NEW YORK, Sept. 4 .- R. G. Dun & Co's weekly review of trade will say: There is a distinct increase of confilence; due largely to the continuing heavy imports of gold, which have put an end to money anxiety, and also to political events, which are closely watched, while it does not yet start more mills and factories than are closing for want of work, it crops out in the speculative purchases of pig iron, wool and some other material, by experienced men, who believe that a revival of business is not far off, and for the first time in nearly two months a slight upward turn appears in prices of manufactured products. The gain in confidence and in willingness to lend and invest gives reason to hope that the necessary replenishment of stock, which cannot be long deferred, may be liberal enough to stimulate fair activity in trade and industry. Wheat had suddenly risen a week ago, but reacted with better crop news, until Thursday, when another advance came of 1 cent, making the net decline for the week It cents. Western receipts continued large, 5,512,500 bushels for this week. against 4,550,000 last year, making the increase since July 1 about 12,000,000, or 53 per cent. Atlantic exports were also large, flour included, being 2,033,-000 bushels, against 1,347,000 last year, and since July 1, 19,073,500 bushels, against 11,315,650 last year, a gain of 69 per cent.
