THREATS MAKE SILVERITES.

It is a peculiar trait of the American prople that they will not be driven to submission, though they may be coaxed into following the lead of parties or men. They may be convinced by argument that certain propositions are either right or wrong, but bulldozing and threatening, will not accomplish this end: hence it is that some of those who most ardently favor the maintainance of the gold standard are prejudic ing their cause and forcing otherwise neutral voters into the ranks of those who favor the free coinage of silver. By denouncing those who do not take readily to gold as traitors, fools and villians, and by threatening to wreck the commerce of the country if the "silver craze" is not hushed, they are forcing the masses to believe the capitalists have been granted unsafe powers under our present financial system. Such threats as the following circular issued by Henry Clews & Co., the Wall street bankers, is making more silver men 'among the common people of America today than all the argument of the silver orators and papers. In their circular, Messrs. Claws & Co. say:

"The mere fact that a large portion of the people should be intent upon forcing the acceptance of a debased and fluctuating metal as standard money is a discouraging symptom; for it shows to what dangerous ends an ignorant free suffrage may be prostituted. Wall street has learned to believe that there are greater pretenses that party platforms, than legislative subserviency to popular ignorance, than the madness of a partisan infatuation .. They know that there are situations and events which can instantly coerce and convert the most reckless legislators into willing servants. . . The near prospect of the authorization of free coinage-a counting of heads showing a certainty of a two-thirds vote in the house and senate for 16 to 1-would evoke in Wall street the kind of conditions that no congress has ever yet dared to disregard, and the cause of free coinage would be overthrown at the moment when its success is most certain. It is this reserved power on which Wall street is

"This will be worse than a labor riot; the Pullman strike will be forshooting Wall street? When the Southern states became tired of the combination and desired to set up a little republic of their own, at the expense of a few billion dollars and a half million lives, the republic was knocked into a cooked hat; but who would dare to knock, Wall street into a cocked hat?"

When Wall street thus openly boasts of its power to coerce congress, and make willing servants of legislators. it causes true Americans to revolt against the systems that gives those who control affairs in the money marts of the nation this power. If it is the maintaffance of a gold standard that enables them to wield this influence, and in their circular they intimate that it is, there is little wonder that the common people threaten to strike it down with honest ballots at the polls. L While this circulor does not say in so many words, that Wall street controls the American government, together with the army and navy, it implies that Wall street controls those who control the government, which

is the next best thing; and when Wall street puts the screws to the people. when it brings into action, "this reserved power" which Messrs. Clews & say they have, it is time for the masses to raise the danger signal. They become alarmed at threatened danger, and are ready to remove the system that creates this unnatural and unsafe power. If it is the gold standard, they seek to strike at the root of the evil and establish another and less dangerous standard, one that cannot be manipulated by the owners of wealth.

A CAMPAIGN OF EDUCATION We are informed by the republican press of the land that from now until the November election, this shall be a campaign conducted or lines of education; that the issues shall be stripped of all sentimentalism; that personalities will be laid aside, and that, by the submitting of facts and figures, the voters of the nation will be convinced of the falacy of a change in the money standard of the country. This is beyoud question the manuer in which the campaign should be conducted. Americans are the most patriotic people on earth, and as a rule they desire that the government should be conducted on principles that will result in the greatest good to the greatest number. What systems will bring about these results is what the average voters wants to learn, therefore he welcomes the campaign of education; the one in which he is to be convinced by facts and figures; but he demands that he be fed on facts, not fiction. Then if the press and campaign orators will confine themselves to facts the voter may gain much knowledge during the coming campaign, and when election day rolls found will be prepared to decide what is best for the

It would be tiresome to go paying gold for treasury notes. This Their only hope of success lay in pronounced candidates. The demo-

ing to these republican authorities the ordinary farm laborer receives 30 cents a day, the bricklayer 75 cents. the carpenter 50 cents, the blacksmith 75 cents, the stonecutter 85 to 90 cents. This low rate of wages has been attributed to England being a free-trade country, but such argument hardly holds good, when right across the channel in Germany, where the highest kind of protection prevails, the wages are even lower. Therefore protective tariffs or free trade can have little effect upon fixing wages.

In more recent argument, which is intended to convince the American laborer, that in order to keep up his present high standard of wages he must maintain a gold standard, the same high republican authority Invites his attention to the wage scales of Mexico which is a silver-standard country There we are told that the ordinary farm laborer is paid from 50 to 75 cents a day, the blacksmith \$1.75 the carpenter and stonecutter the same. This of course is in Mexican silver, worth only half as much as the British coin, but the result of the day's work, will buy the laborer just as much of the necessaries of life in Mexico as it will in England. In connection with this comparison, however, it must be taken into consideration that the ordinary Mexican laborer is by no means the equal of the Englishman, being indolent, unskilled and ignorant, and if placed side by side with an English working man would not do one-half the work performed by the latter. Then for the same amount of work done the Englishman receives only one-

The money of England has been based on gold for almost a century, while in Mexico silver has been the basic money since the government was formed. England is pointed to as the most enlightened nation on earth, Mexico the very opposite. English laborers are said to be more industrious han any others except Americans, while the lazy Mexican is proverbial With this comparison made by the republican press, and in the face of this sort of educational campaign, can the American laborer see much in the

gold standard for him?

Aside from the money question, there are issues that will arise in the presidential campaign which are of nearly equal importance, and should not be lost sight of in the hot debate carried on over gold and silver. One prominent issue that should be kept in the minds of the people is that of popular government against the misused power of the corporations. In it there is not the sightest element of hatred of the rich, but an uprising of the masses to protect themselves from the grinding lower of the classes, and it is without ustice that the organs of the corporations endeavor to brand this uprising of the people as anarchial, incendiary gotten. A labor riot can be quelled and threatening good government. rectly against wealth or the possessors of millions, but against the abuse of the power of wealth in an organized

The course pursued by the Chicago convention was only the acceptance of the challenge issued at St. Louis. The corporation interests combining and centuring on the nomination of McKinley, assumed at attitude of boldness and defiance because of a belief that the democratic party was disorganized and discouraged, and that a nomination by the republican party was equivalent to an election. Organized capital thought it saw in the signs of the times an opportunity to tighten its hold upon the masses and to deliver the finishing blow to popular rights. Never before had it been so aggressive; never before had the tasks of capturing the government in the interest of corporations appeared to be within such easy reach. It is well to bear in mind the conduct of the St. Louis convention and how the influence of the trusts, combines and syndicates was rsed to bring about the adoption of the platform and the nomination of the candidate, because by it the action of the Chicago convention can be more

TACOMA, Wash., July 29 .- E. L. Harrison, who was formerly traveling auditor for the Northern Pacific railroad, committed suicide in this city at an early hour this morning, by shooting himself in the mouth, the bullet from his revolver penetrating to the brain and killing him almost instantly. Harrison has been very ill recently, and it is supposed that he killed himself in a fit of despondency, on account of the state of his health. He leaves a silver at that ratio, gold would be wife and two children who are temporarily out of the city.

> Situation Becoming Serious BULUWAYO, July 28.-Imperial troops are being hurriedly pushed to the front from MacLoutzie and Mangwei and Fort Tull. The situation is becoming more serious day by day.

COLUMBUS, O., July 30 .- A tornado visited Gloucester, a mining town, 75 miles south of here, at 8 o'clock Wednesday. Several houses were mashed into pieces, and a number of others were wrenched from their foundations. J. L. Dougnerty, while in front of his store, was completely buried under the board sidewalk. His back was broken, and he died later from his injuries. The house occupied by James McClelland and family of six was crushed in like an eggshell, but the occupants escaped injury. The tornado lasted scarcely a minute, but rain fell in torrente for half an hour. Thousands of dollars damage to buildings and grow-

ing crops was the result. Raiders go to Juli. LONDON, July 30 .- Dr. Jameson, Major John Willoughty, Colonel Reginald Grey, Colonel H. F. White, Major R. White and Captain Henry F. Coventry, sentenced Tuesday for violation of the neutrality laws in invading the territory of the South African republic, have been removed to Wormwood scrubbs prison, where they will be treated as second-class misdemeanants.

California Fruit in London LONDON, July 30 .- The second shipment of 5000 boxes of California pears and a few boxes of plums arrived in good order. Mr. Isaacs, the consignee, says that as far as he knows the quality of the fruit is better suited in the market than the last lot received.

ATLANTIC CITY, N. J., July 30 .- A allroad accident, horrible in its de tails and sickening in its results, occurred this evening, just outside of his city, and as a result about 100 persons are either killed or injured. The Reading railroad express, which

left Philadelphia at 5:40 o'clock this evening for Atlantic City, crashed into Pennsylvania railroad excursion train at the second signal tower, about four miles out from here. The Pennsylvania train was return

ing to Brigeton with a party of excursionists from that place, Millville and nei hippring towns. It was loaded with passengers, and a rough estilate of the kill-d and injured at a late huge places the number at 100. It is hoped that this is an exaggeration, but the number is undoubtedly more than 50. At the second signal tower, the tracks of the two roads diagonally cross. The Reading train was given the signal to stop, but the brakes either failed to work or the speed of the express was too great to be checked in time. It caught the excursion train broadside and ploughed through literally cleaving it in twain. The engine of the Reading train was shattered to pieces. Every car on the excarsion train was jammed to its fullest

SOUND MONEY'S CAUSE.

The Bankers of California Issue an Auti-Sliver Pamphlet. SAN FRANCISCO, July 30 .- The Callfornia Bankers' Association has issued a pamphlet on the fluancial question, as the members believe the currency issue is the vital issue of the oresidential campaign. They take the position that the plank in the democratic platform favoring the "free coinage of silver at the ratio of 16 to 1, without awaiting similar action by any other government," is a most dangerous one. They set forth that if the United States should alone attempt free coinage of hoarded to await a premium or shipped to foreign countries, and silver alone remain as a circulating medium. They also fear that capital would be driven

crippled: The pamphlet concludes: "Convinced of the righteousness of our cause, and earnestly wishing to promote the general welfare, we unhesitatingly express our decided opinion that every vote against 'free coinage of silver at the ratio of 16 to 1' is a vote for the return of confidence and prosperity; for the benefit of all classes; for the protection of your families and homes, and, above all, for the preservation of your own and your country's

CHICAGO, July 30 .- The commercial travelers of the country are going to wage war against free silver. There are 150,000 of them in the United States, and of this number 98 per cent are said to be champions of McKinleysm. The organization through which they will work is known as the National Executive Committee of Commercial Travelers of the United States. The chairman, G. C. Corey, is president of the Commercial McKinley Club, No. 1, of Chicago, which was organized June 15, 1892, the day Major McKinley was made permanent chair-
