The Pine Creek Mines.

A correspondent writing to the Oregonian from Cornucopia, says:

"In twenty-five years' observation and experience in California, Nevada, Utah and Arizona, I have never seen a mining district where the conditions for the economical reduction of ores were as perfect as they are here.

There are few water power quartz mills on this coast, because there are few mining districts where the nearest stream is convenient to the mines, and to being water a long distance through flumes and pipes, and to keep these in order is often more expensive than to erect and run steam power.

Arrangements are being made to put on a stage and freight line from this city to Cornucopia, as soon as the road is completed, which will, probably, be in about three weeks.

Union county has territory enough to support three counties.—Santini.] True enough, pard, if "territory" is all that is needed to "support" a county.

The people of this place were treated, last Friday evening, to a very able and interesting lecture on the labor question, by Mr. J. Dolby of Big Creek.

The Rev. Mr. Norton finished, last week, a series of five lectures on the prophecies of the bible. Although differing from him in our views, it is conceded, by all who listened to him, that he made a very able argument, and proved his points admirably.

The Land Pirate of Murray Gulch and hero of the Blue Bucket diggings was seen passing through the Park, last week, riding in his chariot and drawn by his blooded bays. By his careworn and haggard expression, we should judge that the gold fever had not been broken on him since '49. Cove papers please copy.

Joseph Jottings. June 12th, 1886. The Wallowa Italian Marble Co. are making a big showing on their find. The marble is improving in quality as they go down.
