questions in the box. He continued to annoy the teacher by getting other pupils to deposit questions which he he had written or which they had written at his suggestion. Finally, to shut him out of the game altogether, the school towel (it is lucky it wasn't a printing office towel) was used to gag him, by fastening it around his head, over his mouth. His hands were then tied behind him, and he was looked upon as disposed of for the time being. All the same some of his questions found their way into the hox, and on examination it was found that he had gnawed a hole through the towel, swallowing the section cut out, and was thus enabled to whisper sugges tions to a pal "who did the rest." Just whether to abolish the question box or to expel the boy is what is now 

troubling the teacher.
