DESTITUTE IN BRAZII

Occasional letters from the Frank Spalding, formerly presiding elder of The Dalles district, who went to Brazil nearly three years ago as a missionary of the Methodist church. indicate that he and his family are in papers, lestitute circumstances. He is in an inhospitable field, in which the results do not justify his presence. After two years of privation he learned the native anguage, only to find that, in so far as it enabled him to convert the people, it was labor lost. It is thought he would be glad to return to Oregon, but has not the money to pay his passage. If this is so, the church should see that he gets back. Frank Spalding is too good and brilliant a man to be permitted to be virtually buried alive in a foreign land. True, he was a trifle vissionary, and shall we say foolish, in of his own free will entering a foreign field of which he knew almost nothing, when there was plenty of useful work for him to do at home but no doubt he is cured of that now. -Fosil Journal.

Mr. Spalding is, as the Journa tates, too good a man to be allowed to remain among a people who do not sufficiently appreciate his ability and good qualities to afford him an oppor tunity to sustain himself and family. Throughout Eastern Oregon he has many friends and admirers who would no doubt render him assistance to return to the United States should he

signify a desire to do so. Rev. Mr. Wood, pastor of the M. E. church in this city informs us that the last correspondence he had with Mr. Spalding, that gentleman made no complaint of being in need, though his expenses in Brazil are very heavy. The church here contributes regular mounts toward aiding Mr. Spalding in his missionary work, and since he is held in high esteem by the members here, they would no doubt render him any assistance he might ask for.

A Startling Admission.

In New York City, for five consecutive years, the proportion of Deaths from Consumption has been three in every Twenty Persons.

Epidemics of Cholers, Yellow Fever and other diseases of similar character, so terrible in their results, occasion wide spread alarm and receive the most careful consideration for their prevention and cure, while consumption receives scarcely a thought, yet the number of their victims sinks into insignificance when compared with those of consumption. Comparatively few people know what to do for their loved ones when they see them gradually lose strength, lose color, manifest feeble vitality and emaciation, or develop a cough, with difficult breathing, or hemorrhage. Cod liver oil was for a long time given in all such cases, but the poor success attending its use was for a long time given in all such cases, but the poor success attending its use coupled with its nauseating taste has led many practitioners, as well as the public at large, to place their main reliance in Dr. Pierce's Golden Medical Discovery. It deserves carly attention and will prove effectual not in every case but in a large percentage of cases, and we believe that fully of percent of all cases of consumption can, if taken in the early stages of the disease, be cured with the "Discovery." Dr. Pierce does not ask people to believe until they have investigated for themselves. A pamphlet has been published having the names, addresses and photographs of a large number of those cured of consumption, bronchitts, lingering coughs, asthma, chromic nasal catarrh and kindred maladies which will be mailed free to those sending for it with their name and address upon a postal card, or you can have a medical treatise, in book form of 160 pages, mailed to you, on receipt of address and six cents in stamps.
