the medicine can strike the upper part of the stomach, where they work, will cause them to cease their attacks; that linseed oil will kill them, etc. As this is a subject that intereste all farmers and stockmen, perhaps somebody will enlighten us and give us some sensible reasons. At present to see is to be convinced—and we have no doubt the *botts do kill.*

County Supt. J. L. Hindman recently passed through our valley, and, if we are rightfully informed, at the residence of Mr. Isaac Lloyd, where he stopped, he made the assertion in the presence of Mr. Lloyd and others that the "Teachers in district No. 30, Pine valley, never had any certificates." As there has never been but two teachers in this district since it was organized as a school district, and as I (have to fall back to the pronoun I for a time) happen to be one of those teachers, I feel it unjust, to submit without a word, to such a statement. My certificate upon which I taught in district No. 30, one year ago, is a first grade certificate, granted by F. B. Collins Co. Supt. to my maiden name of Allie McComas, with a general average of 92½ (only 80 is required) and renewed by Supt. Hindman, and held good until May 22nd 1887, since which time I have not taught. The directors —or at least the one who hired me to teach—saw my certificate, and any other parties wishing to be convinced may do so by calling at my home, and may also see others granted by Rev. G. Hampton Co. Supt. of Johnson county Iowa; Prof. Parvin, of Iowa State University; others in Oregon granted by —— White, L. J. Rouse, Terry Tuttle, J. T. Outhouse and Frank Collins, and two from some of them, and only one second class in the whole bunch—that given me when I was only sixteen and had never taught, and it was not customary, so the superintendent said, to give a first class to one so young. Upon that certificate I did not teach. Mr. Hindman must have a very short memory, to forget so easily what certificates he grants or renews—and by the way in all my teaching, and I have taught in Iowa, all over Grand Ronde valley, in La Grande, Oro Dell and Union, I never had but one other certificate renewed. If our Co. Supt. would visit the schools in Pine—a thing he has never done although the law requires it—he would know more about them. Mr. Sturgill being the other teacher alluded to, can speak for himself, which, as he is not lacking in the use of either tongue or pen, he is competent to do. We doubt not he has a good certificate. Mr. McKinnell who taught here before the district was organized, does not, perhaps, come under the Co. Supt's indictment, but if he does he is abundantly able to answer it, being a fine scholar, as you Mr. Editor, being in receipt of communications from him, can testify.

And now having already taken up more space than we anticipated, we beg your forbearance while we touch on one more subject and we have done. There seems to be a mistaken idea among some seemingly priviledged characters here, viz; That a man cannot fence up his farm if he happens to fence up an old cow trail, that was sometimes used by wagons, running across his land. Acting on this idea some party or parties have made free to cut down and lay down fences, this summer, wherever they saw fit. As it happened to be an unused pasture nothing was said, but when those fences are replaced in the spring parties so trespassing will be promptly attended to. One would think that the law of common sense was sufficient to teach them some respect for the rights of other people, but it seems something is lacking. More anon,

Nervous Exhaustion.

A Few Useful Hints For Nervous People.

"I am so nervous" is a very common expression, used by both old and young: and very few can now be found who are free from nervous troubles. We regret to see that the malady is rapidly increasing. And from what cause? There are various reasons. It may be because of a low condition of the general health; the vitility of the nervous system is depressed; or from a want of perfect digestion and assimiliation of food, and the vitilizing power of pure, rich blood, the nerves are not properly strenthened and nourshed, and consequently become weak and diseased

There was a time when "nervousness," and that class of disease known as nervous affections, were apparently confined to ladies; but at the present day it is an undoubted fact that as large a portion of nervous diseases exist among men as among the gentler sex; and their distressing affects and lasting and enervating results are a thousand fold more serios, as they extend to posterity and are productive of a weakened and enfeebled race. Nervous and physical debility, caused by

Exhausted Vitality

is a frequent and distressing disease, its depressing influence being felt alike on both sexes and all ages. Among the first symptons of this affection are usually a derangement of the digestive organs. A feeling of languor will be experienced, and a gradual failing of strength, with general weakness and pain in the back. More or less exhaustation is experienced on waking in the the morning. There is often a bad taste in the mouth; the vision becomes dim, the memory is impaired, and the patient is troubled with frequent dizziness. Persons thus affected are often despondant, and suffer from gloom and depression of the mind. The nerves become so weakened that the least excitement or shock brings on a tremor or trembling, often attended by palpatation of the heart.

LADIES

Are particularly susceptible to nervous disorders, owing partly to their more delicate nervous organization and partly to their sedentary life and consequent confinement in-doors. Such affections are attended by restlessness and nervous excitement, anxiety or depression of the mind, loss of interest in society and the daily affairs of life. There is also loss of sleep; the patient on rising in the morning, feeling tired, languid and unrefreshed. From slight nervous attacks to hysteria, from simple "nervousness" to utter prostration, there are many and varied forms of diseases of the nervous system none of which should exist, and of all of which can be secured by the use of
