Lee Advises.

CHICAGO, Sept. 1 .- A special to the Times-Herald from Washington says: General Fitzhugh Lee has made an elaborate report on prevailing conditions in the territory in Cubs under his jurisdiction, and takes strong ground for an independent Cuban government under an American protectorate. The war department in March directed the commanders of the departments in Cuba to make a report on the conditions of their several sections, and to accompany it with recommendations as to the treatment of the natives. General Lee is the only commander who has so far re-General Lee begins his report stat-

He goes into this in great detail, taking up the subject town by town, and showing a general improvement throughout the in this retpect is very gratifying, inoften reported in unofficial reports.

Turning to recommendations, General Lee urges the taking of self-gov ernment. General Lee thinks that the next steps should be the careful consideration of the question of suffrages for the Cubans. He takes it for granted that there will be elections by the natives, and he points out the importance of wise action in determining the qualifications of voters. He recommends an independent re-

publican government, with a president, vice-president and a congress. He would have this established soon, and advises the holding of a general election for the selection of those officers. after its installation in office.

PENDLETON, Or. Sept. 1 .- By th introduction of the big now pattern of threshers the work of separating grain from the straw has undergone a change in this country. A few years ago a good day's work ot threshing was 1500 to 1800 bushels. Now there are threshing machines at work that turn out from 1500 to to 2000 sacks, according to the condition of the straw. When the straw is a trifle tough, the day's work is only about 1500 sacks, or more than 3000 bushels. When the straw is in prime condition, dry, the big machines are the principal causes. Karl's Clover threash 2000 sacks every day they are Root Tea has cured these ills for half without injuring any person.

Two thousand sacks will make on the average about 4350 bushels, as the sacks overrun two bushels considerably. The combine harvesters, which cut thresh and sacks the grain as the ma chine moves along the field, get away with 80 acres in a day, which is equal on an average of 25 bushels to the acre, to 2000 bushels. The big stationary threshers, separating 2000 sacks in a day, are disposing of one quarter of section of land.

can Revolution.

NEW YORK, Sept. 1 .- A dispatch the Herald from Santo Domingo says: There is little doubt that Jimmines will succeed to the presidency as soon as he arrives. The peace and tranquility which pervade the city are in marked contrast with the conditions that existed a few days ago and show how popular the revolution is with the masses. Apparently the entire island is satisfied that the change in government promises improved conditions. It is believed that all fighting is over and that with the arrival of the leaders of the revolution on Sunday to take charge of the government all cause for alarm will have been removed.

Yesterday was the climax to the government. The government was powerless to retard the progress of the revolution. Word had come that all the principal towns in the interior on the north side had gone over. Added to this had come news that another hurricane was forming and that the United States cruiser New Orleans foreign residents would be left to the

Argogula Taken.

MANILA, Sept. 3 .- Argogula, the the most impregnable stronghold of the bands which have been destroying plantations and levying tribute on the people of Negros, was taken Thursday by the Sixth infantry, under Lieutenant-Colonel Byrne. The only means of reaching the town was up a perpendicular hill, covered with dense shrubbery and 1000 feet high. The Americans accomplished this under fire, although an officer and several men were hit and rocks were rolled down upon them. The native strength was estimated at 400. Many of the rebels were wounded and captured and 21 were killed. The American forces captured a quantity of stores and destroyed the fortifications.
