Worth Knowing.

Every little while says an exchange, we read in the paper, of some one who has a rusty nail in his foot, knee, hand or some other portion of the body, and that he has been treated therefrom, of which the patient died, if every patient was aware of the remedy for all such wounds and apply it, then all such reports must cease. The remedy is simple, always at hand, and can be applied by anyone, and what is better, it is infallible. It is simply to smoke the wound with wool or wadded cloth. Twenty minutes of smoking will take the pain out of the worst cases of inflammation arising from the wound.

Metastasis' Career in Whatcom.

William McInosh, the San Francisco lawyer, who was arrested charged with trying to sell an alleged confession of his client, A. Hoff, is known in Whatcom. He went to Whatcom from The Dalles, Or., in 1912, and started a business as a clerk with J. R. Taylor. Taylor was elected county clerk, and in 1913 McInosh was appointed city marshal. The license fees for that year were \$22,000, and the taxes were \$33,000, and McInosh was ex-officio collector of both.

Next year he was appointed city clerk, with A. M. Williams as assistant. During the first six months he wrote just one page or his share of the work. An investigation had begun of his marital status, and got so hot that he resigned the clerkship.

Metastasis was expiring the books and found a list of charges. McInosh wanted Christman and paid the shortages as fast as found till his money ran out. At one time he paid \$250 shortage. An information was laid against him, but the matter was never treated in the courts, by law Watson the last few months.

No Ledger For Local Papers.

Mexico Under Says: One of these people who never have any use for local papers died in Andrain county last year. His preacher, after saying all the good things about him he could, had an obituary published in the Ledger about him, which took at least \$5 worth of good advertising space, and wishing to return good for evil, we made no charge for the same. The next day the son of the deceased (who had no use for local papers either) called and wanted 12 copies of the Ledger containing the obituary. He started out of the office without saying thank you. On being informed that the dozen papers, under the circumstances, ought to be worth fifty cents, he said: "I don't believe I want them." Such is life. In this case, and in most other cases where newspapers are treated in this manner, it is the fault of the newspaper management. We should have charged full rate for the beautiful and valuable obituary, then probably the value of the local paper would have been more highly appreciated.

Probably Lrowned

Mat Naquet and John Szerszeg, two fishermen, left last week in a small boat for a point down the river. The other day their boat containing a lot of provisions some liquor and clothing was found floating right side up near White Salmon. The men were somewhat intoxicated when they left, and it is presumed that one of them fell overboard, and in attempting to save him the other was dragged to a watery grave.

The Popular skirt.

No outer garment gets such constant wear as the separate dress skirt; therefore, when it comes to the purchase of such an article, what is more natural than for you to turn to a dealer for it, who is reputed always having the correct thing at the lowest possible price. A. M. Williams & Co. merit this distinction.

From a message received at noon today from Portland, we learn that the democrats, populists and free silver republicans have adopted a platform, and appointed conference committees. No further news could be obtained.

NOSEBLEED.

What to Do For This Very Annoying Affliction.

Play regarded nosebleed as one of the distinctive characteristics of the human race, for he said that "man is the only creature from whom blood flows at the nostrils," and, properly understood, he was right. Of course blood will flow from any part of any animal when the arteries or veins of that part are opened, but it is the fact that nosebleed, occurring without any apparent cause, is seldom, if ever, seen in animals. The reason for this human peculiarity is that the membrane lining the nostrils in man is especially full of blood vessels, the walls of which are weak and easily ruptured by slight causes.

It is usually very easy to recognize nosebleed, but sometimes the blood flows backward into the throat, and then is coughed up, or vomited, and may be thought to come from a hemorrhage of the lungs or stomach, and so cause much needless alarm.

As a rule nosebleed is a thing of slight importance, and stops itself after a little while, but the blood may escape in such quantity, or the bleeding may continue so long, that the patient is greatly weakened. When occurring suddenly, it has usually no significance—though this is not always to be taken for granted—but in older persons it may be a symptom of some other illness, such as the beginning of typhoid fever, or a trouble of the liver or heart.

Nosebleed is one of the common manifestations of that curious condition which is known as a tendency to severe hemorrhage after any slight injury or even without any cause that can be discovered. Children with this predisposition—often called "bleeders"—suffer from it, and it is not infrequently attacks of nosebleed, and sometimes die in one of them in spite of all efforts to control the hemorrhage.

Ordinarily, the best thing to do, for the bleeding usually stops of itself. The child should be made to sit quietly in a chair with the head only slightly inclined forward, just enough to let the drops fall clear of the lips into a basin. All clothing should be loosened about the neck. Ice may be applied to the back of the neck, or ice water may be dashed on the face or made to trickle down the back.

It is useful, also, to insert a little piece of ice into the bleeding nostril—something like a tampon. If the ice is put into the other nostril—and retain it there for a moment or two—or a still better plan is to snuff up a mixture of alcohol and water. If it can be borne, the introduction of cowhairs into the bleeding nostril induces coagulation, or the same purpose may be served by a little wad of tissue absorbed which has been placed apart.

If simple measures fail, the physician should be summoned before exhaustion ensues—YOUTH'S COMPANION.

When wear begins to exceed repair in your body you are going to fall sick. The signs of it are: loss of flesh, pale, weakness, nervousness, etc. The "repair" needed is food. You think you eat enough, and yet you feel that you wear out more, tire, energy, nerve force, than your food makes for you. The difficulty is that you do not digest enough. And this is so serious it is worth sitting down seriously to think about. If you can't digest what you eat, take a few doses of Shaker's Digestive Cordial. The effect of it will be to increase your flesh and make you feel stronger. You won't fall sick. Proof that it is control of your regular apparatus. It's easy enough to test this for yourself. Take a few bottles of Shaker's Digestive Cordial.

Sold by druggists at 10 cents to \$1.00 per bottle.

CHIEF OF POLICE, Colo. March 22.—In an interview here Hon. D. L. Sleeper, speaker of the lower house of the Ohio legislature and a personal friend of President McKinley, said: "I consider war with Spain feasible. The matter has gone so far that diplomacy cannot avert a combat. The struggle will probably be very short. Cuba will be freed, the United States will get whatever indemnity she has demanded, and that will end the matter."
