LADIES

Are particularly susceptible to nervous disorders, owing partly to their more delicate nervous organization and partly to their sedentary life and consequent confinement in doors. Such affections are attended by restlessness and nervous excitement, anxiety or depression of the mind, loss of interest in society and the daily affairs of life. There is also loss of sleep; the patient on rising in the morning, feeling tired, languid and unrefreshed. From slight nervous attacks to hysteria, from simple "nervousness" to utter prostration, there are many and varied forms of diseases of the nervous system none of which should exist, and of all of which can be cured by the use of

Dr. Pardee's Remedy

Which first stimulates the liver and kidney's to healthy action, regulates the digestive organs, and from the first dose begins its work of purifying and building up the worn-out system. It produces sweet and healthy sleep, enriches the blood, and imparts to the pale and sallow cheeks the glow of health, brings brightness to the eye and elasticity to the step. More real benefit can be derived from one half dozen bottles of Dr. Pardee's Remedy, than from a hundred dollars invested in any other way.

Ask your druggist for it, and take no other.

Patents

Obtained, and all Patent Business attended to Promptly and for Moderate Fees. Our office is opposite the U. S. Patent Office, and we can obtain Patents in less time than those remote from Washington. Send MODEL or DRAWING. We advise as to patentability free of charge; and we make NO CHARGE UNLESS PATENT IS SECURED. We refer, here, to the Postmaster, the Sup. of Money Order Div., and to officials of the U. S. Patent Office. For circulars, advice, terms and references to actual clients in your own State or County, write to

C. A. SNOW & Co., Opposite Patent Office, Washington, D. C.

Exhausted Vitality

is a frequent and distressing disease, its depressing influence being felt alike on both sexes and all ages. Among the first symptoms of this affection are usually a derangement of the digestive organs. A feeling of languor will be experienced, and a gradual falling of strength, with general weakness and pain in the back. More or less exhaustion is experienced on waking in the morning. There is often a bad taste in the mouth; the vision becomes dim, the memory is impaired, and the patient is troubled with frequent dizziness. Persons thus affected are often despondent, and suffer from gloom and depression of the mind. The nerves become so weakened that the least excitement or shock brings on a tremor or trembling, often attended by palpitation of the heart.
