be submitted by the bondsmen. The city council has certainly exercised good business sagacity in accept-Co. for lighting the city. Few cities on the coast get their lights at such a rate, and as no city can afford to be in darkness, The Dalles can be congratulated upon having been able to contract for 50 lights at \$1,000 a year, or at the rate of \$20 per light, a little less than double the price of an arc light

FOLLOWS PARTY LEAD.

Congressman Ellis Is Now for the Go Standard. During an interview with an Oregon ian reporter at Baker City the other day, Congressman Ellis was requested to define his position on the silver question. In reply he stated that n this, as well as on all other subjects connected with national legislation, he is guided solely by the last republican platform, as enunciated in St. Louis,

It was then suggested to Mr. Ellis that among the mass of voters there may be many who, while staunch republicans, may not have read that platform. Mr. Ellis then said:

"In order that there may be no doubt as to my construction of it, you can say for me that if an attempt should be made to pass a bill in congress, advocating the free and unimited coinage of silver by the United Strtes alone, I shall most decidedly rote against it. This is the purpose and intent of our platform, and I shall most decidedly vote against it, and is the purpose and intent of our platorm, and I shall live up to it in every particular. I am frank enough to admit that there was a time when I entertained different views, but that time has passed."

amiliar Faces That Are Seldom Over looked by New Yorkers. One of the popular habits of the peo ple of this city is to consult the clock almost on every occasion when an opportunity is presented. It matters little whether any special need requires that consultation or not, the clock will thus be consulted. Especially is this the case if a particular clock has the reputation of being a good timekeeper. So well is this known by many storekeepers that they will place clocks in their stores so situated as to be easily seen by persons who may be passing along the adjacent sidewalk. If the clock has a good reputation and the pedestrian is fortunate enough to carry

a watch, a comparison is almost sure to Many times a clock with a good repu Many times a clock with a good repu-tation placed in the back part of a store T J Driver, sundry bills...... 222 99 becomes a protection thereof, especially at night, if near it is located a light strong enough to illuminate its face and show the time. A policeman told a Mail and Express reporter the other day that a good clock, thus situated, is better than a private watchman for a jewelry store, as every belated passerby is likely to look through the store to see what time it is, and would be al- here by certify that the above and foremost certain to notice anything un- going is a full and complete statement usual in the appearance of the place. It therefore becomes indirectly a silent taken thereon by the county court of watchman guarding the premises

against the depredations of burglars, and makes the pedestrians, as it were, assistants in the work. Church clocks have always had large number of patrons in the work of consultation, and nothing seems to be so annoying as to find such a clock inactive. When an event of this character occurs, especially if the church is lo cated on or near a busy thoroughfare the fact of the clock being stopped, or that some defect appears to exist, is often made the subject of a notice in the daily papers. Especially was this the case when the steeple of old St. Paul's was recently undergoing reno vation, and it was a joy to many on noticing that the newly gilded hands of the clock were again traveling along their accustomed circuit, and the deeptoned bell was ready to strike the hour once more.-N.
