will soon be confronted with the unpleasant necessity of laying aside his or her health-giving steed and lapsing back into that sluggish condition which comes to those who do not exercise. What must be done is for the cyclist to find a substitute for the exercise which has freshened his blood and given him a ruddy cheek and healthful body. This roblem is one which has excited the keenest interest among cyclists general-ly, and Prof. M. J. MacLevy, a New York instructor in physical culture, has demonstrated that the accompanying suggestions will bring about desired reults in a remarkably short space of

It is a well known fact that during the past season so many cyclists have wheel so that to stop cycling all at once would be almost injurious. It would be like a morphine fiend suddenly deprived of his drug. The reaction would be more than he could stand. By following a few simple rules there is no reason

Physicians state that the lungs of yclists have many more cells in active peration than those who follow a purcy sedentary life. To this end it is very important that the chest development be maintained. Let the cyclist raise the windows of his sleeping apartment, top

That is the reason that there are any number of new matchboxes this year which are smaller and more dainty than anything in this line ever seen be-

"Do the girls buy them ?" a prominent jeweler was asked. To which question he answered: "Yes, indeed. The smaller sizes are made particularly for their

special use." The pretticst of the new matchboxes for girls are of gold with an enameled coration. The enameling either takes the form of a college or yacht club flag or it resembles a hand-printed miniature showing a girl on a wheel or the head of a dog. Many of these matchboxes are made with a concealed recess for a photograph. It is only when a certain spring is touched that the picture can be seen, so skillfully it is hid-
