President. A Washington dispatch says th president on Tuesday again appointed H. H. Riddell postmaster at this place. It appears that Mr. Riddell's name was not sent to the senate until March 2d, a day and a half before adjournment and as there were many other names having precedence, the late hour killed his nomination. The rules governing this case are as follows: A "recess appointment" is similar

in all respects to the regular presidential appointment, only the appointee is not confirmed by the senate. The the payment of arrears to the Cuban president acts in regard to him just as he would were the senate in session. Such an appointment holds good until the adjournment of the next succeeding session of congress, when the term expires, but at that time the president is allowed to re-appoint his choice if he so desires, so that in fact a recess appointment is equal in all respects, at least in matter of time, to the regular appointment and confirmation. An instance of "recess appointment" was witnessed during President Cleveland's second term, when he sent to the senate the name of a man be had chosen for a certain postoffice. The senate refused to confirm the nomines and the president refused to make another nomination. This blocked the power of congress in the matter, and when the senate adjourned. President Cleveland made a "recess appointment," naming the same . man, who held the office until the close of the next session of congress. His term then expired, but the president again came to his aid and reappointed him to the same office, so that in the end while his term was shortened by the time between the rejection of the nomination by the senate and adjournment of congress, the rest of the term was exactly the same as if the senate had acted in compliance with the wish of President Cleveland. In the case of The Dalles, when the presi-

I would do. suggest that the assessor take another whack at it and swipe the other 65 per cent. I have no use for money anyhow, and nobody but a blamed uncivilized Filipino would kick against paying taxes anyway. What are we citizen of this great country for if we can't come cheerfully up to the rack and drop in our share of the fodder? Haven't we forcibly adopted nine millions of tan-colored heathens to whom we offer, at the point of the bayonet, the blessings of freedom? And an't it our Christian duty to set them a cheerful example in citizen ship and show them that the taxpayer

has his reward in the knowledge that it is more blessed to give than to receive? Notice that "dues are now 00 due?" If not, why not? A. GREENHORN. For Self Protection In view of the fact that there is occasional robbery, or some ones house is broken into by burglars in The Dalles, it would be well to form a mutual protective organization, one

through the agency of which criminals might be brought to justice. A plan that would be practicable would be for the business men of the city to agree to pay a stipulated sum for the arrest and conviction of any one committing a depredation within the city, so that a sufficient reward could be offered to induce detectives to ferrit out criminals and bring them to justice. It could be so arranged that in case of a burglary or highway robbery a certain reward should be offered, and the expense thereof assessed according to the amount each one subscribed. Thus the expense would fall lightly upon all; and criminals knowing that a price was put upon their capture, would be careful about com-

mitting depredations here. MINNEAPOLIS, March 16.-United States Senator Xyle of South Dakota said here today while en route home 2 00 information from sources very near has been raining almost constantly

> soldiers could be made has been a fore gone conclusion for several days This morning the Cuban commander visited the governor-general's headquarters by invitation, and the two had a friendly talk on the best means of carrying the distribution into effect. The Meade, which carries the \$3,000. 000 allotment, is expected to arrive here before the end of the week, and after the conference between the two generals was over it was appounced that payment would be begun promptly under the conditions completed in the original settlement with the Washington authorities. This decision virtually disolves the military assambly, for there is now no prospect that the commission appointed vesterday to visit the United States and appeal to the United States for authority to contract a larger loan, can reach the federal capital before the army receives the promised arrears and the process of disbandment begins.

Brown, body: John Jamison, arm. The citizens are patrolling the main street of the town and dispersing an occasional groupe of muttering negroes who seem determined to get some form of revenge for the slaughter of four of their race. The mob was composed of 150 men.

Where they came from is a mystery so

far as the people of the town know.

That some of the people of Palmetto, but not the better class, were in the mob, goes without saying. Every face was masked, and when the warehouse was reached the special guard of five men was covered without a word. In a minute the mob was in the big warehouse and the fusillade opened.

The Race of the Age!

What a race!

The train was just pulling out of Englewood, puffing and panting with its mighty efforts. As it slowly gained speed it came on a lot of tow headed children roosting on a fence, who shouted and waved as the cars came up, and then, as if with a common impulse, every child leaped to the ground and began a race with the train. The race was of short duration. As the

machine left the panting little runners behind, a gray haired oulooker smiling sadly remarked: "Young America all over. Nothing too swift for them to race against." "Yes, you couldn't find a fitter against." "Yes, you couldn't and a nuclear exemplification of the familiar saying, 'The child is the father of the man' than in that group of children racing against the train. It's but a preliminary heat of the great face their parents are engaged in. As a physician I realize as perhaps you do not," he continued, "the erroneous change that fifty years have made in our national life. People point back to grandmothers and greatgrandmothers and say

LOOK AT THEM! Compare them with the women of to-day How straight they were and how strong, how hardy and how helpful they were, how heartily they ate and how heartily they laughed. "To-day, as men and women, millions of us do in earnest what those children did in play; we're keyed up to the straining point all the time, and the nerves won't stand the daily strains and drains without

protest."
There is a ton of solid fact to reflect on suggested by the statement just quoted. What are we going to do? This is the age of steam, the age of electricity. We must keep up in

THE GREAT RACE.

But how long can we keep up? No longer, relatively, than the children kept up their race with the train. What we need is more brawn, more blood and better blood. Strength of body depends on a pure and plentiful blood current, for science has never advanced a fact beyond the statement of Moses that "The Blood is The Life." But every generation of investigament of Moses that "The Blood is The Life." But every generation of investigation shows the statement to be true in a wider, deeper, and broader sense than was dreamed of in the past. Dr. Pierce's Golden Medical Discovery begins at the beginning with the blood. It cures practically a wide range of diseases because many forms of disease have their origin in the blood. It is a scientific compound based, not upon theory but upon the practical. common sense proof that if you purify, enrich, and vitalize the blood you overcome disease in any organ. The "Golden Medical Discovery" heals disease in just this way. It begins first of all "Golden Medical Discovery" heals dis-ease in just this way. It begins first of all to strengthen the body through the blood, and every ounce of new blood and pure blood counts against disease.

"It was near the little town of Leroy, W. Va., and during the month of March, 1856, that a young man lay pale and motionless upon (what the neighbors called) his dying bed. 'Disease of the lungs, liver complaint, kidney trouble, and pleurisy were fast hastening him to the grave. The doctors had given him up to die. The neighbors said, 'he cannot live,' 'Oh, I would not care to die,' he said, 'were it not for the control of the control of the liver.' would not care to die, 'he said, 'were it not for leaving my dear wife and little child, but I know that I must die.' A brother had presented him with three bottles of medicine, but he had no faith in 'patent medicines,' but, after the doctors had given him up to die and he had banished every hope of recovery, he said to his wife, 'Dear wife, I am going to die, there can be no harm now in taking that medicine. I will begin its use at once.' He did begin, to use it and at first he grew worse, but soon there came a change. Slowly but surely he got better. To-day that man is strong and healthy and he owes his life to that medicine. What was the medicine? It was Dr. Pierce's Golden Medical Discovery, and I, Luther Martin, am the cured man. Dr. Pierce, I thank you from the very depth of my heart, for rescuing me from the grave." The foregoing is from Luther Martin, Esq., a prominent citizen of Lubec, Wood Co., W. Va.

scribed my case.

Inch Pierce's Golden Medical Discovery an 'Pellets.' I did so and after using one bottle could sleep better and felt better. After usin six bottles of the 'Golden Medical Discovery and two vials of 'Pellets,' I find myself gains in fiesh and I am almost entirely cured."
