Break-U'-Day Tonic.

When there are no storms, everybody is a good mariner. To many the full value of happi-

۲.

ness is not realized without a showy · setting.

Some men are a good deal like the beer they drink-all froth and no substance.

It is commendable to work for something, but better to be honest when you have won.

Often is the result of a false step more to be endured than others' comments upon it.

Good principles are tenacious, and tenacity in the right direction makes good principles.

Most people are charitable as far as sympathy goes, but few have the kind that costs money.

Jealousy strikes at others and wounds itself, which shows that jealousy is near-sighted.

More than one man has, astride of his hobby, paraded it up and down, only to return on foot.

To swear will not help on your plans. Swearing may convince you, but it never will others.

I have always preferred to give free advice rather than boarding and lodging at the same tariff rate.

Nothing is so easy as detecting in your friends the faults that you are most familiar with yourself.

I despise egotism, and yet a limited amount of confidence in one's self lends confidence in self to others.

People who cultivate a view of thought best adapted to make them miserable generally succeed.

Most people are good theorists, but few profit by theory, and they are the ones who reduce theory to practice.

It seems to be a sort of soothing syrup with many to lay their ill luck to circumstances "over which 'we' have no control."

Experience is the lot of all, and is our best instructor. However, but few are willing to be taught, and a large majority are trying to beat experience.

The safest rule that I know of is to be faithful at present work, so that when accomplished the result of past efforts will guarantee us, when found, for better things.

All the recorded truths, all the timely warnings in the world, coupled with good counsel, will not deter some from folly so effectually as once realizing its real and evil effects.

To allow others as much credit for integrity as they claim is good doctrine, but to give them a thirty days' trial before you turn your business over to them is better sense.

It is better to have a harp with one string, and know how to produce upon it its fullest note, than one with a thousand strings whose only echo that follows the touch is a discordant one.

The worst kind of lies are those which have a semblance of truth about them, and the worst kind of liars are those who reduce the practice to a science, and render it more plausible | tain cure for all those disorders to which than the truth.

No doubt many of us would be surprised to learn that out of all the good barge of progress. and evil spoken of us that the good exceed the evil words, yet I believe they do. Humanity doesn't get sufficient credit for benevolence. In order to get assistance from others in this world it is best to appear satisfied with what little they do for you, even if you are not. Show your appreciation for small helps and you stimulate them to do more. I do not believe there are any people in heaven who never committed an error but lived perfect lives here on earth. If I reach there and find myself mistaken I shall ask to return, even with harps going and angels singing. Any man who begins life honestly merits respect; he who remains honest is a man of a thousand and the man who can leave this world with the respect for his honesty unchanged is justly crowned with veneration .- Chicago Ladger.

A Wonderful Clock.

A clock manufacturing firm in Calcutta, India, have lately completed a very ingenious time-piece in the shape of an eightday clock, which strikes the hours on a large, full-toned gong and chimes the quarters on eight bells. In connection with the clock there is a perpetual calendar which Maine, 89 eggs to each hen; Massachusetts, gives the correct days of all the various months, including the twenty-nine days of Rhode Island, 76; Vermont, 60; Pennsyi-February in the leap year.

There is also a military procession worked by the clock, representing various branches 42; North Carolina, 42; South Carolina, 37; of the British army, consisting of artillery, cavalry and infantry, and the staff in review order. There is also a sentry on duty who salutes a drummer, who beats the drum, and bugler who raises his bugle to Don't sigh with pains or burns or accihis mouth every lew minutes. All of these figures are arranged at the top of the dial. There is also a musical instrument, which

plays while the procession is marching in review. Near the bottom of the clock is placed a

military band which is concealed by a curtain, and which is raised every hour when the music is playing and the procession and a cloggling up of the liver. To correct moving, and falls again immediately after the clock has struck, and remains drawn vent these diseases use DR. WALKER'S CALuntil the next hour.

The case, made of chonized mahogany, is about six feet high, three feet six inches wide, and two feet six inches deep, highly ornamented with brass trimmings. The circles on the dial to show minutes, hours, days of the month, etc., are engraved and silvered. The center and sides of the dial are richly enameled. At the sides of the case are massive brass ornamental handles and ornamental fretwork.

Many sink into an early grave by not giving immediate attention to a slight cough, which could have been stopped in time by a 25-cent bottle of Dr. Bull's Cough Syrup.

Pack the Lungs With Air.

Deep breathing and holding of the breath is an item of importance. Persons of weak vitality find an uninterrupted succession of deep and rapid respiration so distressing that they are discouraged from persevering in the exercise. Let such persons take into the lungs as much air as they can at a they will find a grateful sense of relief in the

whole abdominal region. Practice will increase ability to hold the breath and the capacity of the lungs. After a time the art may be learned of packing the lungs. This is done by taking and holding the long

breath and then forcing more air down the trachæ by swallows of air. The operation may be described by that of a fish's mouth in water. To those who have never learned

it will be surprising to what extent the lungs may be packed. Caution at first is needful, but later practice will warrant large use of the treatment. The whole thoracic and abdominal cavities will re-

ceive immediate benefit, and continuance and temperance in eating, good air and right exercise, will bring welcome improvement .- [Herald of Health.

INVALIDS' HOTEL M SURGICAL INSTITUTE

No. 663 Main Street, BUFFALO, N. Y.

Not a Hospital, but a pleasant Remedial Home, organized with

A FULL STAFF OF EIGHTEEN PHYSICIANS AND SURGEONS.

And exclusively devoted to the treatment of all Chronic Diseases.

This imposing Establishment was designed and erected to accommodate the large number of invalids who visit Buffalo from every State and Territory, as well as from many foreign lands, that they may avail themselves of the professional services of the Staff of skilled specialists in medicine and surgery that compose the Faculty of this widely-celebrated institution.

A FAIR AND BUSINESS-LIKE OFFER TO INVALIDS.

We earnestly invite you to come, see and examine for yourself, our institutions, appliances, advantages and success in curing chronic diseases. Have a mind of your own. Do not listen to or heed the counsel of skeptical friends or jealous physicians, who know nothing of us, our system of treatment, or means of cure, yet who never lose an opportunity to misrepresent and endeavor to prejudice people against us. We are responsible to you for what we represent, and if you come and visit us, and find that we have misrepresented, in any particular, our institutions, advantages or success, we will promptly refund to you all expenses of your trip. We court honest, sincere investigation, have no secrets, and are only too glad to show all interested and candid people what we are doing for suffering humanity.

NOT ALWAYS NECESSARY TO SEE PATIENTS.

NOT ALWAYS NECESSA

The our original system of diagnosis, we can treat many chronic diseases just as successfully without as with a personal consistention. While we are always glad to see our patients, and the second second and the system of treatment, yet we have not associated whom we have cured. The personal multilation is minuted by the system of treatment, yet we have not associated whom we have cured. The personal constantiation is the system of treatment, yet we have not associated whom we have cured. COMMON SENSE AS APPLIED TO MEDICINE.

It is a well-known fact, and one that appeals to the judgment of every thinking person, that the physician who devotes his whole time to the study and investigation of a certain class of diseases, must become better qualified to treat such diseases than he who attempts to treat every ill to which flesh is heir, without giving special attention to any class of diseases. Men, in all ages of the world, who have become famous, have devoted their lives to some special branch of science, art, or

A Remarkable Accident.

A pacific coast paper records the following remarkable accident; "On Saturday, the 18th inst., a 250 pound fragment of a stump that was blown out of the ground with giant powder. near Tacoma, W. T., flew past Mr. F. Frazier, who was witnessing the process from a standpoint 420 feet away. It struck the ground close by him, just grazing him, yet so graet was its force that it tore his clothes from his body, rent his boots so that his feet were left bare, crushing the bones of both feet. Mr. Frazier, who is 60 years of age, was completely paralyzed by the blow, and was insensible for twenty minutes. With the exception of being partially crippled in his feet, he will suffer no serious inconvenience from the accident,"

A Big Bakery.

A monster bakery is about to be erected in Moscow, which, it is stated, when in working order, will reduce the present price of bread in that city by something like 25 per cent. This enterprise is in the hands of a company disposing of a capital of 400,000 roubles, raised in shares of 1,000 roubles each. The cost of building the necessary premises, together with the requisite steam appliances for the company, is estimated at 250,000 roubles. The quantity of bread to be baked daily is set down at 65,000 kitos. Rye as well as wheaten bread will be baked and daily dispatched to forty different commodious shops in the city to be sold. The whole of this vast mass of bread is to be baked in tive separate ovens.

Nigh Unto Death.

And yet there are some people whom the graveyard impresses. 1 heard a tot telling a story to an older campanion that seemed, on the face of things, to be improbable.

"Are you sure that is the truth?" asked the companion.

"Yes, indeed," with an injured air. "You don't think I'd tell a lie in a cemetery, do you?"-Pittsburgh Chronicle.

An illustrated treatise on Rupture sent to any address upon receipt af ten cents. Organic weakness, nervous debility, premature decline of the manly powers, involuntary vital losses, and kindred affections, are speedily, thoroughly and permanently cured. To those acquainted with our institutions it is hardly necessary to say that the Invalids Hotel and Surgical Institute, with the branch establishment located at No. 3 New Oxford Street, London, England, have, for many years, enjoyed the distinction of being the most largely patronized and widely celebrated institutions in the world for the treatment of these affections which arise from youthful indiscretions and permittions, solitary practices. We, many years ago, established a special Department of some of the most skillful physicians and surgeons on our Staff, in order that all who apply to us might receive all the advantages of a full Council of the most experienced ander the avoing so much atten-

That all who apply to us might receive all the advantages of a full Council of the most experienced medical men. WE OFFER tion to this neglected class of diseases, believing NO APOLOGY, no condition of humanity is too wretched to merit resion to which we belong. Many who suffer from these terrible diseases contract them innocently. Why any medical man intent on doing good, and alleviating suffering, should shun such cases, we cannot imagine. Why any one should consider it otherwise than most honorable to cure the worst cases of these diseases, we cannot understand; and yet of all the other maladies which afflict mankind there are probably none about which physicians in gen-eral practice know so little. We fully agree with the celebrated Dr. Bartholow, who says, "I think it a reproach to our profession that this subject has been permitted, in a measure by our own indifference, to pass into the hands of unscrupulous pretenders. Because the subject is disa-greeable, competent physicians are loath to be concerned with it. The same unnecessary fastidlousness causes the treatment of this malady to be avoided in private practice." We shall, therefore, continue, as heretofore, to treat with our best consideration, sympathy, and skill, all applicants who are suf-fering from any of these delicate diseases. Our Complete and Illustrated Treatise on these subjects is sent to any address on receipt of ten cents in stamps.

ALL CHRONIC DISEASES A SPECIALTY.-Although we have, in the preceding paragraphs, made mention of some of the special aliments to which particular attention is given by the specialists at the Invalids' Hotel and Surgical Institute, yet the institution abounds in skill, facilities, and apparatus for the successful treatment of every form of chronic aliment, whether requiring for its cure medical or surgical means. All letters of inquiry or of consultation should be addressed to

WORLD'S DISPENSARY MEDICAL ASSOCIATION. 663 Main Street, BUFFALO, N. Y.
