ban question. It is said that a power-ful syndicate has been formed in this country which will be prepared to guarantee the Cuban bonds prepara-tory to its acquisition by the United States."

The Mora Claim. Washington, Sept. 13.—The methods for the payment of the Mora claim have been definitely settled and a draft prepared for the transfer tomorrow. It will call for an equivalent in English pounds sterling of \$1,499,000, made payable to Secretary of State Olney. The loss of \$1000 from the amount, \$1,500,000, originally agreed upon is due to the difference between the value of the Spanish peso and the American gold dollar.
