"NASAL VOICES, CATARRH AND FALSE TEETH.

A prominent English woman says the American women all have high, shrill, nasal voices and false teeth.

Americans don't like the constant witting they get about this nasal twang, and yet it is a fact caused by our dry stimulating atmosphere, and the universal presence of catarrhal tween Third street on the east, Jefferdifficulties.

But why should so many of our women have false teeth?

That is more of a poser to the English It is quite impossible to account for it except on the theory of deranged stomach action caused by imprudence in eating and by want of regular exercise.

Both conditions are unnatural. Catarrhal trouble everywhere prevail and end in cough and consump tion, which are promoted by mad-nutrition induced by delanged stomach action. The condition is a modern one, one unknown to our ancestors who prevented the catarrh, cold, ed, was only an undivided half therecough and consumption by abundant and regular use of what is now known and her children, it seems, were heirs as Warner's Log Cabin Cough and Consumption Remedy and Log Cabin 8 rsaparilla, two old fashioned stan- now about to take measures to enforce dan remedies handed down from our ancestors, and now exclusively put half. This means that the title to more forth under the strongest guarantees than \$49,000,000 worth of property will of purity and efficacy by the world- be tested. One of the attorneys who famed makets of Warner's safe cure, has the matter in charge, N. O. Gray, These two remedies plentifully used as was at one time one of Mrs. Myra Clark the spring and summer seasons advance give a positive assurance of freedom, both from catarrh and those dreadful and if neglected, inevitable consequences, pneumonia, lung troubles and consumption, which so generally and fatally prevail among our people.

Comrade Eli Fisher, of Salem, Henry Co., Iowa, served four years in the late war and contracted a disease called consumption by the doctors. He had frequent hemorrhages. After using Warner's Log Cabin Cough and Consumption Remedy, he says, under date of January 19th, 1888; "I do not bleed at the lungs any more, my cough does not bother me, and I do not have any more smothering spells." Warner's Log Cabin Rose Cream cured his wife of catarrh and she is acts invoked the aid of the statute of "sound and well."

Of course we do not like to have our women called nose talkers and exclusive possession of the property in false teeth owners, but these condi- question .- St. Louis Republican. tions can be readily overcome in the manner indicated.

USEFUL AND SUGGESTIVE.

-Salts of learn will whiten ivory knife handles that have become yellow.

-Flour should be warmed before making up a sponge if you would have your bread rise quickly.

-To have poached eggs look very nice, cook each egg in a muffin ring placed in the bottom of a saucepan of boiling water.

-Exercise enough to make rest delightful is good; sufficient to make one toss wearly and sleeplessly through the night hours is wasteful and ex-

-To clean a carpet and brighten the colors after the dust has been well beaten and shaken out of it, mix one quart of ox gall with three quarts of cold soft water and rub the carpet off with a flannel dipped in this. It is well to first rub out any particularly dirty spots before going over the whole carpet.

-Sponge Drops: Beat four eggs to a stiff froth, then stir in one heaping cup of sugar, and one and a third cups of flour. One teaspoonful of baking powder should be thoroughly mixed with the flour. Fiavor with lemon and drop from a dessert spoon on buttered paper spread on plates. The oven should be hot and the cakes will bake in a few minutes.

-A little borax in water is as good as any thing for was ring the head, and this should be used frequently. Do not make the solution too strong, as it has a tendency to cause the hair to become dry and brittle. Frequent brushing, especially before going to bed, will make the hair soft and glossy. A sharptoothed comb or metallic brush should not be used.

-Fried Bread: One quart of flour, one tenspoonful of salt, three of bakingpowder, and milk enough to make it as stiff as biscuit dough. Roll it out and cut into square cakes two inches long and a little over half an inch thick. Drop them into boiling lard. They only require a few minutes cooking, and when properly made they are so nice that they will soon become a family institution.

A Fortunate Druggist.

Mr. Edwin W. Joy for many years and now a pros perous druggist on the corner of Stockton and Market streets in San Francisco, probably never dreamed of rivaling in wealth the medicine kings of the country. But various rumors having been floating around to the effect that he has struck it big, an Examiner reporter was detailed to unearth the cause, and after much difficulty unraveled the follow

Examiner reporter was detailed to uncarth the cause, and after much difficulty unraveled the following story:

It seems that about seven years ago an English physician, a great student of botany, located for a briof season in this city. His practice was not extensive, and yet the few cases of a general nature that came to him attracted no little attention. His greatest success seemed to be in the treatment of liver and kidney disorders, and vitiated blood. In fact his ability to cape with these common complaints was little short of the marvelous. He seemed almost intallible, and his quiet, modest methods and his well kept secret was as much a mystery as himself. After his departure about a year later Mr. Joy determined to fathem the secret, and c 1991g all the prescriptions he had filled for the erratic doctor, he began a systematic analysis. In his examination he discovered running all through the prescriptions for liver and kidney troubles, vitiated blood and stomach disorders a comple of vegetable extracts indigenous to California, so simple and so well known under homely every day names to every school boy as to entirely dissipate the suspicion that they were the active principles involved. So certain, however, was Mr. Joy that he had discovered the secret that he embedied the new elements in a preparation of Sarsayarilla. Immediately the same unart slows stories came back of its astonishing effects, and the invistery was objed, and the talk it has created has already can ed it to step into prominence, and criers pour in duily from all over the coast. People seem to be taking it and writing and talking about it throughout the State. And thus another California industry leaps into existence.—S. F. Examiner.

AN IMMENSE CLAIM.

A Suit for the Recovery of Forty Million Dollars' Worth of Property.

Some St. Louis attorneys are now preparing documents for forty claimants who are to bring suit for the recovery of \$40,000,000 of property located in the heart of that city, and comprising twenty blocks lying chiefly beson avenue on the west, Olive street on the north, and Pine street on the south. The claimants are some of the beirs of Jean B. Becquette. The property is known as survey 901, and was confirmed to the legal representatives of Becquetts by an act of Congress passed April 29, 1816. The land was surveyed in 1826, and the survey returned to the recorder of land titles for the United States in July, 1828. According to the record in the case, Marguerite Hortiz (born Becquette), in August, 1835, conveyed all her interest in said land to John B. Lucas. Lucas' interest, it is assertin. Marie Barada (born Becquette)

also to one undivided half of the property, and it is her descendants who are their rights and claim to this undivided Gaines' lawvers, and has for a number of years been connected with important land litigations in Missouri. Some of the finest and costliest private residences, banks and business houses of St. Louis are situated on the disputed territory. The ground is valued at \$30,000,-000, and the buildings at \$10,000,000. Some very nice and intricate questions will come up in the course of the litigation; but, it is a well-known fact of law that the statute of limitations never runs against a tenant in common, and if it can be proven that the heirs and descendants are and have been ten-ants in common, then their claim can not be barred; but the question will hings many whether the greaters of hinge upon whether the grantees of Mrs. Marguerite Hortiz have by their limitations by holding, as against the heirs of her sister, open and notorious
