Although this has been an uncommonly warm July, the temperature has not been so high as it was in July of 1875. That year the highest readings were as follows: July 7, 102; 8, 104; 9, 105; 10, 102; 17, 100; 18, 101; 19, 100. This year the highest temperature has been on the 14th, 15th, and 16th, when the mercury registered 101, 104 and 100. Today the highest temperature reached was 97, which on the same day 21 years ago it was 101.

Burglars who seek to break open

The construction of these walls will be under the supervision of Day Broson the basis of their former contract for similar work. A force of from 50 to 60 men will be put on the stone work wi hin two weeks and the building of the walls will b pushed to completion. Then the work of rip-rapping the outer bank on the river side will be commenced, and it is estimated that six months will be required to complete the entire job.

Since the engineers department hav determined to construct the inner walls of masonry, there is probably no appeal from their decision, and as this work will require from two to three W. J. David-on, election months, there is not a very hopeful prospect of the locks being opened to crop of wheat.
