

The Oregon Scout.

UNION, OREGON, SAT. AUG. 7th 1886.

TO ADVERTISERS.

The SCOUT has a much larger circulation than any paper in this section of the State, and is, therefore, the BEST ADVERTISING MEDIUM.

The farmers in extensive districts in Illinois have made an agreement to sow no wheat for three years. They want to starve the cinch bug out. It is our opinion, however, that the farmers will get badly "cinched" in the operation.

The Legislature of California has been asked to make the 3rd and 4th of August legal holidays in account of the Grand Army. That's right. If there is anything the average American citizen is yearning for at present it is more holidays.

ANARCHISTS are being expelled from all the trades' unions and societies in the United States, and the Knights of Labor fire them out with but very little ceremony. Honest workmen will not affiliate with anything so dangerous and un-American.

THERE is responsible talk in Pennsylvania of putting General Master Workman Powderly in Congress. We hope it will be done. His presence there supported by practical students of the labor question, like himself, would have a wonderfully wholesome effect.

W. W. BAKER, State Dairy Commissioner is going after the milkmen who feed their cows on brewers waste. His arguments are calculated to show that milk produced from such food is unhealthy. This may be all true enough, but the cows will undoubtedly object to this unwarranted effort to force prohibition upon them.

AN extensive deposit of tin ore has been discovered in the Black Hills; the only one in the Western Hemisphere that amounts to anything. This body of ore is said to cover an area of 700 square miles, and can be converted into merchantable tin by a process divided into four steps, and requiring the aid of four persons. While the tin found in Wales requires to go through a process of one-hundred steps and requiring the aid of 100 persons. The importance of the find can be better understood when we call to mind the fact that America imports \$30,000,000 worth of tin per annum. Chicago will be the milling center of this industry.

THE treasury department at Washington has issued the following circular in regard to mutilated coin: The superintendents of the United States' mints at Philadelphia, San Francisco and New Orleans will pay for mutilated and uncurrent United States' silver coin, when presented in sums of \$5 and upward, at the current price as fixed from time to time by this bureau to be paid for silver contained in, and parted from, gold deposits—that is reckoned per Troy ounce of 300 fine. Payments will thus be made for deposits of mutilated coin at the mint rates for standard silver current on the date on which such deposits are received.

THE Chinese newspapers convey the information that the government at Peking has issued orders to all subordinate governments throughout the empire to discourage and as far as possible, the smoking of opium in any form among the people under their jurisdiction. The government views with alarm the rapid growth of the opium habit among its subjects and will take steps to prohibit the importation of the drug. These papers also publish the full text of the decree lately promulgated from Peking that no student will hereafter be allowed to graduate or pass examination in the degree who are addicted to the opium smoking habit.

It will not be a great while before Portland, heretofore the metropolis of the Northwest, will have her claims contested by Tacoma on Puget Sound. Already the rumble of the coming contest is heard. The Tacoma papers freely acknowledge that the Columbia river bar is the most dangerous place on the coast, and a man almost takes his life in his own hands, when he attempts to cross it. The Portland papers retaliate by naming the wrecks that have occurred in the Straits of Fuca, and giving it as their opinion that it is not as safe as it might be. Portland, however, is situated in an unfavorable position as it is possible to be, and whatever trade or prestige it enjoys is due solely to the maneuvering of her business men, and has been brought about by artificial means. Tacoma, on the contrary, has every natural advantage. In a regular setto between art and nature it is very probable that nature, in the long run, will come out on top.

Answers to the question now being discussed by the county commissioners regarding the best method of taking care of the county poor, and the advisability of establishing a county poor farm, would it not be a good idea for them to communicate with the commissioners of other counties where farms of this kind are being conducted and ascertain their views on the subject. A Umatilla exchange says: "A year ago, before the county farm was disposed of, Umatilla's paupers cost the county about \$7000 a year." We judge from this brief item that the experience of the Umatilla county authorities, has not proved favorable to this method of taking care of the county poor.

IN THE FORUM for July, a crank by the name of J. H. Saelve discusses at considerable length, the question: "Should the State teach religion?" That such an idea should be deemed worthy of sober discussion in the nineteenth century proves conclusively that the State's endeavor to teach common sense through the medium of the public schools has not been as successful as could be wished.

"It is just as well," says the Boston Globe, "to call things by their right names. The battle of the lawyer senators (Mitchell of Oregon prominent among them) against the Beck bill is a battle for bribery and bribe-taking. When subsidized railroads employ the services of members of Congress, they simply buy the votes of the members retained. Only that and nothing more."
