In tracing the transfers of the various portions of the western country until the present limits of the United States were determined, Mr. Gannett finds that this government came inte possession of the region now divided into Washington, Oregon, and Idahc through a pure game of bluff. It is certain, he says, that the territors of Louislana, as first and subsequently defined, never included that section.

France transferred the territory of Louisiana to Spain in 1762. A few months later, in a treaty, the western boundary of Great Britain's possessions was made the center of the Mississippi, and thus the territory of Louisiana lost all the land east of the Mississippi.

Joe Goss was "covered" a few weeks ago and he tumbled, and so did Dan Mace. Death "fetched 'em'" with that which, drawn promptly, always takes the prey. It is doubtless true that sporting men dread this enemy more than any mishap of their profession, and presumably this explains why they as a rule are so partial to that celebrated "dead shot."

Redmond was right. No man should surrender when attacked in the back. He should "draw" face about and proceed to the defense, for such attacks, so common among all classes, will fetch a man every time unless "covered" by that wonderfully successful "dead shot."-Sportsman's News.

that so many people sink into untimely graves when we consider how they neglect their health. They have a disordered Liver, deranged Bowels, Constipation, Piles or diseased Kidneys, but they let it go and think they "will get over it." It grows worse, other and more serious complica-tions follow and soon it is too late to save them. If such people would take Kidney-Wort it would preserve their lives. It acts upon the most important organs purifying the blood and cleansing the system, removes and prevents these disorders and promotes health.
