ONLY A SUGGESTION.

Those who have despaired of ever seeing the canal locks at the Cascades completed by the government, and who believe that it is a waste of money to build them, are being relieved of their doubts by the action of the government in offering to relieve the government of all responsibility in the matter and assuming the task of finishing the locks themselves. The government engineers estimate that it will require at least \$40,000 to build masonry walls on both sides of the canal between the first and second locks. Since over three millions of dollars have already been expended on the work, it would seem that to ask for more money to do the job is not a very unreasonable request. It would be unkind, however, to avoid further looting the treasury, some of those who are opposed to reckless expenditures of public funds, and are at the same time very anxious that the locks be opened before their great grandfathers shall die of old age, suggest that the voters of The Dalles contribute fifty cents each, employ the supervisor of the Cascade Locks road district to superintend the job, and have him rip-rap those walls. Under his supervision the work can be done at a cost of about \$100,000, and the fifty cent contribution from each of the thousands of voters in the city would, it is believed, raise ample funds with which to prosecute the work. Possibly before this could be done, it would be necessary to get control of the locks out of the hands of the war department, and in order to accomplish this, it is suggested that the engineers in the department be loaned to the Cuban patriots, who can make good use of them for a month, while the road supervisor is completing the job. After the work is done, they can be loaned to the patriots for the next twenty years. The suggestion if carried out would be a favor to the Cuban as well as to the people of the United States who want free navigation on the Columbia river.

UNWORTHY OF CONFIDENCE

The Oregonian, in the fight it is making against the Frank-Lotan faction of the republican party in Multnomah county, is making some revelations of party "secrets" and is exposing the methods which are being used by the party to win the election. Some of the questionable methods that were adopted at the last session of the legislature to prevent legislation, in telling how the Simon charter bill and some other measures intended to cut down public expenses were swamped, in the senate, by the passage of the dishonest use of money.

A DESERVING ENTERPRISE

The move inaugurated by the Columbia Portage and Transportation company to remove the obstructions to navigation of the Upper Columbia river, by building a portage road between The Dalles and Celilo, is one of the most important and substantial enterprises of the kind in the history of the United States. It is an enterprise, if put in operation, would solve the problem of navigating the Columbia river and would give the farmers of the upper country all the advantages of an open river in a comparatively short time.

TRADE WORTH INVITING

Notwithstanding the business men of The Dalles have been working in the past in offering inducements for outside trade, in the way of subscribing liberally to funds for building roads into the interior, and last fall donated \$500 to the Rattlesnake road, leading into Sherman county, still they can invest more money in the way of building roads. Especially can this be done in constructing and maintaining a good road leading into the central part of Sherman. The money that has been subscribed to the Rattlesnake road is sufficient to make a fairly good thoroughfare. But not such a road as will insure all the wheat raised south of Wasco coming to The Dalles.

WHERE DO THEY STAND?

Although the presidential campaign this fall must, to a great extent, hinge upon the financial question, being a year when aspirants for the presidency must "stand up" and be counted on the choice between a gold standard and the free coinage of silver, republican candidates for the presidency are loath to express their views, or tell where they stand. The Cincinnati Commercial Gazette recently asked all the republican candidates by telegraph the following question: "We respectfully request from you, in common with other republican candidates for the presidency, a clear definition by telegraph of your position on the subject of the gold standard. Do you favor a decided expression by the republican party of the national convention?"

THE RECORD FOR ONE YEAR.

In spite of the "ruinous effects" of the 1897-1898 winter, which has presented itself to prove that the manufacturing industries are not totally annihilated, but in some lines are actually thriving. New factories are going up in some places, improvements and enlargements are being put in, in others there was actually a healthy increase in the number of factories during the past year in some of the very industries which, a few years ago, were told would be totally ruined by a reduction of the tariff on the articles they produced. The American Wool and Cotton Reporter finds that in 1895 some 357 new woolen and cotton mill enterprises were started, as against 293 in 1894 and 270 in 1893, and the Boston Herald is informed that approximately 100,000,000 pounds more wool was used by the mills of Massachusetts in 1895 than the normal amount consumed in a year.

EFFECTIVE PROTECTION.

More speeches have been delivered and more editorials written in the past few years on the subject of protection to home industries and American labor than upon any other subject, and it is certain that all this display of oratorical and editorial ability has effected little, at least so far as final determination of what form of protection would be best for the masses, is considered. After all that has been said and written on this subject, and the trial that the system of protection had from tariffs has been subjected to, it would seem that it is not too late to consider just what sort of protection their varied industries require, but such is not the case. The divergence of opinion is just as wide today as it was in 1892, and the question of protection was first brought

LIGHT BREAKING IN THE EAST

The first gleams of returning democratic daylight are beginning to break in the east, says the Examiner, as usual it is the local elections that indicate the approaching change. In Pennsylvania, in two-year sessions since Philadelphia, that have held elections within the past two weeks the republicans have carried eleven and the democrats ten. For a state that gave a republican plurality of 174,384 less than four months ago the record is not bad. Pittsburgh, which had a republican majority of 35,000, has just come within 2,000 votes of going over to the democrats. In New York, where the democratic revival has not yet reached startling proportions, many of the democratic towns lost in the elections of the past three years have been recovered and some republican strongholds have been captured. The election of Josiah Quincy as mayor of Boston proves that the lapse of the metropolis of New England from democracy was only temporary.

TELEGRAPHIC.

SAN FRANCISCO'S STRANGLER.

Another Woman of the Town Murdered Monday Night.
SAN FRANCISCO, March 10.—Another woman of the town was strangled early this morning under circumstances almost identical with two recent murders that have taken place recently in the same locality. Early this morning a woman named Bertha Parsons, of 27 St. Mary's street, was found dead in her bed. When found she was half reclining on the bed, her feet on the floor. She had been strangled, a handkerchief having been thrust down her throat. The room was in perfect order. Nothing had been disturbed apparently. The girl lay fully dressed on her bed. No marks of violence were on the neck. She had apparently been seized, and a napkin, as well as a handkerchief, had been crowded down her throat. The money on her was not touched, nor had there been any apparent effort to go through the bureau drawers or other places where money might be kept. To the heavy investigation of the police it seemed like a crime not actuated by the motive of robbery.

EXPERIMENTS IN GERMANY.

Washington, March 11.—United States Consul-General DeKay, of Berlin, has submitted to the state department an interesting report on later developments of the X rays experiment in Germany. Professor Roentgen, the discoverer, explains his researches. The consul-general's report gives many facts that have been discovered by the European experimenters in regard to the rays which are known in this country.

ANTI-AMERICAN SENTIMENT.

Local Newspapers Fanning the Flame at Barcelona.
NEW YORK, March 10.—A dispatch to the Herald from Barcelona says: The anti-American sentiment here is increasing instead of abating. Local newspapers are fanning the flame. They state that the United States can only be won in the field, and that the American flag is but a trifle superior to the Spanish.

ASSISTANCE ASSURED.

The efforts put forth by The Dalles Commercial committee for the completion and protection of the government works at the Cascades, are beginning to have good effect. Senator Mitchell has already introduced a resolution in compliance with the requests of the club, mentioning the fact that the club possesses the virtue of not being burdensome.

THREE NAMES IN THREE MINUTES.

Lightning Changes in Matrimony Made by an Indiana Woman.
KOKOMO, Ind., March 11.—A lightning matrimonial act was performed here today that is believed to break the record. The feat of changing her name three times in three minutes was successfully accomplished by Olive Smith. At 2:30 o'clock she went into court and obtained a divorce from Francis M. Trader; from there she proceeded to the clerk's office, where she changed her name to Mrs. Joseph N. Tyler, and before the ink was dry on the divorce or license, Squire Loop performed the ceremony that made her Mrs. Tyler. In the divorce her maiden name of Smith was written, having her three names in three minutes.

W. T. Hoffman Killed.

Corvallis, Ore., March 11.—A heavy printing press was moved upstairs in the postoffice building at 11 A. M. today, when the chain by which it was being hoisted broke. The press fell down the entire flight of stairs, struck W. T. Hoffman and pinned him to the floor. He was rescued by the fire department, but his house and medical aid summoned. He was badly mutilated, and suffered intense agony until his death, which occurred at 4 P. M.

THE DEAL CLOSED.

Baker City, Ore., March 12.—The exploring syndicate of mines and mining composed of French capitalists, through its local representative, E. L. Giroux, today closed a deal for the Clark's creek placer, owned by the Hong Kong Mining company. It was sold to the Chinese syndicate for \$15,000. The French syndicate has paid out in this section within the last few months over \$100,000 for mining properties, and a number of other deals are pending.

Victim of Spanish Persecution.

New York, March 10.—A family of eight Cuban refugees were passengers on the steamer Orizaba from Havana, which has just arrived at quarantine. They were penniless, and the immigrant inspector today ordered them to be taken to Ellis island. They are detained there liable to deportation. The head of the family is Gonzalo Penay del Gado. He had been a harness-maker at Matanzas for sixteen years. He says he is a victim of Spanish persecution. His story has won the sympathy of all the officials on Ellis island.

Murder in the First Degree.

Seattle, March 10.—William Carey, also known as "Big Boy," was convicted of murder in the first degree in the superior court today, for killing his koochman, Lucy Williams, last Christmas, by beating her to death with an axe. Carey was well connected in England, and left before he was twenty years old. Since coming to Puget sound in 1898 he has been a squawman. His relatives furnished money for his defense, and the trial was attended to by G. N. Alexander, British vice-consul at Tacoma.

Consuls Routed.

Havana, March 10.—Col. Samero, in command of the Spanish column operating against the insurgents, in the province of Pinar del Rio, captured the fortress position occupied by the enemy, after an hour's fighting, during which cannon shots were exchanged. The insurgents were dispersed with a loss of 120 killed and wounded. The insurgents burned the village of Martinis, in the district of Guines.

Mass Meeting of Indians.

Pendleton, Ore., March 10.—A big meeting of Umatilla Indians, squaw and young men, was held on the reserve today to consider the cause of the death of Diok Pond and Wamshaw. A proposition to invade the Pendleton saloons was received with wild approval. The proposition was made by leading Indian. Some apprehension is felt here by the saloon men who have been selling whiskey to Indians.

KENTUCKY LEGISLATURE.

The Senate Unseats Two Republicans, and the House One.
FRANKFORT, Ky., March 11.—The house has unseated Kauffman, democrat, and the senate has unseated James and Walters, republicans. When the joint assembly convened Speaker Blanton issued orders that only members or persons entitled to the privileges of the floor be admitted. The president officer ruled that the clerk of the house would call

THE ROLL OF THE HOUSE.

the roll of the house, while the clerk of the senate called the roll of the senate. Calling the roll then began. The clerk in calling the names of the members of the senate omitted to call those of James and Walton, the clerk of the house omitted the name of Kauffman, democrat. Roll call showed 100 members present, with two pairs. The ballot for senator then began. The republicans refused to vote. The ballot resulted: Blackburn 54, Carlisle 10, Buckner 1. The chair declared that as only 65 votes had been cast there was no quorum. The assembly adjourned at once. The republicans of the senate made a mistake when they refused to vote on the question of declaring Walton and James ineligible to seats. Had the republicans all voted "no" it is claimed by many that the senators would not have been expelled from the senate. The opinion prevails that there will be no election because the republicans will refuse to vote from day to day and thereby break a quorum.

POPULAR COOKS.

Should remember to use only two-thirds as much Cottolene as they formerly used of lard or butter. With two-thirds the quantity they will get better results at less cost than it is possible to get with lard or butter. When Cottolene is used for frying articles that are to be immersed, a bit of bread should be dropped into it to ascertain if it is at the right heat. When the bread browns in half a minute the Cottolene is ready. Never let Cottolene get hot enough to smoke. Cottolene is used for frying articles that are to be immersed, a bit of bread should be dropped into it to ascertain if it is at the right heat. When the bread browns in half a minute the Cottolene is ready. Never let Cottolene get hot enough to smoke. Cottolene is used for frying articles that are to be immersed, a bit of bread should be dropped into it to ascertain if it is at the right heat.
