WHY THIS DELAY.

President McKinley is now appealing to the kindhearted people of America for aid for the suffering Cubans, food and clothing which no doubt is needed, but it is not all the Cubans want nor is it what the masse of Americans are willing to give them. This appeal, while it will be met with open hands, will deceive no one regarding the intention of the adminis tration, nor will it obscure the real power that is back of it to prevent a more vigorous policy. Having disappointed all with the stand he took in his message regarding Cuba, the president must now seek to reinstate himself in the confidence of the people, but his subterfuge will avail but little. What the people of this nation want to see is a United States man of war in front of Havana, with its bristeling cannon announcing that the war against the Cubans either cease or be and use the pruning knife on approconducted on lines of civilized warfare. And what the people of Cubs most crave is not provender but recognition as belligerents by the United

States. When Grover Cleveland was presi dent and William McKinley a private citizen, the masses could not find language severe enough to apply to Cleveland because of his inactivity in Cuban affairs. They demanded a "fighter" at the head of the government and not a man who sent a substitute to the war when his nation was threatened with disruption. In due course of time they got their "fighter," a soldier who had proven himself valorous and brave, and he was provided with a platform to stand on that spoke in unmistakable terms regarding the attitude of the country toward Cuba, which was in short absolute independence of that country

But almost a year has rolled round since their "fighter" was put in the saddle, a year of bloodshed, murder and cruelty on the part of Spain and a year of sacrifice, and suffering, and patience on the part of Cubans, still our valient president insists that Spain must be the taxes, expect from such officials? given longer time in which to pursue | Can they expect a clean, economical its hellish course of annihilation, for administration? If we judge the future that the Spaniards may kill instead of bound body and soul to the bosses? If starve them. His appeal is mockery and a disgrace to humanity. The

This is in a measure encouraging that in one month of the Dingley tariff posing to inscribe near the top of the law the receipts have exceeded the disbursements, but the outlook for this month is not bright. Mr. Dingley anticipates another deficiency for the month, and it is likely that the months following will show a deficiency. These facts should serve as an incentive to congress to curtail expenses
