Noses.

Each race and people admire its own style of nose. The Semitic nose has never been associated in our minds with beauty, yet we are spoken of contemptuously by the Arabs and Syrans as "Flat-nosed Franks." Shakespeare, on the other hand, must have thought a Turk's nose most abominable, for he takes care to have it thrown into the witches' hell-broth in "Macbeth." The Africans are proud of their broad, flat nose, and some tribes even insert artificial objects to increase their pet deformity.

The powers of oratory of U. S. Senator Voorhees, of Indiana, are universally acknowledged. Where even in Demosthenes could there be words more eloquent than these? "I consider St. Jacobs Oil a splendid remedy. I suffered from rheumatism of the back. I used St. Jacobs Oil, which gave me instanteous relief, and then cured me."

HOUSETOPS OF NEW YORK.

What a Bird's-Eye Study of Them Reveals.

From the New York Sun.

There are half a dozen points from which they can be seen—Trinity steeple, the Field building, the Produce Exchange tower, the Equitable Company's roof, and the flat, broad ridge pole of the Western Union building. But the most popular and comfortable point of view, and the only one that affords a good view of Brooklyn in the bargain, is the East River bridge. From the highest point on the curving foot path one fully realizes the fact that nearly 250,000 roofs lie below—100,000 in Brooklyn and 135,000 in the principal city.

At first the scene is bewildering, and the eye refuses to bring instant order out of the confusion of chimney-pots, pipes, signs, poles, wire, and sheets of tin and slate; but a minute of fixed attention straightens the tangle out, and the spectator is able to scan the scene intelligently, especially when he takes note of a section of it at a time. Myriad threads of smoke, scores of towers, and steeples, a forest of railings and posts, and countless flapping flags helped the first bewilderment, and this was further increased by the misty indistinctness of those most distant roofs which seem to lie close under the palisades and bebond the blurred foliage of Central Park.

In what is left of Old New York there are many pitched roofs rising from low gutters to high ridge poles, and among them are some that are covered with bent earthenware tiles. A long line of these on Fulton street calls to mind the views artists have sketched of street scenes in Antwerp.

Less precipitous housetops, coated with shingles, are to be seen on every hand when the eye turns toward Brooklyn. There the brightest spot in all the broad expanse spread out on every hand is a line of luxuriant gardens between the Fulton and Wall street ferries. The gaudy flowers and umbrageous trees, the garden paths, summer houses and squares of green lawn mislead the senses into the belief that this is a row of ordinary gardens, yet these are merely the roofs of the riverside storehouses covered with earth and planted with vegetation. The roofs of these storage buildings reach to the basement of the mansions of Columbia heights, and the rich residents there would have no gardens if these roofs were left bare. Rounded green treetops, shivering in the breezes, peep between the roofs all over Brooklyn.

Close to the bridge on the New York side are many blocks of tenements, and their roofs are very interesting. Nearly all are fenced in at the sides, and many of them are boarded over. Modern roofs are nearly flat, and tenement roofs in such crowded districts as this are equipped with clothes poles and lines from which drying garments are always waving, for since each family has the use of the line on its own particular day of the week, it may be said to be always washday in these neighborhoods. But the tenement roofs are too precious to be given up to clothes-drying exclusively.

They offer a delightful retreat from the close and stifling atmosphere of the crowded buildings. So it happens that those who cross the bridge at daybreak in the summer time often see men and boys stretched out asleep upon the bare boards or upon mattresses brought up there for the purpose, and during the last hour of daylight, when all the young people are home from the workshops, one frequently sees young men and women whirling over the boards to the music of an accordeon in the hands of a youth seated out of the way of the dancers on the stone coping of the side wall of the building.

On other tenement roofs, seated in the shadows of dry sheets or counterpanes, are sewing women and groups of talkative girls, while perched on chimney tops or on the very edge of the lofty platforms, little boys send their kites up into the sluggish air currents overhead. Shrewd advertisers who have noted the advantages of places in the range of near vision from the busy bridge, have painted on other roofs the names of patent medicines, new sewing machines, and other wares, and other roofs are otherwise utilized for business. One is given up to racks for drying pottery, another to long lines of split canes for chair seats. Hides hang on frames on yet another roof, and here and there the sun touches the slanting window of of a photographer's ceiling and turns it into a sheet of dazzling light.

At night nearly all the roofs are shadowy and dark. The towers and chimneys show indistinctly above a dim line of dull brown. One roof, however, is distinguished among all others. It seems to be covered with a mass of little yellow globes. It is the top of an uptown theatre littered with tables, chairs and flowering plants in pots and boxes. The little globes are lamps arranged in arches overhead to illuminate this aerial garden. Landlords are beginning to utilize their roofs now that open air is so scarce and so highly prized. On Cyrus W. Field's new building the roof is used for a restaurant, and the roof of the great roller skating hall, soon to be erected up town, is to be one of the main attractions in the project. Trees, plants and flowers will ornament it, and there will be music and eating and drinking amid the leaves and blossoms there.

France is Not Prosperous.

Allowing for the million and a half taken away by Germany, the population has made no progress at all since 1860. Its numbers are smaller now than they were fifteen years ago, while the load of taxation has almost doubled —in mere charges it has much more than doubled. Equally stationary has been the export trade. The average of recent years has indeed been lower than for the years immediately succeeding the war. Imports have, on the other hand, augmented much, but not because the country has been internally prosperous. The increase is the consequence of bad harvests, and indicates a further denudation of the wealth of the people.

WHAT

WARNER'S SAFE CURE

CURES AND WHY.

CONGESTION OF THE KIDNEYS, BACKACHE.

INFLAMMATION OF THE KIDNEYS, BLADDER OR URINARY ORGANS.

Catarrh of the Bladder, Gravel, Stone, Dropsy, Enlarged Prostate Giand, Impotency or General Debility, Bright's Disease.

WHY? Because it is the **only remedy known that has power to expel the uric acid and urea,** of which there are some 500 grains secreted each day as the result of muscular action, and sufficient if retained in the blood, **to kill six men.** It is the direct cause of all the above diseases, as well as of Heart Disease, Rheumatism, Apoplexy, Paralysis, Insanity and Death.

This great specific relieves the kidneys of too much blood, frees them from all irritants, restores them to healthy action by its certain and soothing power.

IT CURES ALSO Jaundice, Enlargement of the Liver, Abcess and Catarrh of the Bile Ducts, Biliousness, Headache, Furred Tongue, Sleeplessness, Languor, Debility, Constipation, Gall Stones, and every unpleasant symptom which results from liver complaint.

WHY? Because it has a **specific and positive action** on the liver as well as on the kidneys, increasing the secretion and flow of bile, regulates its elaborating function, removes unhealthy formations, and, in a word, restores it to natural activity, without which health is an Impossibility.

IT CURES ALSO Female Complaints, Leucorrhoea, Displacements, Enlargements, Ulcerations, Painful Menstruation, makes Pregnancy safe, prevents Convulsions and Child-Bed Fever and aids nature by restoring functional activity.

WHY? All these troubles, as is well known by every physician of education, **arise from congestion** and impaired kidney action, causing stagnation of the blood vessels and breaking down, and this is the beginning and the direct cause of all the ailments from which women suffer, and must as surely follow as night does the day.

WHY Warner's Safe Cure is acknowledged by thousands of our best medical men to be *the only true blood purifier*, is because it acts upon scientific principles, striking at the very root of the disorder by its action on the kidneys and liver. **For, if these organs were kept in health all the morbid waste matter so deadly poisonous if retained in the body, is passed out.** On the contrary, if they are deranged, the acids are taken up by the blood, decomposing it and *carrying death* to the most remote part of the body.

WHY 93 per cent. of all diseases which afflict humanity, arise from impaired kidneys, is shown by medical authorities. Warner's Safe Cure, by its *direct action*, positively restores them to health and full working capacity, **nature curing all the above diseases herself** *when the cause is removed*, and we guarantee that Warner's Safe Cure is a positive preventive if taken in time.

As you value health take it to **avoid sickness,** as it will at all times and under all circumstances keep all the vital functions up to par.

We also **Guarantee a Cure** and beneficial effect for each of the foregoing diseases, also that every case of Liver and Kidney trouble can be cured where degeneration has Not taken place, and even then Benefit will Surely be Derived. In every instance it has established its claim.

AS A BLOOD PURIFIER, particularly in the Spring, it is unequalled, for you *cannot have pure blood* when the kidneys or liver are out of order.

Look to your condition at once. *Do not postpone treatment* for a day nor an hour. **The doctors cannot compare records with us.** Give yourself thorough constitutional treatment with Warner's Safe Cure, and there are yet many years of life and health assured you!

"ROUGH ON PILES."

Is It Really Consumption?

Many a case supposed to be radical lung disease is really one of liver complaint and indigestion, but, unless that diseased liver can be restored to healthy action, it will so clog the lungs with corrupting matter as to bring on their speedy decay, and then indeed we have consumption, which is scrofula of the lungs, in its worst form. Nothing can be more happily calculated to nip this danger in the bud than is Dr. Pierce's "Golden Medical Discovery." By druggists.

"A Great Victory"

A Terrible Case of Scrofula Cured by Hood's Sarsaparilla.

"In the winter of 1879 I was attacked with Scrofula in one of the most aggravating forms. At one time I had no less than 13 large abscesses over and around my neck and throat, continually exuding an offensive mass of bloody matter disgusting to behold, and almost intolerable to endure. It is impossible to fully describe my sufferings, as the case was complicated with chronic catarrh. After three years of misery, having been treated by three physicians, I was worse than ever. Finally, on the recommendation of W. J. Hantley, druggist, of Lockport, I was induced to try Hood's Sarsaparilla. And now, after having taken 12 bottles within the last twelve months, the scrofulous eruptions have entirely ceased, and the abscesses have all disappeared, except the unsightly scars, which are daily becoming smaller by degrees, and beautifully less. I do not know what it may have done for others, but I do know that in my case Hood's Sarsaparilla has proved an effective specific indeed." CHARLES A. ROBERTS, East Wilson, N. Y.
