The great naturalist did most of his writing sitting in a large horsehair chair by the fire, upon a board stretched across the arms. When he had many or long letters to write, he dictated them from rough copies written on the backs of manuscripts or proof-sheets. He kept all the letters he received—a habit caught from his father. When his letters were finished, he lay on a sofa in his bedroom and had novels read to him, while he smoked a cigarette or regaled his nostrils with snuff.

CURE OF PNEUMONIA.

About a year ago I was taken with a severe pain in both lungs. I was first attacked with a violent chill, then a dreadful pain and then a cough accompanied by considerable fever. It looked very much like a bad attack of pneumonia. A friend of mine procured five Allcock's Plasters. One he put under each arm, one under each shoulder blade, and one on my chest close around my throat. In a few hours the cough ceased, the pain gradually abated and I broke out in a profuse perspiration. I fell into a profound sleep, and the next day was almost well. I wore the Plasters eight days afterwards, and have never had any trouble since.
