but one method by which the gold re- any energy in this direction if left to serve can be increased, that is by buy- themselves; therefore it behooves ing more gold on interest-bearing bonds. The same is true with regard to reducing the volume of paper money that is in circulation. To call in any part of the silver certificates, treasury notes or United States notes, the, government must have metal money with which to redeem them; its only method for securing metal money, under present existing laws is by the sale of bonds, for all issues of the government are made receivable the chief engineer's office and report for internal revenue and tariff taxes, the same directly to the secretary of therefore taxation cannot be relied on to get gold.

the amount of circulating medium

follows:

The proposition then resolves itself into these conditions: The issuance of enough intersat-bearing bonds to bring the gold reserve up to an amount that will furnish reasonable security to our own interest, quit relying upon for the outstanding flat money, the government officials, but cause an inbuying of sufficient gold on interest-bearing bonds to retire the greater portion of our paper money, or the substitution of another metal as the basis of our circulating medium. The government cannot accomplish things that are impossible to individuals, and since no individual could make the limited amount of gold we have bear the burden that has been forced upon it, the same is impossible with the government.

AN IMPENDING CRISIS.
