Tommie, the little squirrel that has during the past few months furnished so much amusement to the proprietor and patrons of the Elito-Tenorsal Parlors turned up his little toes to the dalles yesterday afternoon. At the show Mr. Comminis is at present engaged in carving an appropriate marble slab which will be placed over little Tommie. Left Vancouver. The mustering out of the California volunteers at Vancouver barracks was finished Tuesday afternoon. In spite of the mounting rain a number of friends were at the wharf to bid the men good-bye, for since their arrival last November the men have been very popular, and made many friends among the citizens. None of the officers were able to settle their accounts in time to leave, but all expect to be away before the end of the week. Colonel Carrington has reported by telegraph for assignment to a new station, to be the adjutant-general of the army. He will probably be granted the usual 30 days' leave of absence, and then

The stormy weather which has prevailed during the last few days has clearly demonstrated that our town is infested by numerous hobo and persons who have neither money or a place of shelter. On Tuesday evening a few moments after the sudden storm began eight put in their appearance at the city jail seeking place to spend the night while last evening seven persons were on hand to share the jail. Many of them have no sufficient clothing to protect them from the severe cold and although it may be their fault to a great extent they are in such a condition they are nevertheless objects of pity when we consider the misery they have to endure.

Last Monday the O. R. & N. commenced grading a spur from Hood River to the site of the new sawmill which will be built on the Frank Butcher place at the mouth of Hood River and on the bank of the Columbia, in the near future. The mill machinery which was purchased at La Crosse Wisconsin, is almost ready for shipment. It will be held back however, until the spur is finished so that it can be unloaded at the spot where it will be set up and in this way much trouble will be saved in unloading it from the cars and handling the same. A steamboat dock is also spoken of by the people of that enterprising little town, and if this is built a new wagon road will be constructed which will decrease the distance from the town to the landing one-half, and avoid the hill which at present makes it inconvenient for shipping.
